

TOELLNER®

has been offering electronic test and measuring equipment of maximum quality since 1972.

Laboratory Power Supplies
High-Performance Power Supplies
Arbitrary Power Supplies

Function Generators / Arbitrary Generators
Broadband Amplifiers / 4-Quadrant Amplifiers
4-Quadrant Power Supplies
Electronic Switches

In addition to the world's most prestigious vehicle and aircraft constructors, almost all system suppliers of these sectors use TOELLNER products. Furthermore, our equipment and systems are encountered in the development and research fields of industries and universities and in all IT, automation and general electronics sectors. An island position for the automotive industry and testing according to ISO 16750-2/LV124/7637 is a great advantage for on site sales activities.

With an excellent price/performance ratio, TOELLNER measuring instruments are exported to 42 countries worldwide. Local representatives provide a direct contact to our customers and thus guarantee the high availability of TOELLNER products.

All TOELLNER products are guaranteed for 24 months. We can provide this extensive guarantee because each instrument is produced to stringent quality and safety standards. The VDE 0411 and IEC 348 safety regulations are complied with; all devices have of course been assigned the CE symbol. DIN EN ISO 9001:2008 certification is obligatory.

Our corporate culture is characterized by open communication and independent and absolutely fair intercourse. Fast decisions and short ways for technical support are part of our policy.
