

Since 1970, **GT Line** has been synonymous with excellence in the design and manufacture of **technical cases and custom professional containers**.

Each of our products is born from a **passion for innovation** and a **commitment to meeting the specific needs of every industry**, ensuring **uncompromising performance in any situation**.

Every case that bears our name is the result of meticulous attention to detail and a continuous pursuit of advanced solutions. Our products are conceived as true professional tools, designed to optimize the daily activities of those who use them.

Customization, quality, and specialization make GT Line cases reliable and indispensable partners for professionals who value functionality, practicality, and durability.

In every product we create, there is a deep commitment to ensuring that our customers can rely on us, today as in 1970, for support that combines reliability with innovation.

## Our mission

GT Line's mission is to be recognized as the leading partner in the design and manufacture of technical cases and professional containers, offering a product range that stands out worldwide for its expertise, quality, and design.

Our goal is to provide customizable solutions that perfectly meet our customers' needs, ensuring reliability, practicality, lightness, and durability.

We believe that every professional deserves the best tools for their work. That's why our cases are designed to support every activity with the utmost efficiency, whether in professional environments or in specialized fields such as marine, travel, photography, healthcare, aerospace, and defense.

Every GT Line product reflects our commitment to meeting the most demanding challenges with cutting-edge solutions that make every task easier, safer, and more precise.

We take pride in being the partner of those who refuse to compromise, always delivering the highest standards of quality and innovation.

Providing professionals with the best  
tool cases.

## Our vision

Mechanics, plumbers, installers, field technicians, specialized professionals, and security forces all have unique needs when it comes to use, protection, storage, and transport. GT Line is committed to meeting these needs with tailored and precise solutions — designing and manufacturing tool cases and professional containers with meticulous attention to every detail.

Every aspect, from material selection to the design of internal layouts, as well as technical and aesthetic customization, is carefully studied to ensure maximum functionality, safety, and practicality.

Positioning ourselves as the single trusted partner for professional cases and containers.

## Our values

### EXPERTISE

Our true expertise lies in our ability to provide solutions that make other people's work easier and safer. Our know-how is the result of extensive experience in designing and manufacturing professional tool cases, combined with the passion we bring to everything we do. It is this passion that drives us to create every product to the highest standard and to push the boundaries of innovation in order to meet our customers' needs.

### CUSTOMER CENTRICITY

To offer the right product, it is essential to understand the real needs of those who will use it. That is why our professional containers are specifically designed around the actual requirements of the experts who rely on them, whether they are installers, maintenance technicians, photographers, or aerospace engineers. We know these professionals well, and we understand the challenges they face every day. Our technical cases are not conceived merely as tools for carrying and protecting equipment, but as silent partners that enhance daily operations in every condition.

For GT Line, this is the tangible expression of true customer care.

### CREATIVITY

In the engineering of our professional containers, we always adhere to a key principle: providing answers to complex challenges through simple, intuitive, and immediate solutions. To achieve this, we believe in an “out of the box” approach — leveraging the power of creativity to think beyond traditional boundaries and limitations, while turning our vision into reality according to the standards of excellence and quality that have always defined us.

### HONESTY

Honesty is a core value for us, reflected in the utmost care we dedicate to the development of every product. Integrity and fairness are the foundation of both our operational processes and our relationship with customers. Professionals find in us a knowledgeable and capable partner, genuinely committed to addressing their challenges and specific needs. At the center of our work is always the person. Human relationships are at the heart of all our activities: we listen to our customers to truly understand their needs and aspirations, enabling us to design increasingly advanced and high-performing solutions tailored to them.

## Our strengths

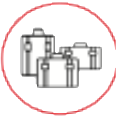

**SPECIALIZATION**  
(over 55 years of experience)

(extensive breadth and depth of  
product offering)

**PASSION**  
(for our work)

**PARTNERSHIP**  
(co-design)

**INNOVATION**  
(continuously)

**UQUALITY**  
(high and efficient)

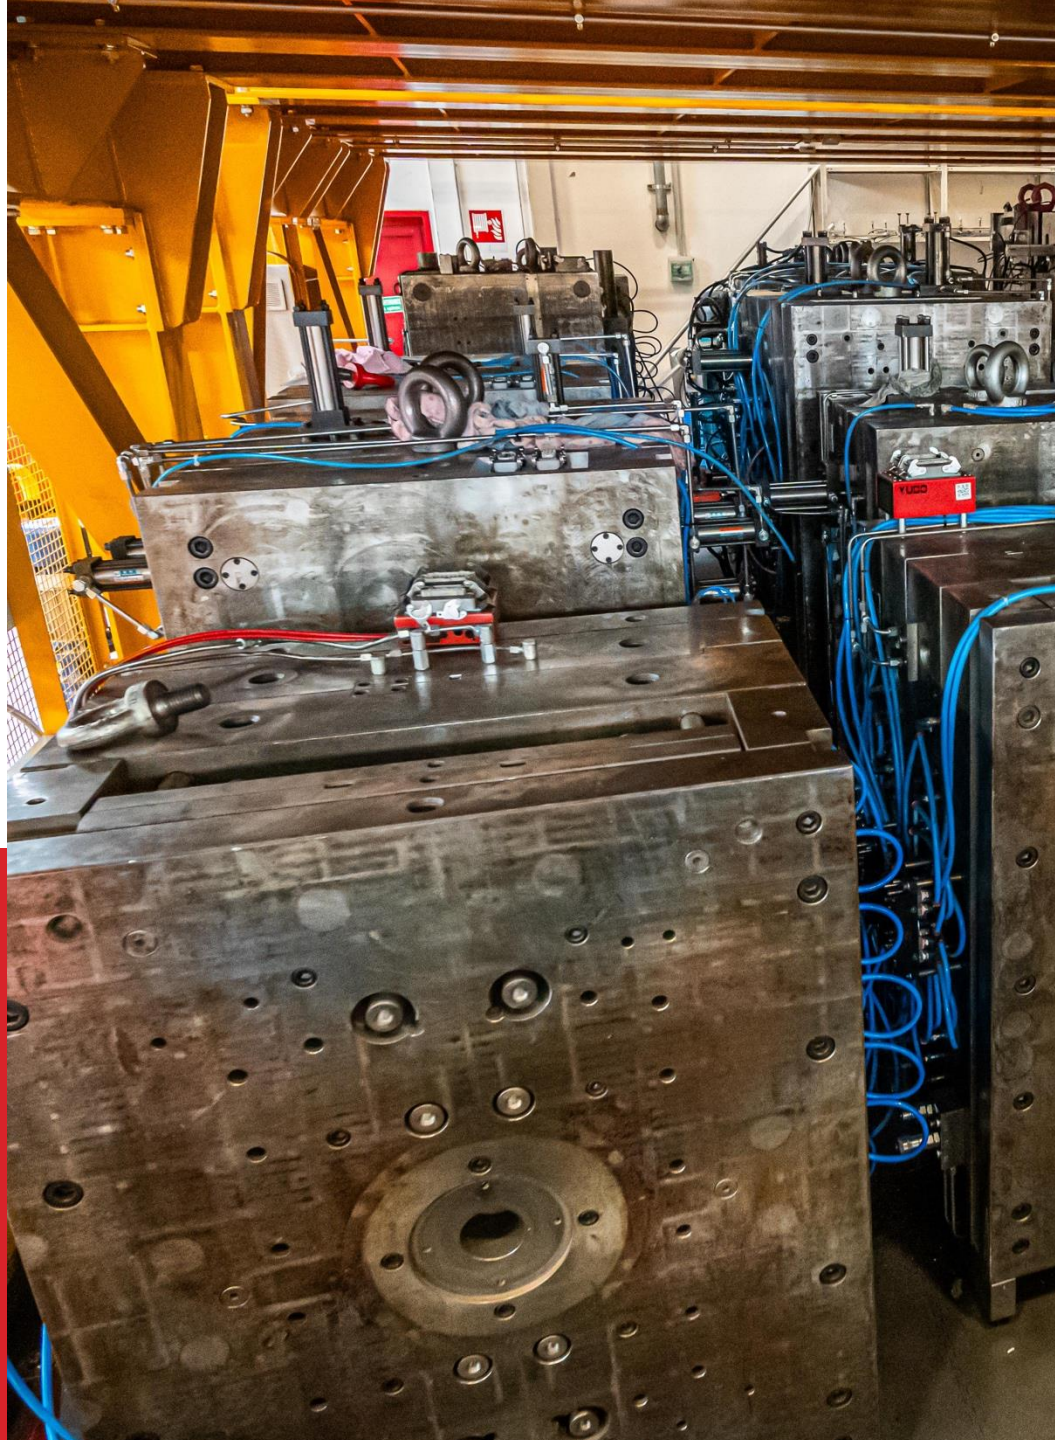

**PRODUCTION**  
(100% in house)

**SPARE PARTS**  
(availability for all  
products)

## Production

With over 55 years of experience and **UNI EN ISO 9001:2015** certified manufacturing processes, the company stands out for its innovation and the high quality of its products — the result of a continuous commitment to research and development.

The state-of-the-art production facility, located on the outskirts of Bologna, is equipped with advanced robotic technologies and designed according to principles that maximize energy efficiency, **ensuring a responsible and sustainable manufacturing process.**

The entire range of professional tool cases, waterproof containers, and tool bags is fully designed and manufactured in-house. By applying the latest innovations and focusing on key requirements such as strength, lightness, functionality, and aesthetics, our products combine authentic **Made in Italy design with outstanding quality.**

Selected materials are used in production, with great attention devoted to minimizing the environmental impact of our manufacturing processes.

# Innovation

Our success is built on continuous **investment in research, development, and innovation**, elements that, according to our management's vision, are essential to maintaining a leadership position in an increasingly competitive and diversified global market.

**A solid sustainability plan, effective governance, and a motivated, focused team of professionals** complete our growth strategy.

In response to the evolving needs of the market and our customers, GT Line continuously expands its knowledge of materials and manufacturing technologies to deliver high-quality containers at the right price.

With **two production facilities in Europe and one in Asia**, we are ready to further expand our market presence, ensuring local product availability and manufacturing capacity to meet every customer requirement.

At our facility in Italy, GT Line Srl employs a wide range of advanced technologies to ensure the production of professional cases of the highest quality and precision. We use injection molding and thermoforming processes that allow us to create strong and durable containers, ideal for any professional requirement. Our automated production systems and rigorous quality controls ensure that every product meets the highest standards of excellence.

To guarantee maximum precision, we utilize waterjet and laser cutting technologies for foams, as well as advanced milling and blade-cutting systems. These processes enable us to produce internal fittings perfectly tailored to the specific needs of each customer.

GT Line also manufactures all essential components of its professional cases in-house, including dividers, handles, and trolley wheels, ensuring full control over the quality of every single element.

Furthermore, to meet customization needs, we are equipped with machinery that allows us to personalize not only the foam interiors but also the external graphics of the cases through UV printing, as well as create customized labels. This versatility enables us to deliver fully bespoke solutions, perfectly aligned with each customer's requirements.

At our facility in Romania, GT Line Srl employs state-of-the-art roto-moulding technology for the production of high-quality professional cases.

This innovative rotational moulding technique allows us to create robust, durable containers with complex shapes, while ensuring lightness and long-lasting performance.

Thanks to roto-moulding, we achieve perfect material uniformity, minimizing defects and providing outstanding resistance to impact and extreme operating conditions. The result is a range of tailor-made solutions that meet the highest standards of performance and safety.

In Vietnam, GT Line operates a state-of-the-art manufacturing facility equipped with the most advanced machinery for automated fabric preparation and sewing. Thanks to these cutting-edge technologies, we produce panels, elastic components, dividers, padded bags, backpacks, and belts with exceptional precision and reliability, ensuring maximum strength and durability for all our products.

This facility serves as the core of our production for fabric tool bags, backpacks, and trolleys, as well as all accessories for GT Line professional cases and Explorer Cases tool containers.

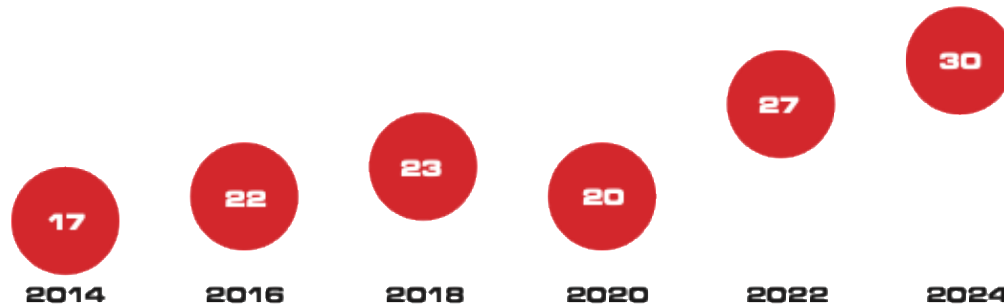

## Our numbers

GT Line Group exports its products to over 100 countries worldwide, thanks to a well-established network of business partners, distributors, and resellers operating in the hardware, tooling, electrical, and HVAC sectors.

Today, GT Line holds more than 20 international patents and numerous design models, covering over 300 products across its three brands: GT Line, Explorer Cases, and Work by GT Line.

## Our customers

**In 2024 GT Line consolidated a customer base of over 1,400 clients worldwide. Our network includes 850 retailers, primarily in Italy, 250 international distributors, and 300 direct customers, including major OEMs. These figures reflect the trust professionals place in our products, recognizing the quality, customization, and reliability of our solutions.**

GT Line's target customers are professionals who rely on our solutions, including electricians, plumbers, mechanics, aerospace maintenance technicians, field engineers, and operators across a wide range of industrial sectors. We serve, with particular focus, the Healthcare, Defense, Marine/Naval, Broadcasting, and Oil & Gas industries, as well as Maintenance and Construction companies.

In addition, our solutions also meet the needs of the Outdoor/Adventure segment, supporting those who face challenges in the most demanding environments.

## Our Product Offering

L'offerta di GT Line Group comprende una vasta gamma di soluzioni per il trasporto e la protezione di strumenti e attrezzature, rivolgendosi ad un ampio raggio di professionisti che hanno necessità di proteggere e trasportare in modo sicuro i loro dispositivi di lavoro.

Professional Tool Cases:  
durable and practical,  
designed  
to withstand a wide range  
of working conditions.

Waterproof Cases:  
designed to protect  
sensitive equipment  
and devices.

Tool Bags and  
Backpacks  
lightweight and  
functional, ideal for  
professionals on the  
move.

Accessories:  
a wide range of  
additional  
components to  
customize and  
optimize the use  
of cases and  
containers.

## Our services

Our team of experts is available to provide advanced customization of our technical cases, ensuring maximum adaptability of the products to the customer's equipment and specific application needs.

In this way, we guarantee not only optimal protection and organization of professional containers, but also the ability to express any graphic or branding requirement, enabling effective communication through the external surfaces of the cases.

### Customize

We offer customized interior solutions using pre-cubed or tailor-cut foam inserts designed to provide optimal protection for our customers' professional equipment.

Thanks to the use of state-of-the-art machinery, including laser, press, and waterjet cutting technologies, we can always deliver the most effective solution to meet each customer's specific needs.

### Protect and Organize

We offer a wide range of complementary accessories, including pocket and elastic panels, dividers in various sizes, padlocks, padded bags, backpacks, panel frames, hinges, and internal supports.

Depending on the intended use of our cases, we select the most suitable accessories for each customer, completing the customization of the professional cases we provide.

In this way, we ensure not only maximum protection and care but also optimal organization to support the professional's work.

### Communicate

We also offer aesthetic customization of our professional cases through UV printing, allowing customers to reproduce their branding and visual identity on the external surface of the case.

In addition, customized labels featuring the customer's logo can be applied, and the interior of the case can also be personalized to match specific requirements.
