

**“Reliable Solution Partner in Trim Tools”**  
**“Trim Kalıplarında Güvenilir Çözüm Ortağınız”**

## 16 Years of Experience

With over 16 years of expertise in the mold and manufacturing industry, we deliver superior quality and long-lasting performance.

## Sustainability

By prioritizing energy efficiency in mold production, we provide environmentally responsible and sustainable solutions.

## Advanced Technology

Utilizing state-of-the-art machinery and modern equipment, we achieve outstanding results in every project.

# About Us

## OUR VISION

With a business approach shaped by innovation, entrepreneurship, and reliability across the sectors we serve, our mission is to create sustainable value in our core areas of expertise.

Our vision is to become a leading, brand-owning solution partner in the metal industry which is innovative, knowledge-driven, and capable of meeting all industry needs with comprehensive solutions.

## OUR MISSION

By continuously enhancing our broad portfolio of products and services, we aim to meet customer demands and expectations at the highest level, ensuring customer satisfaction and long-term loyalty.

In mold and metal component solutions, our goal is to expand our service capacity in the domestic market and become a solution partner that creates sustainable value aligned with customer expectations.

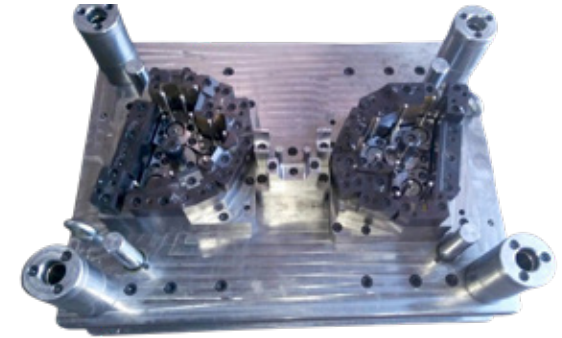

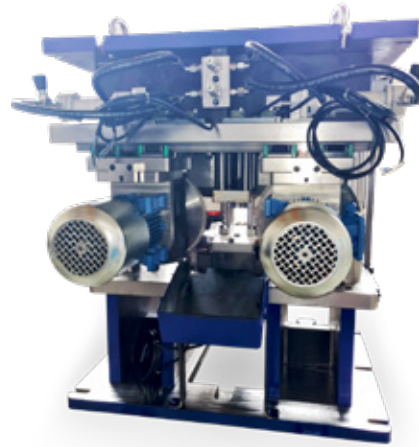

# EGELİ KALIP

Since 2010, Egeli Kalıp has been providing design and manufacturing services for trim tools, sheet metal molds, and inspection & checking fixtures.

Our aim is to deliver effective solutions for projects across various industries by combining our customers' valuable ideas with our own expertise, ensuring fast, reliable, and high-quality service. Egeli Kalıp acts as a trusted solution partner for numerous companies. Since our establishment, our strong commitment to customer satisfaction has been reflected in our continuously growing customer portfolio.

# Trim Tools Design and Manufacturing

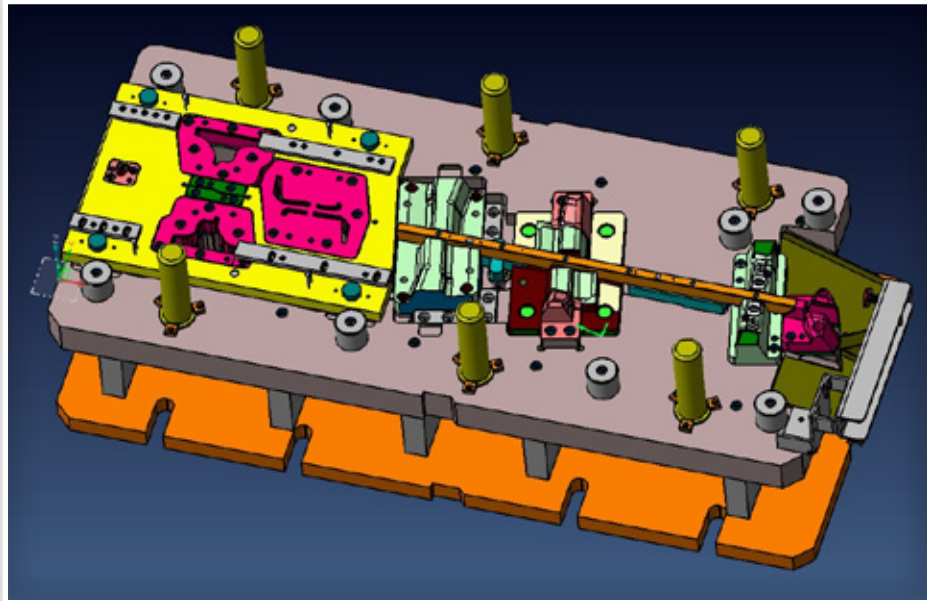

Trim tools are specialized tools used to trim runner systems and excess material from parts produced by high-pressure aluminum die casting. Our quality standards are driven by the goal of delivering trim tools that offer the highest levels of performance and reliability to our customers. As the only company in Türkiye manufacturing saw-type trim tools, we set ourselves apart in the industry.

# Progresif Trim Tools Design and Manufacturing

Progressive tools are tooling systems that process metal sheets through multiple operations such as cutting, forming, and piercing to achieve the required shapes and dimensions in a single continuous process. They are widely used in industries including automotive, home appliances, and electronics. The use of progressive molds ensures high production efficiency, reduced labor costs, and consistently high product quality. Egeli Kalıp meets customer requirements with progressive molds that deliver high precision and efficient production.

# Fixture Design and Manufacturing

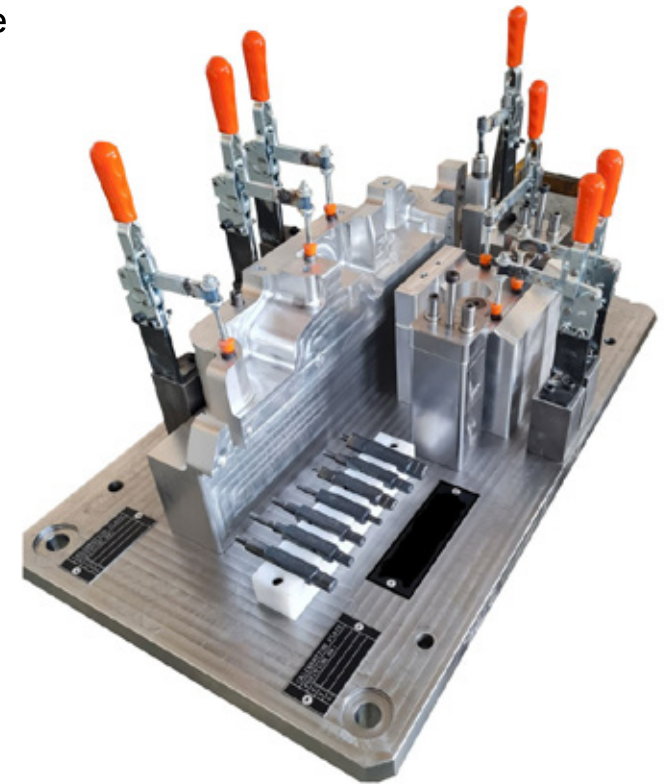

Fixtures enable faster, easier, and more reliable production, measurement, and inspection processes of sheet metal parts, particularly in the automotive and home appliance industries.

With over 16 years of experience in fixture and tooling design and manufacturing, and a team of specialized professionals, we produce customized solutions in line with customer requirements.

## **Main Fixtures and Tooling We Manufacture**

- Part Holding Fixtures
- Assembly Fixtures
- Welding Fixtures
- Measurement and Inspection Fixtures (for Automotive and Home Appliance Industries)
- Machining Fixtures and Tooling

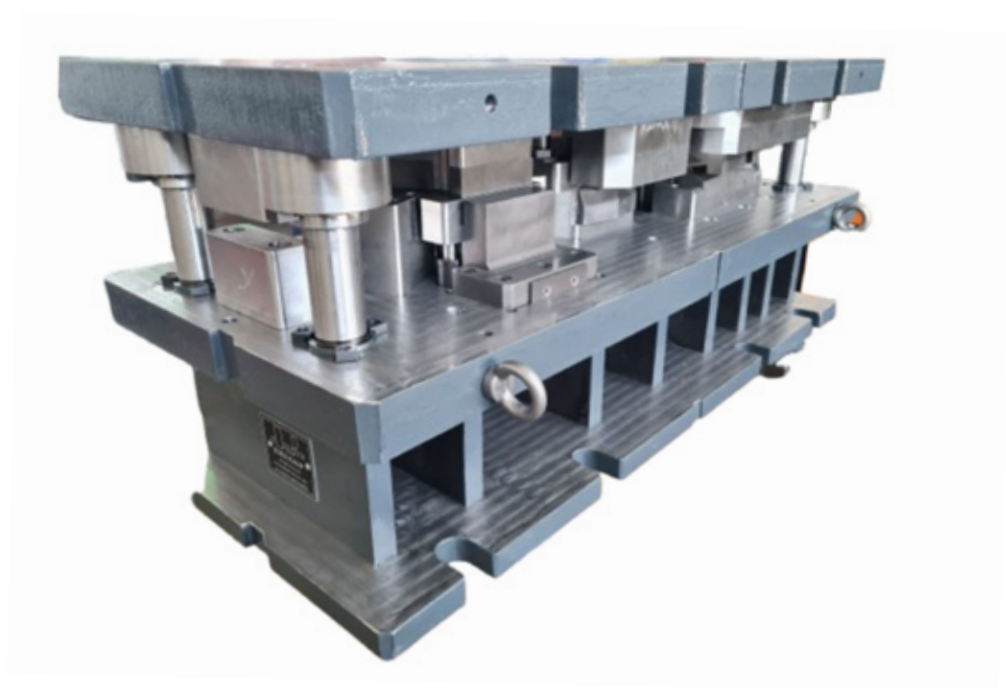

As Egeli Kalıp, we focus on achieving the highest level of customer satisfaction in every project by using high-quality materials and advanced technology, ensuring on-time delivery and outstanding results.

# **Tandem Sheet Metal Mold Design and Manufacturing**

Tandem sheet metal molds are single-operation tools designed and manufactured in line with customer requirements, typically used in applications where mass production or full automation is not required. Thanks to their high precision and efficient production processes, these molds are a preferred solution across various industries. With a customer-focused service approach, we provide tandem mold design and manufacturing to meet specific industry needs.

As Egeli Kalıp, we focus on achieving high customer satisfaction in every project by utilizing high-quality materials and advanced technology, ensuring on-time delivery and excellent results.

# Certificate

As Egeli Kalıp, we aim to maintain the highest levels of quality and reliability standards within our industry. In line with this commitment, we certify our competence through various certifications in compliance with international standards.

## High-Quality

As Egeli Kalıp, we take pride in being one of the leading companies in the mold manufacturing industry, supported by over 16 years of experience. By delivering high-quality and innovative tooling solutions, we aim to optimize our customers' production processes to the highest level of efficiency.

Egeli Kalıp is not only a manufacturer but also a strong and reliable business partner. We continuously improve our capabilities, closely follow industry trends, and create value through innovative approaches to provide the best possible service to our customers.

## CAD-CAM

CAD-CAM systems play a critical role in the modernization and optimization of industrial manufacturing processes. As Egeli Kalıp, we utilize state-of-the-art CAD-CAM systems to deliver high-quality designs and highly efficient production processes.

# Why Egeli Kalıp?

## 16 Years of Experience

With over 16 years of experience in the mold and manufacturing industry, we deliver high-quality, reliable solutions.

## Professional Team

With our expert team always by your side, we provide dependable and long-lasting solutions tailored to your projects.

## Advanced Technology

With our state-of-the-art machinery and modern equipment, we achieve excellent results in every project.

## Sustainability

By prioritizing energy efficiency in mold manufacturing, we deliver environmentally responsible and sustainable solutions.

## Unique Design

For reliable and efficient mold production, manufacturable design is essential. We successfully combine design excellence with production feasibility.

## On-Time Delivery

We guarantee smooth and timely delivery based on a schedule specifically planned for your project.
