VALVET Ltd.

## Drug Helper

### WelCare Medi : Drug helper

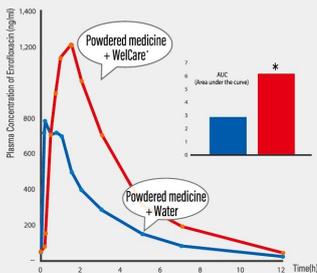

One tube, perfect dosing control. With WelCare Medi, you can easily administer powders, tablets, or capsules – adjusting the exact amount your pet needs.

### WelCare Heart : Heart care supplement and heart medication helper

Protects pimobendan from stomach acid degradation and provides essential cardiac nutrients.

### Drug Stability Proven through Clinical Trials

- (Blue Graph) Powdered Medicine (Enrofloxacin; Baytril®) + Water
- (Red Graph) Powdered Medicine (Enrofloxacin; Baytril®) + WelCare®
- Changes in plasma enrofloxacin concentration over time and the area under the curve (AUC) after administration of powdered enrofloxacin mixed with either water or WelCare.

• Drug Stability Confirmed in Beagles (Clinical Trial Center: Kyungpook National University, College of Veterinary Medicine & Chung-Ang University, College of Pharmacy)

∴ WelCare's Formulation: Improves drug absorption & Protects Efficacy

## Squeezeable Probiotics

### WelCare Daily : Squeezeable daily probiotics

Its patented Multi-Layer Gel Matrix (MLGM) protects probiotics from stomach acid and bile, helping to maintain a healthy gut every day.

### WelCare G/I : Squeezeable probiotics and digestive enzymes

Its patented Multi-Layer Gel Matrix (MLGM) protects probiotics and digestive enzymes from stomach acid, ensuring they reach the intestines alive. Clinically proven to be highly effective in managing gastroenteritis, it also helps relieve digestive issues such as diarrhea, bloody stool, stomach rumbling, and bile vomiting.

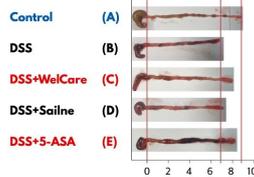

## Liquid Probiotics

### WelCare LactoDrop : Tasteless, odorless, and colorless liquid probiotics

Specially formulated for picky dogs and cats. Just five drops a day on your pet's favorite food helps support and maintain a healthy gut.

### Improving Intestinal Inflammation Proven through Clinical Trials

- Effect of WelCare® in a DSS-induced ulcerative colitis model
- Comparison of survival rate(%) and colon length(cm) changes
  - Control, DSS+5-ASA, and DSS+WelCare® groups exhibited a 100% survival rate, whereas DSS and DSS+Saline groups showed 62.5% and 75.0% survival rates, respectively
  - Bad bowel conditions(diarrhea or bloody stool) : shorter colon length
  - WelCare® and 5-ASA groups are most comparable to the colon length of the control group
- \* DSS (dextran sulfate sodium): ulcerative colitis-induced chemical
- \* 5-ASA (5-aminosalicylic acid): ulcerative colitis medication (positive control)

## Squeezeable Supplements
