

Farleygreene at POWTECH Technopharm 2025: Innovation in Every Detail

Hall 9 | Stand 9-426 | Nuremberg, 23–25 September 2025. Join Farleygreene at POWTECH Technopharm 2025 to see our latest sieving innovations, live demos, and meet our expert team.

This September, **Farleygreene** returns to the exhibition floor for the first time since 2019—bringing with us a bold showcase of innovation, engineering excellence, and customer-focused design.

At **POWTECH Technopharm 2025**, we'll be unveiling our latest advancements in **industrial sieving equipment**, demonstrating cutting-edge technologies, and highlighting the service and support that have always set us apart.

This is more than just a product showcase—it's a reflection of our ongoing commitment to delivering smarter, cleaner, and more efficient solutions for our customers.

What You'll See on Our Stand

At **Hall 9, Stand 9-426**, we'll be featuring a full lineup of new and updated equipment, including:

- **The new [Sievmaster® Slimline 1250 Pressure Sieve](#)** – Now with enhanced hygienic design featuring an overhanging body for superior contamination control.
- **The Gallery Lifter** – A game-changing solution that allows a single-operator access the sieve's mesh screen, improving safety and reducing downtime.
- **The Easilift LDEE with redesigned hood** – Featuring fewer welds, a removable gasket, and improved sealing for faster, more hygienic maintenance.
- **The Sievmaster® Slimline 950 with [BOSC](#) and [DOSC](#) technology** – Our latest innovation in oversize control, improving sieving efficiency and product throughput.
- **The [Rota 180 Centrifugal Sieve](#)** – A high-capacity, non-vibratory sifter that uses rotating paddles to efficiently separate fine and coarse material—ideal for bulk check screening and deagglomerating wet or dry products.

We'll be running **live demonstrations** of our **BOSC and DOSC technology** and the **Gallery Lifter** throughout the show—giving you a hands-on look at how our equipment is engineered for real-world performance.

Why Visit Farleygreene?

In a hall full of competitors, we know you have choices. But here's why **Farleygreene** should be your first stop:

- **We innovate with purpose** – Every product we design is built around real customer needs, grounded in long-term value.
- **We lead in hygiene and compliance** – Our equipment is engineered to meet the highest standards in pharmaceutical, food, and chemical manufacturing.
- **We deliver consistent, expert support** – From initial consultation to after-sales care, our team is with you every step of the way.

- **We outperform the rest** – Our customers consistently tell us our products are more reliable, easier to maintain, and better supported than anything else on the market.

After-Sales Support and Re-Mesh Services

We'll also be promoting our **re-mesh service**, available to both **Farleygreene customers and users of competitor equipment**. Whether you need to re-mesh an existing screen or want to keep a spare in stock to avoid costly downtime, our team can help.

 **Did you know?** A single day of downtime can cost thousands. Keeping a spare mesh in stock is a simple way to protect your productivity.

Meet the Team

Joining us on the stand will be:

- **Nick, Daniel, and Rehan** from our Sales Team
- **Jacob**, our Senior Engineer
- Plus, several of our **European distributors**, ready to meet with customers and discuss local support options.

Whether you're an existing customer or exploring new solutions, we'd love to meet you and show you what makes Farleygreene different.

Hall 9 | Stand 9-426 | 23–25 September | Nuremberg

Body:

We're back—and bringing innovation with us.

Join Farleygreene at POWTECH Technopharm 2025 for our first exhibition since 2019. We're showcasing a powerful lineup of new and updated sieving solutions, live demos, and expert support—all designed to help you improve hygiene, efficiency, and performance on your production line.

 On the stand:

- New Sievmaster® Slimline 1250 Pressure Sieve
- Gallery Lifter – safer, single-operator access
- Easilift LDEE with redesigned ESL hood
- Sievmaster® Slimline 950 with BOSC & DOSC technology
- Rota 180 Centrifugal Sieve
- Live demos of BOSC/DOSC and the Gallery Lifter

 Meet the team:

Nick, Daniel, Rehan, and Jacob (Senior Engineer) will be on hand, along with our European distributors, to answer questions and explore how we can support your business.

 Plus: After-Sales Support & Re-Mesh Service

We'll also be promoting our re-mesh service—available to both Farleygreene and competitor customers. Avoid costly downtime by keeping a spare mesh in stock.
