Our 1st Global Award
for AI Technology

Industry Recognition and Technology Awards

ImmuniWeb disrupts traditional application security testing by delivering web and mobile application testing augmented with proprietary machine-learning technology and human testing

ImmuniWeb has woven together machine learning with its own expert testers to confidently offer unique zero false-positive SLA

ImmuniWeb offers true automated penetration testing where its machine speed allows it to scale, while the human penetration testers ensure complete accuracy

ImmuniWeb outperformed IBM Watson for Cybersecurity and won in the "Best Usage of Machine Learning and AI" Category

ImmuniWeb won "Inc. Power Partner Award 2025" for proven track records of global growth, innovation and industry leadership

Time-Tested and Award-Winning AI Technology

“Best Usage of Machine Learning and AI”

Our [award-winning](#) AI technology received its first international recognition back in 2018 for **intelligent automation and acceleration** of application security testing, augmenting our experts but not replacing them.

Our unique **synergy of AI and human intelligence**, when experts handle only sophisticated tasks that truly deserve human brainpower, offers the **best quality for the most competitive price** on the global application security market.

ImmuniWeb Corporate Values

Creating Long-Term Value for Customers

We provide our customers with proven solutions that solve real problems in a cost-efficient and effective manner. We always place the interests of our clients above ours: if our products are not the best suited to our customer's goals, we will disclose this and propose a better alternative.

Delivering Best Value for Money

We do not think that low-cost cybersecurity or cheap prices can create value for our clients. We rather strive to continually bring best value for money, pragmatically surpassing other offers available on the market by delivering the best possible quality for the best possible price to our clients.

Staying Curious to Innovate

We believe that by always staying hungry for new knowledge, our technical and scientific teams stay on the edge of emerging technologies, separating noise and hype from genuine innovation. This is why we invest at least half of our annual profit into research and development.

Perfecting Corporate Governance

We believe that a solid corporate governance is the foundation of business sustainability, being an ISO 9001 and ISO 27001 certified company. Our Board of Directors is comprised of independent and experienced industry practitioners who oversee corporate governance with help from our external financial auditors and Advisory Board.
