MAKE MORE HAPPY FISH

**PRESENTING
THE HAPPY FISH
TO THE WORLD**

**BECAUSE WE BELIEVE
HAPPY FISH MEANS
HAPPY PEOPLE.**

Embarking on a whimsical journey and spread
smiles across the vast expanse of the world.

WHO WE ARE

Aquazone Indonesia was first established in 1996. We started the business in our own house with only a few self-made aquarium. Cichlid breeding was our first interest which brought us into becoming a worldwide fish breeder specialist. In 2006 we officially open our very first export division to handle international clients and become one of the leading breeder and exporter of wide varieties of Freshwater Ornamental Fish.

Right now we breed more than 500 varieties freshwater ornamental fish in our High Tech Friendly Environment system with more than 3,000 fish tanks in our farms and proudly serve clients in more than 50 countries worldwide.

VISION

To be one of the **Best Provider of the High Quality Tropical Fish** in the world with a prompt response to customer's inquiries and also a competitive price selling.

MISSION

Build a good and wide networks with suppliers and customers.

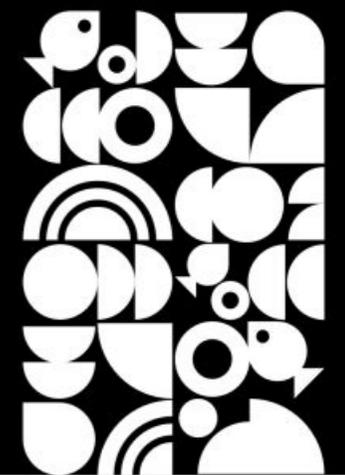

Add more new varieties breed items from time to time.

Applied new, innovative, and updated system and technology (water system, acclimatization system, packing system).

Send a high quality and healthy fishes.

Applied **BIO-SECURITY** system consistently.

Creating a solid and professional team.

KNOWING YOU KNOWING FISH KNOWING COMFORT

as our tag line, shows that we are delivering wide varieties of Live Tropical Fish with a stringent standard to ensure our customers receive a good quality shipment and reach the great level of customer satisfaction.

So just sit & relax, and we'll take care of your fish delivery.

BREEDING

We always have personal interest in Cichlid. Cichlid breeding is easy with some Cichlids and difficult with others, but this is made easier as we have a great interest in it, specifically in African Cichlid Lake Tanganyika. Time and efforts has been spent for our research and experiment to have a good production of these kinds of fishes.

After many years, we have been expanding our breeding division, and breeds **more than 500 varieties freshwater ornamental fish** in order to fulfill our customers' requests. Our newly developed high tech environment friendly farm is ready to serve freshwater ornamental fish in **more than 3,000 fish tanks**.

We never stop innovating and learning since we're not only breeding fishes but we aim to breed **"Happy Fishes"**.

IN-HOUSE

The In-House facility with **1,800 tanks**, are established to make a full control of all the incoming fishes into our facility. With the bio-security standard quarantine, includes the good treatment on the food and medication, within 7-14 days we will have the fishes leaving the facility in the best condition.

**SAVE FISH, SAVE LIFE.
WE PACK IN WHOLE LOT
ENVIRONMENTALLY
FRIENDLY WAY.**

EXPORTS

As an exporter, our relationships with other breeders ensure us to fulfill our customers' expectation. As our aim and objective is to reach a high level of customer satisfaction by maintaining the satisfying order fulfillment level. Hence, we have our Quarantine Facilities, where we can assess every new incoming fishes from our own breeding farm and also from other breeders, to meet our quality standards.

We normally take orders from customers within 10 to 14 days ahead the delivery date. Within the period of time, we do the collection and assess the items will be sent. Then, we practice "Quarantine Period" in our tank to ensure the fishes conditions are in a good health.

We have served and covered all 5 continents in the world where customers receive our fishes, and we hope many more to serve.

CONSERVATION

Knowing the fact that fish in aquariums can live longer than in the wild, tropical fish keeping as a hobby can be a wonderful way to appreciate the fascinating creatures that live beneath the water. **AQUAZONE INDONESIA** also takes role to ensure that our tropical fish keeping practice are **sustainable and responsible fish trading.**

For the wild caught tropical fish, we againts the fish obtained by the destructive methods with chemical and poison, and we educate the fishermen to harvest the fish **sustainably.** Fish welfare is very important for us. Fish are collected with the sole aim of keeping them alive.

The ornamental fish trade can be a sustainable industry that can support the livelihood of indigenous coastal communities as long as the destructive practise are stopped and fishermen are educated on ways to harvest tropical fish sustainably.

WE ARE THE HAPPY TEAM

Aquazone Indonesia proudly present the THREE main teams in the company, The Breeding Team, The In-House Team, and The Export Team.

The Breeding Team

is the team who actively focus in the breeding and productions. We started with Cichlids breeding in 1996, but now we have many more items and also imported items to breed in order to have more varieties.

The In-House Team

is the team who make sure the incoming fishes are well treated and quarantined. And also the outgoing fishes are healthy and meet our standards.

The Export Team

is the team who make sure all the export procedures are met and the customer satisfaction are highly fulfilled.

The three teams are working hand in hand to create a high satisfaction of customers.

**HAPPINESS IS JUST
AROUND THE CORNER
OF THE TANK.**
