## COMPANY PROFILE

### About Yousee ▶▶▶

Founded in 2008, Shenzhen Yousee Technology Co., Ltd. is a professional manufacturer of display and touch solutions, specializing in TFT-LCD and OLED displays, touch panels, and integrated display solutions.

With state-of-the-art facilities and advanced production lines, we produce up to 800,000 display modules and 650,000 touch panels per month, ensuring consistent quality, reliable supply, and on-time delivery to customers worldwide.

### Quality You Can Trust

At Yousee, quality comes first.

We are certified to ISO 9001, ISO 14001, GJB 9001C, and IATF 16949, reflecting our commitment to rigorous quality control, sustainable manufacturing, and continuous improvement.

Guided by “Quality First, Customer First,” we deliver products that consistently meet and exceed customer expectations in performance, reliability, and durability.

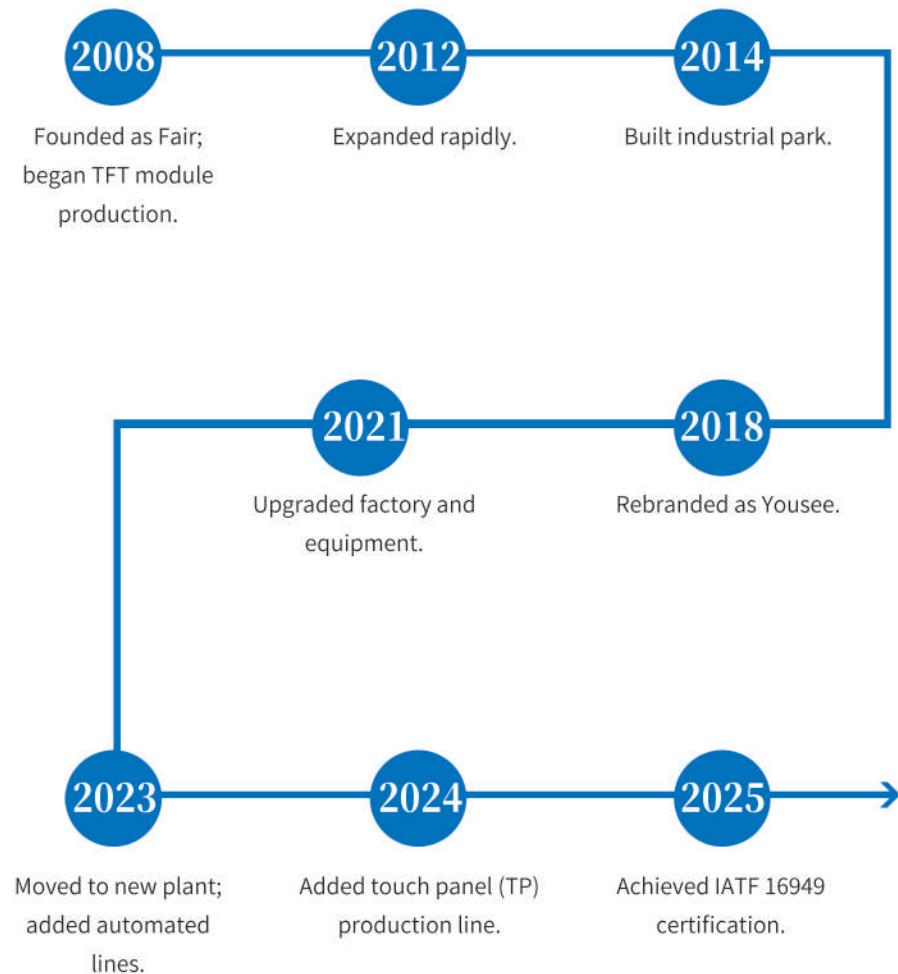

### Innovation and Flexibility

Driven by a highly experienced R&D team, Yousee provides flexible customization and end-to-end display solutions tailored to diverse applications — including consumer electronics, industrial control, automotive systems, military equipment, and other specialized sectors. We combine technical expertise with innovative design to deliver smart, reliable, and customized display experiences.

## ● QSPI COF interface solutions – for seamless system integration

Yousee's QSPI COF reduces pins and wiring for simpler assembly, compact designs, and reliable performance. Perfect for seamless integration into your products, speeding up development and improving system reliability.

## ● EMI-shielded designs – Stable performance. Zero interference.

Yousee's EMI-shielded displays minimize electromagnetic interference, ensuring reliable operation, smooth performance, and enhanced system stability—perfect for industrial, automotive, and military applications.

## ● High-color-gamut display – delivering vibrant and accurate visuals

Yousee's high-color-gamut displays deliver rich, true-to-life colors, ensuring eye-catching visuals and an immersive user experience—ideal for fields with high color-accuracy requirements.

Original

Level up

## Thermally 3D bent cover glass – sleek, durable, and premium design

Yousee's 3D bent cover glass offers smooth curves, robust protection, and a premium look, enhancing both device aesthetics and user experience.

## Display solution ▶▶▶

Yousee's integrated display solutions help customers accelerate product development, shorten development cycles, and save costs, while ensuring system stability and high-quality display performance. Each solution is carefully engineered for ready-to-use integration, stable performance, and outstanding user experience, providing customers with a complete, one-stop display solution.

## HDMI Display Solution – plug-and-play HD video for easy multimedia use

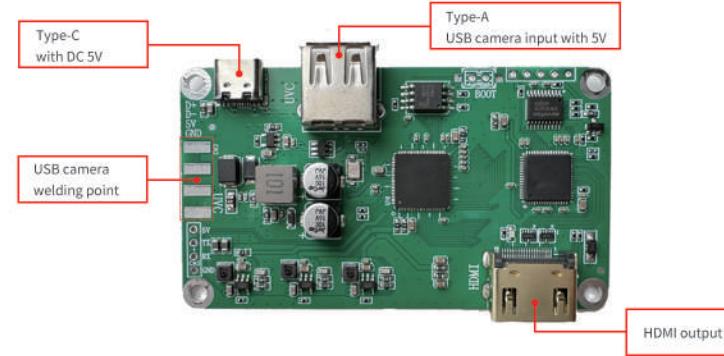

Yousee's HDMI adapter converts HDMI signals to MIPI, RGB, LVDS, and other display interfaces, delivering easy, compatible integration across smart terminals, industrial control, HMI, educational, and multimedia devices.

## UVC Camera Driver Solutions – optimized support for USB camera applications

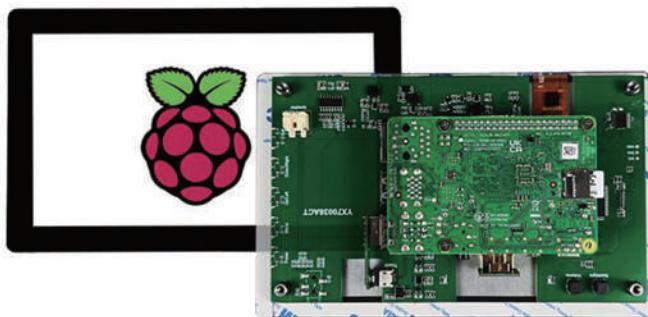

The UVC (USB Video Class) camera driver is a video device standard based on the USB protocol, supporting multi-platform plug-and-play without the need for additional driver installation. Through this standard, users can quickly enable camera functionality on systems like Windows, Linux, and Android, significantly reducing system compatibility risks and development complexity.

## ● Raspberry Pi Display Solutions – seamless integration with Raspberry Pi platforms

Yousee's Raspberry Pi driver solution enables easy connection to larger, higher-resolution displays via various LCD interfaces, supporting DIY projects, industrial panels, smart home devices, and multimedia terminals for richer, high-quality visuals.

## ● LED Backlight Constant Current Board – uniform and efficient backlight control

Yousee's LED backlight constant current board delivers precise and stable current to LED backlights, ensuring uniform brightness, long lifespan, and energy-efficient operation. This solution is ideal for industrial displays, automotive panels, smart terminals, and multimedia devices, providing consistent, high-quality backlighting for any application.

## ● CUSTOMIZATION SERVICE

Yousee is more than a display manufacturer — we are your end-to-end solution partner. From concept to mass production, we provide product development, engineering design, and turnkey OEM/ODM services. Our experts support prototyping, design, testing, and manufacturing, delivering tailored display and touch solutions that empower your product to succeed.
