

PETKIT

EVERSWEET ULTRA

AI Camera

Next-Level Hydration. Powered by AI.

Featuring an AI camera with pet facial recognition, this fountain tracks each pet's drinking behavior and turns it into individualized health insights, making personalized care effortless for multi-pet households. Its 5L high-capacity reservoir meets the demand for truly large-volume pet hydration solutions, providing up to 14 days of flowing water for a single pet. By separating fresh and waste water, the system creates a non-recirculating water path that helps minimize bacterial buildup and maintain optimal water quality.

SPECS

Camera

- 1080p full HD Camera with 140° Wide View
- Infrared Night Vision
- One-way Audio
- Privacy Protection

Dimensions

301*294*353 mm (11.85* 11.57* 13.90 in)

Weight

3.5 kg (7.71 lbs)

Capacity

5L (169 oz)

App Connection

2.4GHz / 5GHz Wi-Fi

Material(s)

ABS, 304 Stainless Steel, PP, PPO

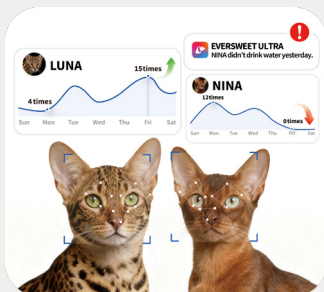

Range of Application

Cats and Small-breed Dogs

MSRP
 **\$199.99**

CORE TECHNOLOGY

AI-Powered Hydration Insights for Every Pet

With an AI camera featuring facial recognition, the fountain monitors each pet's real-time drinking activity and tracks their drinking history, enabling personalized urinary health monitoring in multi-pet homes.

Non-Recirculating Water System

With clean-waste water separation, used water drains into a waste tank and never returns to the reservoir—reducing bacterial buildup. Used water drains into the waste tank on schedule or with one tap in the app.

Smart Auto-Refill System

The fountain monitors the water level in the tray and automatically refills when needed, ensuring a continuous supply of fresh, clean water. As it refills, an antibacterial filter cube at the outlet helps screen impurities and inhibit bacterial growth.
