

## Please note

Unfortunately, severe washing out of dark plush colors cannot be avoided for technical reasons. Please ensure that light-colored items of clothing are strictly separated during the washing process. When machine washing, the following wash cycle should ideally not contain any light-colored textiles.

## Warning notice

Fill leakage can damage your washer or dryer. Unzip the cushion and remove the inner bag with microbeads before washing. Then close the zipper again and wash only the cover without the inner bag. Do not reinsert the inner bag with the filling until the cover has completely dried, as moisture can cause the microbeads to stick together.

## Disclaimer

If the inner bag is not removed before washing or drying and damage occurs due to leaking filling material, we assume no liability for this.

## Danger

Please do not use the cushion as a baby sleeping pillow and never leave your baby unattended with the cushion for long periods of time. Please also make sure that the cushion is not used as a "sucking pillow".

## Note / exclusion of warranty

Depending on the type and duration of use of the cushion, a loss of volume is normal due to the nature of the cotton fabric and polyesterol.

We must exclude any entitlement to receive refill material free of charge.
