

# LEADING EMBEDDED CAMERA MODULES

BETTER IMAGES.  
BETTER PRODUCTS.

## COMPANY DETAILS

**EMPLOYEES:**  
150+ FRAMOSIANS

**HEAD OFFICE:**  
MUNICH, GERMANY

**R&D AND FACTORY:**  
ČAKOVEC, CROATIA

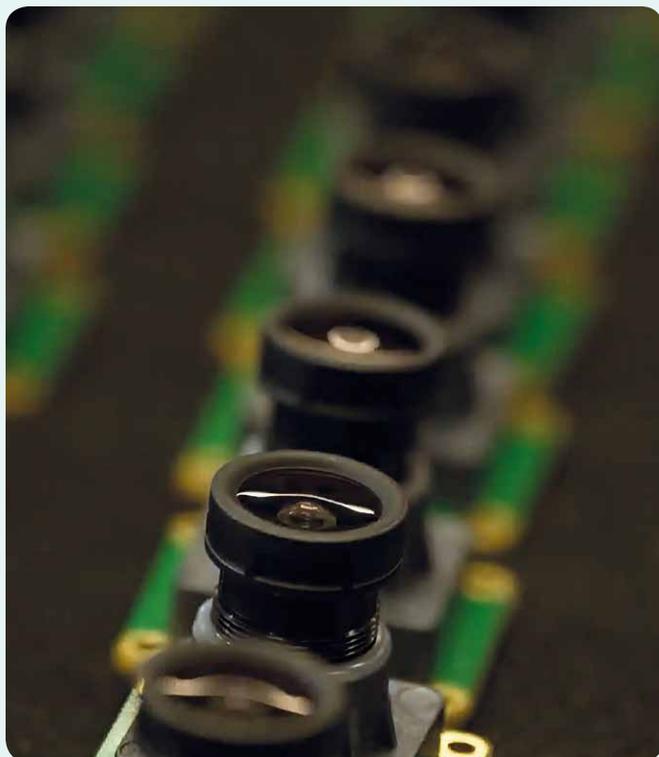

**45** years active in imaging

**4** Locations

**15+** years in North America and Asia

**3.500** sqm R&D and production facility in Europe opened 2025

**~500.000** cameras produced yearly

## LEADING CAMERA MODULES

**MADE IN EUROPE.** Reliable and cost-effective production at strategic location in Europe with up to millions of pieces production capacity.

**R&D + PRODUCTION.** FRAMOS combines R&D and manufacturing under one roof to ensure best quality and speed.

**OPTICS.** Optics choice and integration are core part of the camera module stack. Mastering focusing from center focus to balanced multi-ROI and high-precision 6-axis active alignment.

**MODULAR, SIMPLE & OPEN SOURCE.** Well curated modular camera module portfolio easy to integrate and off-the-shelf available for samples with an open-source approach.

# WHY ENGINEERING TEAMS CHOOSE FRAMOS

We're shaping the future of Embedded Vision.

## VISION-OPTIMIZED MANUFACTURING

Designed and Manufactured in Europe using specialized vision tools to deliver the highest quality and consistency in every module.

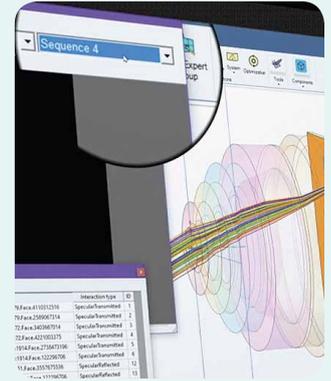

## SUPERIOR IMAGE PERFORMANCE

End-to-end expertise in sensors, optics, and tuning to ensure your application achieves its best possible image.

## PRODUCTS READY TO DEPLOY & CUSTOMIZE

Ready-to-use products built for fast integration, with tailored options when your application needs something specific.

## ENGINEERING TOMORROW'S VISION SYSTEMS

Advanced simulation and design tools that help you select the right technology and validate results before hardware exists.

## OUR PRODUCT OFFERING

Superior image quality for your application.

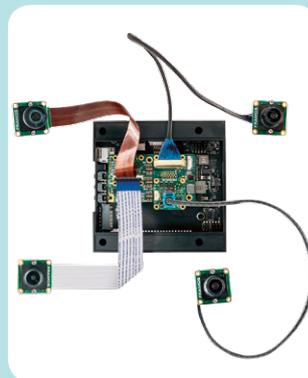

### CAMERA MODULES

Off-the-shelf, production-ready camera modules that simplify integration

### 3D CAMERAS

Industrial-grade 3D cameras built for harsh environments

### CUSTOM SOLUTIONS

Tailored imaging systems - from sensor to system

### INTEGRATION

Open source first approach and integration support from Framos and partner

FRAMOS is the leading camera module design and manufacturing expert. Founded in Munich, Germany over 40 years ago, FRAMOS has empowered companies worldwide to make drones fly safely, enable robots to see and think, make diagnostics faster and more affordable, boost athletic performance with AI, and countless other innovations. FRAMOS stands for best-in-class image quality, an open-source approach, and fast, easy integration – helping customers launch products quicker and stay ahead of the competition. With strong expertise in electronics design, optics and optical assembly, camera calibration, image tuning, and software integration, FRAMOS provides off-the-shelf camera modules and customized embedded vision solutions. At our technology campus strategically located in Europe, we combine R&D and manufacturing services under one roof and provide scalable manufacturing capacities up to millions of pieces.
