AllviGuard

Felizone

- ♥ Cat Pheromone Diffuser
- ♥ Cat Pheromone Spray

Felizone , comfort your kitty!

Product information:

For cats with stress reactions and emotional problems caused by changes in the environment and other factors.

Cat pheromone analogs replicate the essence of natural cat pheromones, such as feline facial pheromones (FFP, including F3, F4), and feline appeasing pheromone (FAP).

Cats detect these pheromones through the nasal plough - a specialized sensory organ that triggers a series of physiological and psychological responses, thus helping to stabilize the cat's mood, reduce the stress response, and alleviate the cat's hostility, tension and anxiety.

Allvita

Felizone Diffuser Cat Pheromone Diffuser

Pheromone analog (F3)
48 mL per bottle with electrical plug

1. Plug into a standard electrical outlet in a vertical position where the cat spends the most time;
2. Ensure a space of at least 1.2 meters above the diffuser, covering an area of up to 70 square meters;
3. Use consistently and replace the refill every 30 days and the plug every 6 months.

Why to choose?

- Resistance to stress and emotional calming
- Plugs according to regional voltage requirements
- Suitable for all ages

Felizone Spray Cat Pheromone Spray

Pheromone analog (F3)
30 mL per bottle

1. Spray 15 minutes in advance on air, cat cages, litter boxes, pee pads and other items easily accessible to cats;
2. 1-2 sprays per single item, once a day, repeat every 4-5 hours if necessary.

Why to choose?

- Resistance to stress and emotional calming
- 30 mL capacity, 800+ sprays
- Suitable for all ages

Dr. TEST

♥ Hematuria/Blood Detector

♥ pH Detector

Catch Health Changes Early

Product information:

Hematuria/Blood Detector is used for early detection of blood in urine and occult blood in urine and monitoring of urinary problems in cats.

pH Detector detects the acidity and alkalinity of cat's urine for early prognosis of diseases (e.g., heart, kidney, liver, urinary and blood system).

NOTE: FOR CAT LITTER, DO NOT INGEST.

Allvita

Dr. TEST Hematuria/Blood Detector

Multiple types of cellulose, pre-gelatinized starch,
chromogenic reagent
10 g per pack

1. Sprinkle the test particles evenly onto the surface of the cat litter;
2. Consult a veterinarian if the particles turn blue after urination in cats.

Why to choose?

- Contact blood 30 seconds color, and the coloration lasts up to 5 days
- Stress free
- Quick and easy

Dr. TEST pH Detector

Multiple types of cellulose, pre-gelatinized starch,
chromogenic reagent
10 g per pack

1. Sprinkle the test particles evenly onto the surface of the cat litter;
2. Consult a veterinarian if the particles turn orange yellow or blue after urination in cats.

Why to choose?

- 30 seconds color, and the coloration lasts up to 5 days
- Stress free
- Quick and easy

Allerfre

♥ Cat Allergen Neutralizing Tablets

Allergy-Free Cat Cuddles

Product information:

Allerfre tablets is used to reduce the secretion and release of allergens in cats.

Allerfre adds lyophilized powder containing anti-Fel d1 and Fel d4 specific yolk antibodies, which effectively neutralize the allergens (Fel d1 and Fel d4) and reduce the allergic symptoms to cats.

Allvita

Allerfre
