

# De BeleefTV

De BeleefTV is a large, digital activity table, specially designed for (elderly) people who suffer from dementia and/or other disabilities. De BeleefTV gives access to games, music, speech exercises and videos, which have been developed to activate the brain and stimulate social interaction & movement.

- *Interactive*
- *Mobile*
- *Multifunctional*

- *Tiltable*
- *Adjustable height*
- *Specially developed for and by healthcare*

## De BeleefTV Senior

De BeleefTV Senior is specially developed for elderly people with dementia and ensures valuable daytime activities that guarantee fun and positive brain stimulation.

The various games challenge clients both mentally and physically. Lack of activities and stimulations aggravates the process in various forms of dementia. With its wide and varying range of activities, De BeleefTV has found the solution to the lack of brain activity for people with dementia. Think, for example, of a jukebox with music, images from the residents' childhood or a proverb game. In addition, De BeleefTV provides cheerfulness, sociability and connection.

## De BeleefTV Smile

De BeleefTV Smile stands for experience-orientated care with a smile. Participation is more important than winning. And everyone can join in!

De BeleefTV Smile has been specially developed for people with mental disabilities. De BeleefTV has been developed so that everyone can use it. Regardless of the age or ability of the resident or client. The activities on De BeleefTV contribute to activating and stimulating the clients and residents. Almost all games can be played in groups or individually. This means that there is a tailor-made solution for every situation. The games invite conversation, are instructive and stimulate motor skills.

# What customers say about De BeleefTV

## De Zorggroep ★★★★★

"When I enter the room where De BeleefTV is located, I often see people playing on De BeleefTV. Sometimes these are small children with grandpa or grandma and sometimes just together with mum or dad. What touches me most are the visits of people suffering from dementia. Watching them play with De BeleefTV and seeing how much fun they have, I enjoy that immensely. The interactivity invites movement and takes people for a moment out of their own world into the present. De BeleefTV makes people smile!"

Gerard van Glabbeek  
Innovation advisor De Zorggroep

## Joachim en Anna ★★★★★

"We experience a lot of happy moments. Doing play activities with residents one-on-one or in groups. Listening to music. Looking back at the holiday destinations of the residents. Using De BeleefTV, conversations are started in the group. This allows you to get to know the resident better. You can't wish for a nicer purchase!"

Marie José van Duijnhoven  
Centre of expertise Joachim en Anna

## Vredewold ★★★★★

"The beauty of De BeleefTV is that it can be a group event, but you can also use it individually or as a family. Taking a moment to do a puzzle together in the room, play '4-in-a-Row' or look at old photographs. Just that 1-on-1 attention. For us, the [trial] week was far too short and we would love to have De BeleefTV in our home, so that everyone can enjoy this beautiful piece of old in a new jacket. Basically, everything was to the liking of De BeleefTV."

Aafke Stellema  
team C Vredewold

## University Hospital Brussels ★★★★★

"We were amazed at how quickly our patients got underway with the touch-screen system that allowed several patients to work on one screen at the same time. The different types of applications offered by De BeleefTV allowed us to reach and excite the patients in a new way. Patients and other colleagues asked us on a daily basis when the BeleefTV would be coming out again."

Julie Van Caubenberghe  
University Hospital Brussels

# Software

De BeleafTV can be completely self-customised, which allows the device to fit your needs and wishes perfectly. There currently are 18 software menus available. With a total of over 200 games, De BeleafTV has the most extensive range of games of any comparable product on the market. In addition, close cooperation with various healthcare institutions, for both dementia and mental disabilities, gives us the opportunity for continuous development. In this way, we can guarantee that at least two completely new menus are developed every year.

# Free online demonstration

To get a good impression of the possibilities of De BeleefTV, it is possible to see it for yourself during a private, online demonstration. This demonstration is 100% free of charge, 100% free of obligation and without any strings attached. During this online session, you can get a personal insight of all the features De BeleefTV has to offer and discover how it provides the challenging daytime activities your residents/clients need.

Interested in a demonstration? Send us an e-mail or scan the QR code →

## How does the online demonstration work?

When you request a online demonstration, we will look for a suitable date together. Once the demonstration has been scheduled, the countdown can begin!

At the start of the online session, we give a short demonstration of about 15-30 minutes. All aspects of De BeleefTV will be addressed during this demonstration, with the main focus on how it would suit your target group.

Following the demonstration, there will be considerable time to answer your personal questions. Are you curious about a particular part of the software, or do you have a specific question regarding your residents/clients? We will be happy to show you!

Convinced on the added value of De BeleefTV? Ask us for all the possibilities to acquire your own BeleefTV and start providing your residents/clients the challenging daytime activities they deserve!

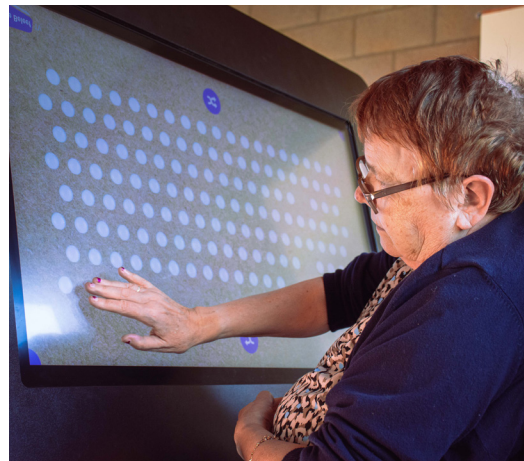

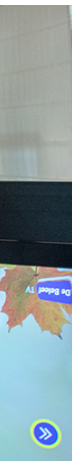

# Pricing

The price strongly depends on the desired composition. De BeleefTV delivers customised solutions and is put together according to each individual's needs and wishes. In order to determine the preferences of each target group, you are advised to first take part in a free of charge, no-obligation trial week with De BeleefTV. The trial week will give you a clear impression of all the possibilities and a tailor-made offer can be provided afterwards.

- Brings joy and fun
- Encourages social interaction
- Breaks apathy
- Valuable daytime activities
- Trains fine motor skills
- Reduces misunderstood behaviour

# Scientific research

Over the years, there have been several (external) studies on the effect of The BeleefTV on people with dementia and/or mental disabilities. The BeleefTV has been proven to be an effective tool within elderly- and disabled healthcare and actually improves the quality of life of residents in nursing homes.

## De BeleefTV makes people happy!

"85% of the clients show positive emotions when using De BeleefTV. Positive emotions can be seen in happiness, positive surprise and proud behaviour. There is a noticeable difference in the expression of happiness when De BeleefTV is used in groups. From this we can conclude that De BeleefTV also contributes to the positive atmosphere in your carehome."

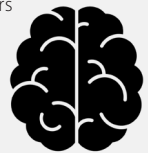

## De BeleefTV breaks through (temporarily) apathetic behaviour!

"De BeleefTV contributes in a positive way to behavioural changes of clients with dementia. 79% of the clients show more active behaviour when using De BeleefTV. Research has shown that De BeleefTV triggers both positive and negative emotional affects. These are emotions that are normally reduced by apathetic behaviour. The use of De BeleefTV made these emotions visible."

## De BeleefTV activates and stimulates!

"Many people who suffer from dementia worsen due to a lack of activity. De BeleefTV offers interactive applications that both stimulate the brain and train the motor skills. Many care homes mention the participation of clients who would otherwise never take part in any type of activity. De BeleefTV is welcoming, arouses curiosity and has applications for every level of your care facility. This varies from conversations about the past to basic stimulation that brings a smile to the resident's face. "I'm here, look what I'm doing - I can reach for stars and butterflies follow my hand". It makes the client proud, which motivates him/her to use De BeleefTV more often."

## Get to know clients better with the BeleefTV!

"De BeleefTV contributes significantly to the connection between care workers and clients. Because of the visual and auditory content of De BeleefTV, the majority of the clients take more initiative to start a conversation based on their interests. Care workers mention that they even discover new interests of clients by using De BeleefTV."
