Is it **challenging** to know who can access what?

- ❌ What are my orphaned accounts?
- ❌ Who has access to sensitive data?
- ❌ How many guest accounts are still active?
- ❌ Which users have never logged in?
- ❌ Who has administrator privileges?

Enter **Elimity Insights**,
the lightest and fastest IGA solution

The Solution

- ✓ Understand who can access what
- ✓ Identify and clean up risks
- ✓ Automate access reviews
- ✓ Comply with **NIS2, DORA & ISO 27001**

Status & Name	Description	Owner	Scope	Results
AD account with many logins		Maarten Decat	AD controls	79
AD accounts not logged on in last 6 months		Maarten Decat	AD controls	4040
AD users not logged on in last 6 months	List of AD users not logged on in last 6 months	Maarten Decat	Lanwaverp	4051
Admin AD account linked to inactive employees		Maarten Decat	Orphaned accounts	2740
Feed not changed in last 3 months		Maarten Decat	AD controls	5336
Accounts not changed		Maarten Decat	AD controls	5989
Accounts not changed	List of AD accounts that are not changed	Maarten Decat	Lanwaverp	5990
AD users without manager		Maarten Decat	AD controls	3152
Active employees with end date in the past		Maarten Decat	None	134
AD users with many linked groups	List of AD users with many linked groups	Maarten Decat	Lanwaverp	330

How does it work?

- **Day 1** - Connect with your critical systems
- **Day 2** - Visibility: understand who can access what
- **Day 7** - Start cleaning up identity risks
- **Day 14** - Continuous risks monitoring & governance
