Techvision Showcases Advanced AI Solutions for Automotive, Robotics, Smart Home and AIoT at Embedded World

At Embedded World, Techvision is presenting its cutting-edge AI-powered solutions, with a focus on automotive vision, AIoT, robotics, and smart home applications. The AI Power Automotive Vision System leverages high-performance AI capabilities to enhance ADAS (Advanced Driver Assistance Systems), ensuring improved safety and efficiency.

In addition, Techvision introduces its versatile SOM & SBC solutions based on Intel, AMD, Rockchip, MTK and Unisoc 5G, designed to meet the demanding requirements of industrial, automotive, and IoT applications. Powered by the latest technology, these solutions deliver robust performance for edge computing, real-time data processing, and seamless device management.

With the Home AI Computing Hub and AIoT Device Management System, Techvision is empowering smarter homes and commercial environments. The Service Robot AIO is also transforming robotics with integrated AI, enabling autonomous functions across various environments.
