

# COMPANY PROFILE

[Tecnosystemi Group](#)

## A MISSION LASTING OVER THIRTY YEARS

A mission lasting over thirty years that has always believed in the value of human capital, at the basis of business development: for this reason, we have always invested in the training and improvement of talents both at a production and office/managerial level, favouring their professional growth for both technical and human skills and encouraging communication at all levels in a spirit of collaboration and simplicity, but also of innovation and dynamism. **The purpose of our company is to create a business that grows over time by providing excellent and carefully designed products.**

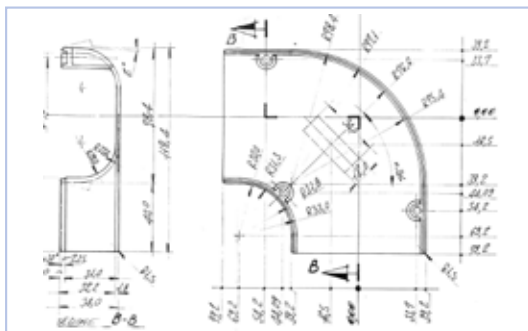

1992

## THE FIRST TECNOSYSTEMI IS BORN

Officially established in 1992, the company begins its journey in its first headquarters in Susegana.

1996

## TECNOSYSTEMI BECOMES A PRODUCTION COMPANY

One of the first major transformations that led the company to embark on a virtuous path that is still evolving today.

# ONE VISION OPEN TO THE FUTURE...

A true passion for their work and the vision of a company of the future lead the ownership to invest in technological means, transforming a small Venetian reality into a large company, with passion, will and research, always positioning the customer at the centre and creating a commercial network of value and cohesive in promoting this recognisable and unique spirit.

Innovation and technological evolution are the cornerstones of this strategy, which allow us to ensure high performance in the production flow, guaranteeing excellent quality standards and punctual customer service.

2002

## TRANSFER TO VITTORIO VENETO

Tecnosystemi moves permanently to the industrial area of Vittorio Veneto, after having changed the location of the plant twice.

2017

## INSTALLATION OF THE 500 Kw PHOTOVOLTAIC SYSTEM

2003

## A STRATEGIC CHANGE OF PERSPECTIVE TOWARDS THE FUTURE OF TODAY

The Company evolves with today's corporate asset which marks its definitive take-off.

# AWARE OF OUR PAST

Tecnosystemi begins its history by marketing a small range of accessories for air conditioning systems.

A winning business that, thanks to the strategic vision of the owners, manages to emerge strong and over time transform a small business into the company it is today.

2020

## COMPLETION OF THE NEW TECNOSYSTEMI REGISTERED OFFICE

The head office is redesigned by redesigning the reuse of a building that is now obsolete and not very much in line with the company's values.

2021

## TECNOSYSTEMI BECOMES A BENEFIT COMPANY

Tecnosystemi marks a new beginning by becoming a Benefit Company, thus rewriting its corporate purpose and officially declaring its serious intention to generate a positive impact on the environment and in the community, thus continuing a path that had already begun years earlier.

## CERTIFICATION RESEARCH AND QUALITY

Thanks to investments in new technologies and the enhancement of the skills and knowledge of our technicians, **we are able to develop high quality, functional and cutting-edge products within our research and development division.**

The **ISO 9001** quality management system certification is the further guarantee of an organised and continuously improving company structure.

With the **ISO 45001:2018 certification on of health and safety**, we are able to structure a safe working environment, avoiding accidents and therefore interruptions to operational activities.

## PROFESSIONAL TRAINING

*The competence of our people is the best way to convey the quality and value of the products.*

For this, Tecnosystemi S.p.A. supports customers and service centres with technical and application training courses scheduled monthly.

Why train with Tecnosystemi S.p.A.?

You will be able to guarantee the best service to your customers, obtain a certificate of participation, be informed about all the regulations in force and get a preview of our news.

## PHOTOVOLTAIC INSTALLATIONS

The evolution of a company is measured in **VALUES, PROJECTS and OBJECTIVES.**

**Tecnosystemi has concretely pursued its "eco-friendly" commitment by installing a new 1,100 KW photovoltaic system capable of satisfying the electricity needs of its production processes. These are concrete and tangible steps for our commitment to a cleaner world**

# WE INVEST IN THE FUTURE

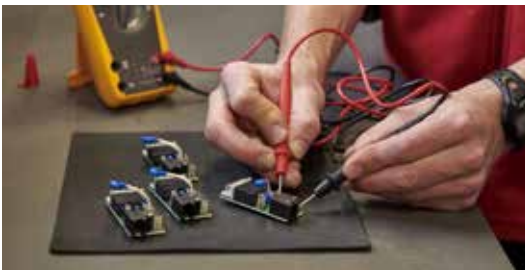

To maintain our competitive advantage, face changes and respond promptly to product customisations, we place innovation at the heart of our business strategy.

Technological evolution makes it possible to manage complex situations effectively and efficiently, with a view to continuous growth and improvement.

A company policy of investments in cutting-edge technological means has made it possible to count on 4.0 automation processes which, in addition to ensuring extraordinary performance, maintain a high level of product quality in order to meet any market challenge.

## BUILDING TOGETHER A NEW WAY TO DO BUSINESS

In our corporate project there is a very strong propensity to train employees and collaborators by continuously investing in the development of potential and designing an evolution of not only professional but also personal skills that are part of each human being, but which are often not adequately valued. **Investing in human capital growth is one of our fundamental objectives and this will never change.**

[#positiveimpact](#)

## WE ARE *ALSO* A BENEFIT COMPANY

On 28 June 2021, our company became a Benefit Company, thus clearly stating the intention to pursue, in the exercise of our business activity, not only the division of profits but also one or more purposes of shared benefit, positively **impacting on the environment and on society as well as on all stakeholders**. This will evolve in line with the principles dictated by the UN in the 2030 agenda for sustainable development.
