

Spider Rappel Plate Carrier SRPC02

The Spider Rappel Plate Carrier is a premier armor chassis purpose-built for specialized vertical access and breaching operations. Engineered with a patented architecture, it delivers zero-interference integration with full-body harnesses, ensuring operators retain unhindered biomechanical mobility and unobstructed payload deployment during high-stakes maneuvers.

Built for unparalleled scalability, this modular platform rapidly transitions from an ultra-lightweight patrol profile to a high-threat assault configuration. Equipped with a versatile four-point Quick-Detach (QD) hardware interface and a dual-zipper rear matrix for ABT ecosystem back-panels, the Spider provides a highly adaptive architecture tailored to the rigorous tactical protocols of elite operators.

- **Patented Vertical Integration:** Proprietary architecture ensures zero-interference with full-body harnesses, maximizing unhindered mobility during high-angle maneuvers.
- **Scalable Threat Protection:** Full ecosystem interoperability with neck, extremity, and groin ballistic modules, complemented by modular 3" or 5" armored cummerbunds.
- **Dynamic Hardware Interface:** Effortlessly hot-swap between modular QD buckles and slick hook-and-loop configurations, supporting fully adjustable frontal placards.
- **Maritime Titanium Hardware:** High-tensile titanium G-hooks completely eradicate corrosion, delivering uncompromising performance in extreme high-salinity environments.
- **Dual-Rear & Assault Pack Docking:** Features a hybrid MOLLE/dual-zipper interface for back panels, plus integrated shoulder anchors for instant assault pack deployment.
- **Snag-Free Comms Management:** Precision routing channels provide secure, organized cable retention for all operational comms devices.
- **Thermal & Kinetic Mitigation:** Ventilated conformal interior panels maximize airflow and thermal dissipation while buffering kinetic impact under maximum loadouts.

Technical Highlights

Full-Body Harness Compatible

3-Inch Tegriscummerbund

5-Inch Cummerbund

Modular Hardware Options

Front Placard: Titanium G-Hook or Buckle Interface

Rear Zip-on Panel Ready

Ventilated Interior Padding

Shoulder Pack Attachment Point

Cable Management System
