

# PPWR Compliant with Ease

PPWR compliance doesn't have to be complex.

With the right tools, companies can navigate varying rules across packaging types and EU markets—avoiding unclear requirements, scattered data, and manual reporting. Coordination with teams, suppliers, PROs, and recyclers becomes efficient and manageable.

## PackIntelX: Your Digital Platform for Packaging Compliance under PPWR

With Packintelx you can manage your whole packaging portfolio within one digital platform:

1

### Detailed Packaging Analysis

Identify and classify all packaging formats by sector and type through our Advanced PPWR test

2

### EU Conformity Declaration

We support you in fulfilling your EU Declaration of Conformity valid in all 27-member states

3

### Technical Documentation

Gathering technical documentations from your suppliers is time-intensive! Our team help you save time and costs!

4

### EPR Licensing

We help you identify your EPR obligations and you benefit from our partner PROs to get the best deals!

5

### Recyclability Analysis

We analyse if your packaging is sortable and recyclable in the commercial plants across the EU!

6

### Recycled Content Integration

We provide you access to high-quality post-consumer recycled plastics from Mechanical- and Chemical recycling

7

### Regulations Updates

Track delegated and implementing acts through our platform impacting your sector, formats, or materials.

8

### Digitalization of All Data

We support data centralization for packaging specifications, labelling, and lifecycle data.

## Get in Touch

Whether you own the packaging or bring it into the market, PackIntelX gives you the tools and clarity to act. Let's simplify your compliance journey.

Reach out for a live demo or use-case walkthrough tailored to your packaging setup.

# Bridging Waste Regulations with Real-World Operations

## Our Practical Solutions for Your Packaging Compliance

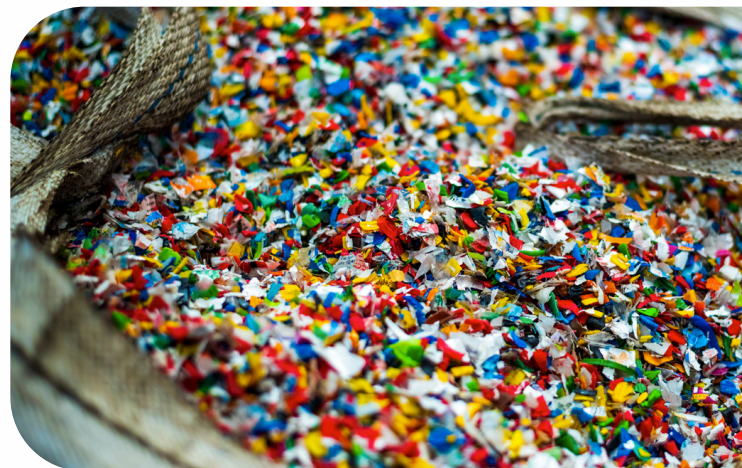

### Sorting & Recycling Tests and Pilots

Conducted in commercial-scale facilities with industry partners

### Recyclability Analysis & Certification

Material testing, design-for-recycling checks, compliance assessments

### Extended Producer Responsibility

Cost-effective EPR compliance through our PRO partners in 27 EU-member states

### Recycled Content Procurement

Sourcing of mechanically and chemically recycled feedstock
