PREMIUM AMMUNITION FOR PROFESSIONALS

SWISS P stands for excellence – our products are exceptional in quality, precision and performance. Our mission: We equip professionals with the best ammunition.

SWISS QUALITY. APPRECIATED WORLDWIDE.

We rely on leading ammunition technology. Every calibre, every cartridge is developed and manufactured to meet the highest quality standards.

Leading ammunition technology

Police units, armed forces, special units and marksmen world-wide need ammunition they can trust without compromises. That's why SWISS P goes beyond standard ammunition: Our premium products combine cutting-edge technology, highest precision and proven reliability.

Demanding standards for highest precision

Our sophisticated surface hardness testing procedure ensures that every component meets the demanding standards. Strict controls ensure that every part is optimally designed for highest precision.

Uncompromising reliable. Every time.

At SWISS P, highest quality is more than just a promise. It is part of every product – from development and production to service. So that professionals around the world can rely on our small-calibre ammunition – in all situations.

A ROUND FOR EVERY SCENARIO.

The best ammunition for the best: excellent in every respect and reliable in all situations.

DUTY

Reliable in all situations.

Premium ammunition for armed forces and law enforcement.

For professional use

Every mission is unique. That is why we not only offer standardized products, but also the right cartridge for every situation and every application. In addition, we are able to respond quickly and flexibly to individual customer requirements. This approach ensures that our operational and training ammunition is perfectly tailored to the specific requirements and preferences of our customers.

Reliable performance

Our cartridges are ballistically matched to each other and guarantee the same conditions for use and training. In this way, we ensure that the forces are optimally prepared for their missions through realistic training. Through continuous innovation and a deep understanding of the requirements in the field, we set new standards in terms of firepower and reliability.

Tried and tested since 1863

Since 1863, armed forces around the world have placed their trust in our ammunition. With its proven reliability, it is a decisive factor for mission success. Our customers also benefit from our unique knowledge and many years of experience, which makes us a strong and loyal partner.

SNIPER

Uncompromising precision and targeting effect.

Premium ammunition for snipers.

Highest precision

SWISS P sniper ammunition guarantees exceptional precision at extreme distances thanks to state-of-the-art technology and production. Our products are tested under a wide range of conditions at distances of up to 2000 meters. In this way, we ensure that no compromises are made even at critical moments.

Absolute performance

Developed for the best effect on target, our sniper ammunition offers superior performance under all operating conditions. It is the result of advanced research into bullet behavior in the microsecond range. Individual solutions for every deployment scenario maximize the effectiveness and safety of our customers and thus contribute to mission success.

Premium quality

Striving for the highest quality is firmly anchored in our corporate DNA and is reflected in our products. We are able to maintain the tightest tolerances in our production to ensure maximum lot-to-lot accuracy. In addition, we offer the ideal bullet for every scenario. The cartridges have an identical point of impact so that the shooter can react immediately to changing situations.

Sales brands

Some calibres and bullet types in our portfolio are manufactured in Germany, Hungary and Sweden. These high-quality products reflect the excellence of SWISS P and are distributed under three trusted brands: RWS, MFS and Norma.

RWS
Ignition Technology since 1886

norma

RWS (Germany)

MFS (Hungary)

Norma (Sweden)

SINTOX® – The essential choice for clean and reliable primers with the best technology

The most important argument for choosing a primer is its reliability. SwissP Defence has been addressing this issue since 1928 with the invention of the most reliable and corrosion-free SINOXID primer. Standard primers, however, contain lead styphenate which shooters can get exposed to during the firing process. This may lead to hazardous overexposures.

SINTOX® is a further development of the SINOXID technology and provides the same undisputed reliability, but doesn't use any heavy metals.

- Free of toxic heavy metals like barium
- No exposure of the shooter or shooting-range personnel to pollutants
- Absolute reliability and functional stability even under most extreme conditions
- Consistent ignition of the propellant over a wide temperature range, from –54 °C to 52 °C
- Optimum shelf life, even under critical storage conditions
- Extraordinary ignition sensitivity
- Will not corrode or erode the barrel
- Successfully used for more than 20 years
- Used with several NATO-qualified cartridges

NATO specifications are clearly surpassed

For NATO it is decisive to ensure that the member states can exchange ammunition which guarantees a minimum of reliability and constancy. While high demands are imposed on the ammunition, SwissP Defence always endeavours to clearly surpass the specified quality. To achieve this, the company relies on most modern production equipment and solid know-how accumulated over many years. Thanks to the high vertical integration and a very advanced Quality Management System these products set benchmarks when it comes to:

- Ballistic performances at severely fluctuating temperatures
- Stability in storage under extreme environmental conditions
- Precision and constant point of impact from lot to lot
- Penetration capacity
- Barrel strain
- Effect in soft targets in conformity with the laws of war

BEYOND STANDARDS. BUILT FOR EXCELLENCE.

At SWISS P, we don't just meet NATO standards – we exceed them. With cutting-edge technology and decades of expertise, we set new benchmarks in reliability, precision and durability.

Duty product overview

(Page 14–21)

For the needs of armed forces and law enforcement

FMJ		Training cartridge, specially suitable for outdoor shooting ranges
FMJ SX		FMJ cartridge for training and service especially suitable for indoor shooting ranges
NATO FMJ		FMJ cartridge according to NATO requirements
Frangible SX		Non-toxic cartridge for tactical training with reduced risk of ricochets
HP SX		Deformation cartridge with good terminal performance on soft targets
Styx Action		High-performance round for excellent stopping power due to immediate energy transfer
HC (SS109)		Steel core infantry round with a superior penetration power
AP TC		High-performance tungsten carbide core infantry round for maximum penetration
Tracer		Tracer with delayed ignition
Blank		Brass blank cartridge for safe simulation

Sniper product overview

(Page 22–27)

A round for any situation

Ball				the classic FMJ, designed for military use
Target				for match, training or operations
Styx Action				deformation bullet for stopping power on soft targets
Final SR				fragmentation bullet for transfer of maximum Energy
Armour Piercing				for hard targets
Armour Piercing Incendiary				hit, mark and penetrate
Tactical				for targets behind glass/ intermittent barriers
Subsonic				for suppressed shooting
Subsonic Final				to avoid over-penetration

Swiss quality. Appreciated worldwide.

Manufactured in Switzerland, under strict quality controls and with the highest precision. Every calibre, every cartridge is developed and manufactured to meet the highest standards of performance and reliability. SWISS P combines advanced technology with Swiss craftsmanship – ammunition that professionals around the world rely on.

Pistol and Submachine Gun Ammunition

9×19 Deformation Ammunition

Conventional full metal jacket bullets cannot optimally meet the requirements of today's service ammunition for Law Enforcement. Low energy transfer in the target medium means that they over-penetrate soft targets much too easily and thus endanger close bystanders. The increasing magnitude of violence in urban areas calls for ammunition which is able to stop offenders with effectiveness to ward off the danger and minimize the risk of unwanted consequences.

		Weight	Description	Bullet type	Average velocity	Term of reference	Brand	Primer	Lead free

Personal Defence Weapon Ammunition

4.6×30

The calibre 4.6 × 30 has been tailored to meet unique requirements of Police and Military Special Forces, combat-support soldiers and close personal protection. The system is light and compact enough to be carried on the body permanently, but also sufficiently accurate and powerful to enable effective action against unprotected and protected targets at an extended distance.

		Weight	Description	Bullet type	Average velocity	Term of reference	Brand	Primer	Lead free
FMJ SX		2.6 g / 40 gr	Duty ammunition for Army and Law Enforcement with good energy transfer in soft targets and an exceptionally good precision up to 200 m	FMJ	620 m/s *	C.I.P.			
ACTION SX		2.0 g / 31 gr	The deformation bullet offers fast energy deposit in soft targets and a good penetration capability in hard and combined targets	SHP	690 m/s *	C.I.P.			
AP SX		2.0 g / 31 gr	This lead free cartridge offers an exceptional penetration capability. The bullet penetrates the NATO CRISAT target from distances up to 200 m	Solid	680 m/s *	M-CMOPI			
Subsonic SX		5.0 g / 77 gr	The bullet is made from Tungsten-Carbide and polymer, is completely lead-free, and has no jacket	Solid	290 m/s *	C.I.P.			
Training SX		1.7 g / 26 gr	The Training SX with lead free semi-jacketed tin bullet is "non-destructive" to steel targets. It can even be used as service ammunition in sensitive areas	JSC	660 m/s *	C.I.P.			
Frangible SJ SX		1.7 g / 26 gr	The Frangible SX is particularly suitable for tactical CQB/MOUT training, as the teams can train safely and effectively with maximum realism	SJ Frangible	700 m/s *	C.I.P.			

* 180 mm barrel

Ammunition for Armed Forces

5.56×45

This ammunition for assault rifles and light machine guns provides an above-average hit accuracy and reliability. Its performance in action has been confirmed by numerous Armed Forces. SwissP Defence's long experience in the production of top-quality Swiss ordnance ammunition plays a fundamental role in the development of all products.

		Weight	Description	Bullet type	BC G1	Average velocity	Term of reference	Brand	Primer
FMJ (M193)		3.6 g / 55 gr	Proven and widely used infantry round	FMJ	0.347	983 m/s *	M-CMOPI		
FMJ SX (M193)		 3.6 g / 55 gr	Proven and widely used infantry round	TFMJ	0.347	983 m/s *	M-CMOPI		
FMJ HA		 4.1 g / 63 gr	High-quality infantry round with a steel jacket and rear cover	TFMJ	0.345	900 m/s *	M-CMOPI		
Styx Action		4.5 g / 69 gr	High-performance round for excellent stopping power due to instantaneous energy deposition on soft targets	HPBT	0.314	870 m/s *	M-CMOPI

AP TC		  4.1 g / 63 gr	High-performance tungsten carbide core infantry round for maximum penetrating power	AP	0.342	900 m/s *	M-CMOPI		
NATO Tracer		 4.1 g / 63 gr	Tracer (red) with delayed ignition	Tracer	0.367	890 m/s *	M-CMOPI		
IR Tracer		 4.1 g / 63 gr	IR Tracer (purple) with delayed ignition	IR Tracer	–	890 m/s *	M-CMOPI		

* 510 mm barrel

5.56×45 Lead free

In the development of lead free ammunition the challenge is to substitute the lead without reducing the performance or to even increase it if possible. Also decisive for a good, reliable and powerful ammunition without lead are the harmful substances which are emitted on firing and can form deposits in the barrel and weapon system. One prerequisite, therefore, is that the propellant and the ignition charge are also optimally matched to the bullet.

		Weight	Description	Bullet type	BC G1	Average velocity	Term of reference	Brand	Primer	Lead free
LF Styx Action		3.7 g / 57 gr	Lead free round for excellent stopping power due to instantaneous energy deposition on soft targets	SHP	–	920 m/s *	M-CMOPI			
Frangible SJ SX		4.0 g / 62 gr	The frangible bullet is made from sintered copper, is completely lead-free and fully recycable	SJ Frangible	0.200	795 m/s *	M-CMOPI			
Frangible SX		2.9 g / 45 gr	The bullet is made from copper and polymer by injection moulding. The shooting distance can be reduced without risking being hit by backsplashes or ricochets.	Frangible	0.097	975 m/s *	M-CMOPI			

* 510 mm barrel

7.62×35/.300 BLK

By definition the calibre .300 BLK is particularly well suited for subsonic shooting. The optimized propellant chamber provides a constant pressure development which ensures the highest first-shot hit probability.

Safe Combat Simulation

Blank

In training on the machine gun and assault rifle, numerous Armed Forces have been relying for years on the combat simulation with blank cartridges as an important part of a soldier's basic training. While blank cartridges of plastic convince above all by their low weight, the ones of brass stand up particularly well to strains.

		Description	Brand	Primer	Lead free

Precision for Tactical Excellence

6.5 Creedmoor

The 6.5 Creedmoor calibre has earned a strong reputation among marksmen and tactical operators for its exceptional accuracy and versatility. Designed for medium to long range engagements, it combines low recoil with high ballistic efficiency, making it an excellent choice for both military and law enforcement applications. SWISS P offers specialised cartridges in 6.5 Creedmoor, each designed for superior performance in demanding scenarios.

Versatility and Precision

.308 Win.

The calibre .308 Win. is extremely widespread among authority and military forces. In no other calibre has SWISS P such a varied product spectrum for snipers, security shooters and designated marksmen. The right tool exists for each highly special intervention. A particularly positive aspect is the interchangeability of different cartridges without need to adjust the optics, but a constant point of impact. This is referred to as coordinated ballistics enabling an enormous flexibility in action.

Maximum Impact at Extreme Distances

.338 Lapua Mag.

The calibre .338 Lapua Mag. is very popular with long-distance shooters and widely used especially in the military sector. The relatively compact and handy weapon system enables effective operative ranges of more than one and a half kilometres under optimal conditions. The bullet remains stable over a long distance in the supersonic range and brings accordingly much energy precisely into the target. To be able to avert particular danger situations SWISS P offers various special bullets which are closely matched to each other. Be it for the penetration of light armour, precision shots through glass panels or a minimized danger for the background, the shooters can choose from well thought-out and extensively proven solutions within the framework of the SWISS P line.

		Weight	Description	Bullet type	BC G1	Muzzle velocity	Term of reference	Brand	Primer

Extended Range with Superior Accuracy

.375 SWISS P

The new .375 SWISS P long-distance ammunition has been especially developed for the requirements of operational precision shooters. The new calibre is suitable for highly demanding situations and markedly increases the operational spectrum of the proven .338 weapons system. .375 SWISS P calibre projectile types can reach distances of up to 1,600 m supersonic, which equates to an increase in operational range of more than 25 percent when compared to the .338 LM (250 gr). This helps you to extend the time window for infiltration and exfiltration, and with it, increase your own protection.

		Weight	Description	Bullet type	BC G1	Muzzle velocity	Term of reference	Brand	Primer
Ball		22.7 g / 350 gr	Highly accurate full metal jacket round for military training and duty	FMJ	0.801	860 m/s *	C.I.P.		
AP		22.3 g / 343 gr	High-performance round for maximum penetration power on hard targets	AP	–	–	C.I.P.		

* 762 mm barrel

.375 SWISS P – Your tactical advantage

The new .375 SWISS P allows discerning professionals and forwardthinking organisations to build a firm foundation for mission success:

- Cost-efficient upgrade for .338 weapons systems
- Expanded operational spectrum (up to 1,600m supersonic flight)
- Increased projectile weight maximises precision and provides reliable, consistent shooting performance
- Significantly greater target energy and increased penetration power when compared to .338
- The new weapon system: more capable than .338 and lighter than .50

With the new calibre, professionals and appropriate organisations are perfectly equipped for the widest variety of missions. The cost-effective weapons system guarantees absolute functionality and performance reliability – even under extreme conditions. During operations, both mobility and personal protection are increased, along with the window of opportunity for infiltration and exfiltration.

Extreme Power with Ultimate Precision

.50 Browning

The well-proven NATO calibre 12.7 × 99 for heavy machine guns as well as sniper rifles enables operative ranges which clearly exceed those achieved with conventional rifle calibres. SWISS P ammunition is characterized by its outstanding precision and reliability under extreme conditions. Moreover, the entirely lead free cartridges are equipped with low-pollution SINTOX® ignition elements.

		Weight	Description	Bullet type	BC G1	Muzzle velocity	Term of reference	Brand	Primer	Lead free
Training SX		41.7 g / 644 gr	Target-friendly soft core round with good precision and suitable for training purposes	JSC	0.698	890 m/s *	M-CMOPI			
HC SX		47.5 g / 748 gr	Hard-core round with excellent penetrating power and precision	JHC	0.779	880 m/s *	M-CMOPI			
AP SX		43.5 g / 671 gr	High-performance round for maximum penetration power on hard targets	AP	–	915 m/s *	M-CMOPI			
API SX		44.5 g / 687 gr	The tungsten carbide core provides maximum penetration power, while the titanium tip provides incendiary marking	API	0.754	915 m/s *	M-CMOPI			

* 1'143 mm barrel

About Beretta Defense Technologies

Beretta Defense Technologies is the strategic alliance of Beretta Holding companies that supply services and products to Military and Law Enforcement operators around the world. These companies are globally renowned for decades of expertise and leadership in their respective fields, state of the art machinery and extensive R&D capabilities.

Building on our unparalleled expertise and long track record, we are also able to provide customised, integrated system solutions. In addition to ammunition, we can supply firearms, optical devices, lasers and suppressors.

For more information, please visit berettadefensetechnologies.com
