

## COPING MACHINE

### KF-1H

The compact and versatile KF-1H is a precise, powerful machine ideal for milling counter profiles on door and window frames. It impresses with state-of-the-art technology and maximum efficiency in profile processing. The KF-1H operates on the same principle as the KF-1 but features a vertical axis for mounting up to four tools. The machine is standardly equipped with an HSK-32 spindle, a servo axis in the X-direction, and a user-friendly touchscreen control system.

Discover them live at the trade fair  
–we'll show you the technology and  
benefits in detail.

Servo height adjustment

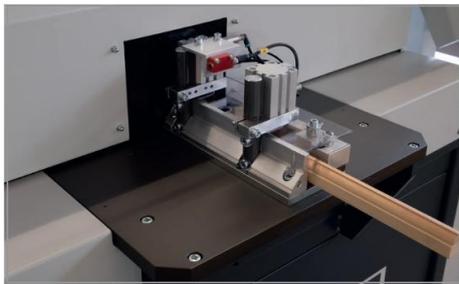

Workpiece

#### FEATURES

- Up to four different profile cutters can be used flexibly on a single spindle
- Automatic height adjustment of the milling spindles - precise and fast thanks to servo motor
- Optional: drilling and doweling station

Pneumatic workpiece clamping
