

Tecno Fluss is specialized in the manufacturing of semi-automatic dosing machines. Compact, flexible and customized solutions for filling **liquid, semi-liquid, dense and doughy products**.

Dosing groups mod. GD and GDV, multi-nozzles units for integration on **packaging and thermoforming lines**.

Calybra linear filling machine is equipped with mass or magnetic flowmeters, from a minimum of 1 to a maximum of 12 filling heads, suitable for different sectors: food, chemical, cosmetics, home and personal care. Output from 1.500 to 9.000 pcs/h.

Capping machines series Platynum are suitable to process all type of caps, namely: screw and press-on, twist-off, flip-top with a speed from 2.800 pcs/h up to 15.000 pcs/h with screw-on cap.

Tecno Fluss designs complete filling and capping lines to reach the maximum efficiency with several formats of container and cap. The machine can be supplied in **ATEX** and **anti-corrosion** version.

Multiformats filling and capping monoblocks with quick size changeover. Output from 1.500 to 3.000 pcs/h.

Tecno Fluss is specialized in the manufacturing of filling and capping monoblocks for liquid, semi-liquid, dense and doughy products. High speed productions from 6.000 to 18.000 pcs/h.

Tecno Fluss designs and manufactures dosing machines and complete packaging lines for **cosmetic, pharmaceutical, food and nutraceutical, chemical** and **home care** industries.
