# A Company 100% Made in Italy

60 years of Italian history

Stefanplast rooted in the Vicenza area, is among the leading companies in Italy in the production of plastic items for the household, garden and pet sectors.

A company with an organized managerial structure, owned by Walter Stefani in the role of president.

In 60 years of history, we have gained experience and a deep knowledge in the production of quality, functional and durable products, accompanying the evolution of every product to taste and lifestyles. Highly recognized in the Italian market, we export the "100% Made in Italy"

Stefanplast quality in over 70 countries worldwide.

## 3 Areas

### Home

A cozy home, with a proper mix of personality and ease of use, functionality and Mediterranean warmth: this is Stefanplast home. A world of constant research and care of the current needs, which results in laundry baskets and accessories for the bathroom, bins, table and kitchen accessories, storage containers and much more: everything characterized by an extreme care of details and tones which give you the everyday enjoyment of life.

### Garden

Every garden needs care, attention and choices that are first of all an expression of style. Stefanplast gives shape to these choices, with a wide range of items for floriculture, hobby and professional nursery. A complete assortment of products developed with an Italian taste, to offer a real "universe" for the life in & outdoor.

### Pet

When spending time together indoor or outdoor, at the park or on holiday, any Stefanplast item will be a cuddle for your loyal friend: pet carriers, bowls, sleepers and much more, developed to give them the affection and the cares they need.

# Logistics

5 warehouses

1st fully automated and compactable plant in Europe

22.000 sqm storage area

30.000 pallet places

Export

We export the “100% Made in Italy” Stefanplast quality in over **70 countries** worldwide

We export over 50% of our production and the Stefanplast brand is well known. It is in fact distributed by the largest wholesalers, distribution chains, DIY, large-scale retailers and other sales channels around the world.

# Responsible development

Recycled and 100% recyclable products

Stefanplast planning and production chain is increasingly focused on an eco-friendly role to respect the environment by using durable materials which can be totally disposed at the end of their lifecycle. Our growth path continues, creating product lines made of 100% recycled plastic.

# Responsible development

## Plastic recycling

Thanks to an enlargement of our mechanical recycling plants we can improve the quantity of existing resources used in various collections, in order to further reduce the environmental impact; many of our products are obtained from a % of already regenerated material.

In the circular economy context plastic is the main protagonist of a continuous reuse and the profitable application of post-industrial and post-consumer resources is the best way to move towards environmental sustainability.

Through a targeted and intelligent use of recycled material, we recover over 30% of discarded material, coming from production waste (POST-INDUSTRIAL) and from separate collection (POSTCONSUMER).

plastic **Regeneration**

## Pursuit of efficiency to reduce waste and consumption

Raw materials, energy efficiency, reorganization of the plants to make the most of the natural light, optimization both of the internal logistic and the production asset: fundamental actions to reach a concret sustainable responsibility.

## Packaging optimization

Our packaging has been developed and manufactured to reduce Stefanplast environmental impact and enhance its ecological footprint. Whether they are made of cardboard or films or wrappings, they can be sorted and 100% recycled. In addition, our company is promoting key transition projects towards the elimination of disposable packaging for both our finished and semi-finished products.

For the latter, we use modular plastic containers made of 100% recycled material: a responsible choice that reduces waste and allows better space management.

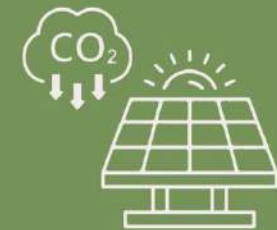

## Energy-efficient injection machines and auxiliary facilities

The 80% of our injection machines is fully electric. We use an innovative power quality improvement system which provides a real energy efficiency: each kWh saved is equivalent to approximately a 0.450 kg reduction in CO2 emissions.

## Investments in energy optimization and in new photovoltaic systems

The consumption reduction projects together with the installation of a new photovoltaic system will allow us to reach the goal of covering the 35% of our energy needs by 2024.

# Responsible development

## 100% recyclable products

The Stefanplast planning and production chain is increasingly focused on an eco-friendly role to respect the environment by using durable materials which can be totally disposed of and recycled at the end of their lifecycle.

## Enlargement of the internal grinding system for a sustainable use of waste production materials.

Acquisition of new grinders, thanks to which we optimize the management of production waste, recovering the recycled material faster. The supply chain then continues its finalization externally; the regenerated plastic material returns to the company to be used again in the most suitable articles.

## Plastic recycling

Through a targeted and smart use of recycled materials Stefanplast makes its new productions. We recover 100% of our industrial waste and more than 30% of plastic material which comes from certified recycling of external productions (POST-INDUSTRIAL) and from separate collection (POST-CONSUMPTION). Nowadays customers can see the difference between an ecological product and other ones by its uneven colouring.

# Responsible development

# Quality and certification

Quality of our ideas, in a continuous and widespread development that involves every aspect of company life.

Every day we are committed to improving our production standards and our efficiency, and to making long-lasting and superior quality items. But what is distinguishing is the quality of our ideas, in a continuous and widespread development that involves every aspect of company life: from design to production, from service to after sales care, from logistics to marketing, from dealer support to deliveries, every day and to all regions of the world. For Stefanplast quality is an attitude.

- **June 2010:** Stefanplast obtains the **ISO 9001** Certification, an international standard that guarantees a product development according to the guidelines defined by the Quality Management System;
- **June 2014:** the achievement of OHSAS 18001 Certification, became **ISO 45001** in 2020, an international Standard for Occupational Health and Safety Management.
- **September 2015:** Stefanplast obtains the **ISO 14001** Certification for the environmental protection and pollution prevention, achieved through a policy of restriction and control on the impact of our production activities for the environmental safeguard.
- **Since 2021:** Stefanplast has been progressively certifying its cardboard packaging with FSC certification.
- **Since 2024:**

ISO 9001  
ISO 14001  
ISO 45001  
BUREAU VERITAS  
Certification
