

Empowering semiconductor innovation for Greece and Europe

The Hellenic Chips Competence Centre (HCCC) is Greece's national hub that coordinates innovation, skills development, and collaboration across the semiconductor and micro-electronics ecosystem. In alignment with the EU Chips Act, HCCC supports startups, SMEs, researchers and industry to design and bring forward advanced microchip technologies—helping strengthen European capability and resilience.

What we do

Connect to Design Platform & Pilot Lines

- Facilitate access to chip design tools, methodologies and operating protocols
- High-performance computing (HPC) access services

Deliver Skills & Training

- Semiconductor fabrication and materials
- Circuit and system design
- Embedded systems and IoT
- Advanced technologies, plus soft and business skills

Provide Technical Knowledge Transfer

- EDA tools and other software enablement
- Prototyping and co-development services
- Digital and AI-based solutions
- Specialized component and system design

Support Business, Investment & Innovation Ecosystem

- Connections to expertise, business planning and market research
- Support to identify funding and investors
- Networking across the national innovation ecosystem

Why this matters

Semiconductors underpin modern life from mobility and energy to health and communications. Europe is investing to reduce supply-chain concentration and build sovereign capability. HCCC anchors Greece on the European map of strategic semiconductor infrastructures and mobilizes public-private collaboration to accelerate investment, skills and technology transfer.

Who we serve

- Startups and SMEs building new products
- Researchers and academic groups advancing the state of the art
- Industry players and scale-ups seeking design enablement and talent

Get involved

- Follow news & events and subscribe to the newsletter
- Reach out to discuss access to tools, HPC services and networking opportunities
- Partner with HCCC on training, technology transfer and pilot projects

About The Hellenic Chips Competence Centre (HCCC) is a non-profit partnership formed to advance the Greek and European semiconductor ecosystem in alignment to the strategic goals of the EU Chips Act. Coordinated by Hellenic Emerging Technologies Industry Association (HETiA), the consortium includes top Greek research institutes, universities, scientific and industry stakeholders.

HCCC project is supported by Chips JU and its members and is co-funded by European Union and the Greek Government via the "Competitiveness" Programme. Views and opinions expressed are, however, those of the author(s) only and do not necessarily reflect those of the European Union or EYDE-VEK. Neither the European Union nor the granting authority can be held responsible for them.
