

## Press Release

### Bambusbasis at GaLaBau 2024 with the new Modul5 Slimline Fence Series

**Cologne/Nuremberg, July 26, 2024** – Bambusbasis, known for its high-quality bamboo and stainless steel fencing and privacy solutions, is unveiling its latest product innovation at GaLaBau 2024: the Modul5 Slimline Series.

#### Tradition Meets Modernity in Fence Construction

Bambusbasis combines traditional craftsmanship with modern materials in its Modul5 fence model, now offering an elegant solution for contemporary garden and landscape design. The Slimline variant enhances the proven Modul5 system with a slim, delicate design that is both robust and aesthetically pleasing.

The Slimline series includes well-known materials such as Corten steel and stainless steel, as well as powder-coated frame modules. The finer bamboo rods and slimmer frames give this variant a light, almost floating appearance that blends harmoniously into any modern garden landscape. Despite the elegant design, the stability of the Modul5 products is fully maintained, making the Slimline series a perfect combination of form and function.

Each Modul5 Slimline fence is custom-made to the customer's individual dimensions, allowing precise adjustments in height and width. The bamboo can be flexibly replaced if necessary without renewing the entire system. These custom solutions guarantee high flexibility and adaptability for various garden and landscape projects.

#### Exclusive Introductory Discount

To mark the start of the GaLaBau trade fair, Bambusbasis is offering an exclusive introductory discount of 10 percent on all orders of the Modul5 Slimline series from September 11 to October 11, 2024, in addition to existing reseller discounts.

#### Meet Us at GaLaBau 2024

We invite all interested parties to discover the new Modul5 Slimline series at our booth at GaLaBau in Nuremberg. Visit us in Hall 4, Stand 4-124, and be convinced by the quality and advantages of our products.

#### About Bambusbasis

Bambusbasis offers custom-made fence and privacy solutions made from sustainable bamboo and robust stainless steel, placing great emphasis on social responsibility and sustainability. For over 15 years, the company has been setting new standards in the use of the rapidly renewable resource bamboo with its Modul5 system. Production takes place in the Cologne manufactory, where bamboo from Java and stainless steel from local suppliers are processed. Bambusbasis continuously evolves to provide innovative and sustainable solutions for its customers.
