

INTERQUELL PETFOOD

SUSTAINABILITY REPORT 2023 | 2024

As an eighth-generation family business, sustainability is more than just a strategic goal for us – it is part of our identity and our long-term self-image. Over the past two years, we have successfully developed our sustainability initiative and thus made an active contribution to shaping a sustainable pet food industry. We want to continue along this path consistently.

Many thanks to all our employees, partners and pet owners who have supported us in this endeavour.

GEORG & ANDREAS MÜLLER,

Managing Director and Commercial Director of Interquell GmbH

Interquell Petfood has stood for healthy and varied pet food for generations and takes responsibility for people, animals and the environment. Our roots go back to the 18th century. In our factory in Bavaria, we produce high-quality premium dry pet food that is exported worldwide.

The current, third sustainability report documents the progress made in 2023 and 2024. In recent years, we have achieved numerous milestones in the areas of energy efficiency, renewable energy, sustainable product development and corporate culture. The structure and methodology are based on the internationally recognised standards of the Global Reporting Initiative (GRI) and the EU Corporate Sustainability Reporting Directive (CSRD). Our sustainability approach is based on a dialogue with all stakeholders and focuses on 16 projects along the ESG criteria – environmental, social and governance.

In the coming years, we will continue to intensively pursue the existing initiative and expand its scope. We see sustainability as a dynamic process that we want to develop year on year and firmly anchor in our corporate culture.
