

ZERMATT

FLEXIBLE PACKAGING. MAKING FUTURE

SPECIALISTS IN ANIMAL NUTRITION PACKAGING

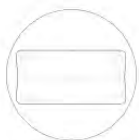

What we do? Petfood bags

Manufactured to maximise the use of space, they do not transmit odours and maintain the product in perfect condition ensuring its quality. They can be manufactured to be **resealable closure**, 100% **airtight** or **with handles** for ease of carrying.

SPECIALISTS IN ANIMAL NUTRITION PACKAGING

About us

We are a packaging manufacturer founded in 1970 in Madrid, with a very clear objective: **to be leaders in the market by providing flexibility in our services and innovation in our products.** Today we are a leader in the petfood bags market.

50

RECYCLED

Our value

We cover all the steps of the value chain:

- Coextrusion, MDO, printing, lamination, bag making, in order to provide our customers with a product of the highest quality.
- Coextrusion: 3 and 5 layers.
- Flexo HD technology (from 1 to 10 inks).
- Lamination with and without solvents.
- Packaging bags: from 1.5 to 20 Kg, multiple formats and accessories.

Sustainability and quality certifications

We innovate with the new MDO PE Film coextrusion line, manufacturing a material substituting current non-recyclable structures of bags/sacks with another mono-material one, which is easier to recycle: **Ready to Recycle.**

We are committed to a defined environmental policy:
(www.zermatt.es/sustainability).

We apply the assessment by Ecovadis and we are members of Ceflex, collaborating on European sustainable design standards.

Our markets

We supply **70** plants in Europe.
