#### Legacy Options

Long-term support for legacy and discontinued NIC models. We help you extend the lifecycle of current critical infrastructure.

#### Open Standard Range

Universally coded NICs provide compatibility across multiple vendors' equipment, eliminating vendor lock-in and enabling flexible, cost-effective sourcing.

#### Complete Fibre Solutions

Combine with our extensive range of fibre optic transceivers for complete end-to-end connectivity solution, fully tested and interoperable.

#### Lifetime Replacement Warranty

In the unlikely event that you experience an issue with your product we will provide a replacement.

#### Global Fulfilment & Logistics

Worldwide shipping with same-day shipping available. We support complex delivery schedules and global distribution.

#### Evaluation Units

Request evaluation units for qualification and comparability testing before bulk deployment. Fast turnaround and flexible terms.
