INNOVATING WITH PURPOSE IN PAPER PACKAGING

ABOUT PMS AKADIMOS

OUR MISSION

To turn paper into purpose — blending craftsmanship with innovation to deliver food-safe packaging that protects, performs, and respects the world it serves.

OUR VISION

To lead the future of food packaging by combining innovation, sustainability, and reliability, offering cutting-edge solutions with minimum environmental impact.

Founded in 2010 by mechanical engineer Petros Kavalakis, **PMS AKADIMOS** brings over a century of family tradition into creating state-of-the-art food packaging solutions. From our base in Oinofyta, Greece, we deliver certified, high-performance paper packaging with innovation, reliability and sustainability at the core.

Operating in the following sectors:

- Paper food packaging
- Production of corrugated paper and paperboard
- Flexographic and Offset Printing

SPECIALISATION. INNOVATION. DIFFERENTIATION.

These are the pillars of our success and what sets PMS AKADIMOS apart in the paper packaging industry. Our team and our products are trusted by leading figures in the field — a trust reflected in our long-standing partnerships with Greece's largest box manufacturers, packaging distributors, and catering chains.

**Already exporting in
8 countries worldwide
and the feedback is
absolutely exciting!**

THE PEOPLE BEHIND THE BRAND

Our team combines years of specialised experience with a strong passion for continuous improvement. We work with dedication, quality standards, and the agility to support businesses across Greece and beyond.

WHY CHOOSE US

- ✓ End-to-end production from core materials to finished packaging
- ✓ Fully eco-conscious design and sourcing practices
- ✓ Flexible customization, fast delivery, and strict quality control
- ✓ Active growth in international markets & presence at leading global packaging exhibitions

**IN PMS AKADIMOS WE SHARE A COMMON VISION:
ALWAYS LOOK FOR THE MOST ADVANCED PRODUCT AND ACHIEVE NEW MILESTONES.**

A COMMITMENT EMBEDDED IN EVERY STEP

QUALITY ASSURANCE

At PMS AKADIMOS, quality assurance is not a final checkpoint — it is an integral part of every phase in our production process. From sourcing raw materials to delivering the final product, we operate with a continuous commitment to food safety, regulatory compliance, and customer satisfaction.

CERTIFIED FOOD SAFETY MANAGEMENT SYSTEM

Our operations are governed by a Food Safety Management System certified according to the international standard ISO 22000:2018. This system incorporates the key principles of HACCP (Hazard Analysis and Critical Control Points), ensuring that all potential hazards are identified, monitored, and controlled throughout production.

CONTINUOUS STAFF TRAINING

Ongoing training is at the core of our food safety culture. Our staff receive regular education on hygiene protocols, safe handling of materials and best practices in food-contact packaging production. This ensures that everyone, from machine operators to management, is fully aligned with our safety and quality objectives.

ON-SITE AND LABORATORY INSPECTIONS

To ensure compliance and consistency, we perform frequent inspections both during and after production. These include:

- In-process controls on-site
- Laboratory testing of raw materials and final products
- Environmental monitoring where required
- Each inspection is carefully documented as part of our traceability and quality control systems.

DOCUMENTED ASSURANCE AND TRANSPARENCY

At PMS AKADIMOS, every product is backed by a robust system ensuring traceability and compliance at every stage.

Lot-Based Traceability

Each product carries a lot number that links it to its complete production history — from raw material sourcing to final inspection — enabling full control, accountability, and quick issue response.

Batch-Specific Declaration

Every batch is delivered with a Declaration of Conformity confirming:

- Compliance with EU and national food contact regulations
- Proper application of hygiene and safety protocols
- Legal and technical conformity of all materials used

These practices demonstrate our commitment not only to legal standards, but also to the trust our clients place in us.

DESIGNING TODAY WITH TOMORROW IN MIND

ENVIRONMENTAL COMMITMENT

At PMS AKADIMOS, environmental responsibility is not an afterthought, it is an essential part of how we design, produce, and evolve as a company.

Our strategy focuses on reducing the environmental impact of our operations through targeted, measurable actions that support long-term sustainability.

WASTE MANAGEMENT & RECYCLING

We manage all solid and liquid production waste through certified recycling partners, ensuring safe, traceable, and responsible handling. Each year, we recycle approximately 120 tonnes of paper, contributing to material circularity and a significant reduction in landfill burden.

CLEANER PRODUCTION TECHNOLOGY

Our ongoing investment in environmentally friendly technology reflects our commitment to safer and more sustainable manufacturing. A key example is our collaboration with Agfa-Gevaert to upgrade our Computer-To-Plate (CTP) system — a change that has significantly reduced hazardous chemical residues and lowered our carbon footprint.

RESPONSIBLE MATERIAL SOURCING

We are committed to sourcing our paper and paperboard from certified renewable sources, prioritizing suppliers who align with our environmental values and technical standards.

FSC® Certification & Sustainable Forestry

As part of this commitment, PMS AKADIMOS is FSC® certified, demonstrating our dedication to responsible forest management and transparency in our supply chain.

By working with FSC-certified suppliers, we actively support:

- The protection of biodiversity and natural habitats
- Ethical, sustainable forestry practices
- Transparency and full traceability in the sourcing of forest products

CRISPYBOX

PLASTIC-FREE SINGLE-FACE BOX MADE OF CORRUGATED PAPER

The CRISPYBOX is a unique food packaging innovation developed by PMS AKADIMOS and protected by EU Design Registration No. 002725929-0001 and Greek Patent No. 1008953.

Made of single-face corrugated paper using a combination of long-fibre and short-fibre virgin pulp, the CRISPYBOX allows hot food to “breathe,” releasing excess steam and maintaining ideal texture.

Thanks to its ventilated and permeable construction, it effectively prevents sogginess in starchy and fried foods, keeping contents crispy and fresh until consumption. This patent is developed especially for:

French fries
Burgers & club sandwiches
Crepes & calzone
Onion rings

...and any dry or lightly greasy hot takeaway food.

WHY CHOOSE CRISPYBOX?

Unique Packaging for Crispiness Preservation

Plastic-Free & 100% Recyclable

Patent-protected EU design

Designed for performance, hygiene, and consumer satisfaction

Developed for the demands of today's fast-food packaging

TECHNICAL SPECIFICATIONS:

- **Material:** Single-face corrugated paperboard, ~2 mm thickness
- **Printing:** Flexographic, up to 4 colours
- **Assembly:** Hand-formed, sturdy and breathable structure
- **Packaging:** Delivered flat, in shrink-filmed packages of 100 units
- **Functionality:** Maintains crispiness, absorbs steam and oil, ensures air flow
- **Customisation:** Available in custom dimensions upon request*
(*Minimum order quantities may apply)

POLYKRAFT FLAT

100% RECYCLABLE HIGH-BARRIER BOX MADE OF COMPACT KRAFT PAPERBOARD

The POLYKRAFT NATURAL box is a durable and **sustainable alternative** to traditional grill-house boxes made of recycled paperboard and PLASTIC lamination.

Produced from enhanced compact kraft paperboard and coated with recyclable, food-safe water-based barrier layers, this box delivers excellent water and grease resistance, without compromising on environmental responsibility.

Developed through a two-year R&D effort by PMS AKADIMOS, it represents a significant step forward in clean, efficient, and recyclable packaging for fatty and grilled food.

Ideal for souvlaki, grilled meat, burgers, and other takeaway meals, it provides top-tier protection, maintains structure under heat and grease and reflects a modern, eco-conscious approach.

WHY CHOOSE POLYKRAFT FLAT?

100% Recyclable Monomaterial

Great feel & appearance due to slight creasing on the outside

Developed by our in-house R&D department

Designed for grilled and oily takeaway food

Biodegradable adhesive barrier

Stronger and more reliable than conventional packaging

TECHNICAL SPECIFICATIONS:

- **Material:** Natural brown compact kraft paperboard
 - **Printing:** Flexographic, up to 4 colours
 - **Barrier Properties:**
 - Inner: Multi-layer water- and grease-proofing using recyclable & biodegradable adhesives
 - Outer: Single-layer waterproofing, also recyclable & biodegradable
 - **Surface Texture:** Kraft finish with a lightly grooved exterior
 - **Assembly:** Hand-formed, leakproof structure
 - **Functionality:** Grease- and moisture-resistant, ideal for grill-houses
 - **Packaging:** Delivered flat, in shrink-filmed packages of 100 units
 - **Customisation:** Available in custom dimensions upon request*
- (*Minimum order quantities may apply)

POLYKRAFT EASY

READY-TO-USE, WATERPROOF & RECYCLABLE BOX MADE OF COMPACT KRAFT PAPERBOARD

POLYKRAFT EASY is the newest addition to the Polykraft product family, designed to combine high performance with maximum convenience. Made of compact paperboard, consisting of 100% virgin kraft paper and multi-layered, water-based barrier coatings, it is ideal for greasy or juicy food — with no compromise on sustainability.

This is a monomaterial solution, meaning it is fully recyclable, yet offers outstanding water and grease resistance — a rare combination in the food packaging industry.

Unlike hand-assembled alternatives, POLYKRAFT EASY features a ready-to-use design, that ensures fast and efficient food service. It's the perfect match for grill-house, fast food, and street food applications, offering strong structure, product safety, and visual appeal.

TECHNICAL SPECIFICATIONS:

- **Material:** Natural brown compact kraft paperboard
- **Printing:** Flexographic, up to 4 colours
- **Barrier Properties:**
 - Inner: Multi-layer water- and grease-proofing using recyclable & biodegradable adhesives
 - Outer: Single-layer waterproofing, also recyclable & biodegradable
- **Surface Texture:** Kraft finish with a lightly grooved exterior
- **Functionality:** Grease and moisture resistant, ready-to-use — no assembly needed
- **Packaging:** Delivered nested in boxes.
- **Customisation:** Available in custom dimensions upon request*
(*Minimum order quantities may apply)

WHY CHOOSE POLYKRAFT EASY?

100% Recyclable monomaterial

Ready-to-Use Design

Time & Space Saving

Available in a Wide Variety of Designs & Sizes

PIZZAPAD

SINGLE-FACE PIZZA BOX INSERT MADE OF CORRUGATED PAPER

PIZZAPAD is a practical and efficient solution for pizza delivery and takeaway, designed to maintain the quality and appearance of your product during transport. Made from virgin, food-grade corrugated paper, it acts as a protective barrier between the pizza and the box, preventing moisture and oil from softening the crust or soaking the base.

The air channels created by the corrugated structure allow better air circulation, helping the pizza stay warm and crispy, while protecting the box from grease stains and sogginess.

Fully recyclable and suitable for direct food contact, PIZZAPAD reflects the values of modern, sustainable food service — advantages your customers can taste.

SPECIAL APPLICATIONS

We also manufacture products for food industries with special needs.

Our inner and outer white greaseproof corrugated pad is a perfect insert for biscuit packets and similar fatty pastry products.

Made of 100% virgin kraft paper for direct food contact. Available in any requested diecuts or reels.

WHY CHOOSE PIZZAPAD?

- Keeps the pizza crispy and warm for longer period
- 100% virgin fibre kraft paper, suitable for direct food contact
- Plastic-Free & 100% Recyclable
- Lightweight, breathable, and oil-absorbent
- Available in all popular pizza dimensions

TECHNICAL SPECIFICATIONS:

- Material:** Single-face corrugated paper with a thickness of 2 mm from unbleached virgin pulp
- Weight:** 265–285 g/m²
- Packaging:** Delivered flat in heat-shrinkable packages, by weight (5 kg) or count (200 units)
- Functionality:** Maintains crust crispiness, protects the box and improves hygiene
- Variety:** Available in all popular pizza box dimensions (for rectangular boxes or with folding corners)
- Customisation:** Available in custom dimensions upon request*
(*Minimum order quantities may apply)

PRODUCT LIST

ITEM CODE DIMENSIONS (mm)

FOR RECTANGULAR PIZZA BOXES

64-0245	250x250
67-0205	270x270
67-0206	290x290
67-0208	320x320

64-0309	480x468

SMART PAD

MULTI-SECTION INSERT FOR PIZZA, BURGER & TACO BOXES MADE OF CORRUGATED PAPER

SMART PIZZAPAD is an innovative solution that transforms a single food box into a multi-compartment meal kit, ideal for menus that combine different food items such as pizza slices, burgers, fries, salads, and sauces — all in one safe, tidy and visually appealing presentation.

Crafted from the same virgin, food-grade single-face corrugated paper as our original PIZZAPAD, the SMART version features guiding folding lines that allow the end user to easily create partitions inside standard takeaway boxes, maintaining product separation and hygiene during delivery.

Pre-designed formats are available for the most popular pizza box sizes, as well as burger and taco boxes, while custom dimensions and layouts can be developed upon request.

WHY CHOOSE SMARTPAD?

Keeps food items separated, organised and crispy
Enhances unboxing experience with zero extra packaging

KEY FEATURES:

- Smart partition design for combination meals
- Same food-grade, recyclable material as PIZZAPAD
- Grease-resistant and breathable
- No plastic coatings — 100% kraft paper
- Clean and food-safe surface
- Delivered in packs of 100 flat units
- Suitable for Combo menus (e.g. pizza + side + dip) & multi-burger or taco servings in a single box

CUSTOMISATION

Predefined sizes for pizza, burger, and taco boxes
Custom formats available on request to fit your packaging
