

PAXLY

OPTIMIZE THE PURCHASE OF PACKAGING MATERIALS WITH PAXLY

SAVINGS

Save **85 %** working time when tendering

Ø **18 %** savings through targeted packaging optimization

Save **> 15 %** on purchasing costs depending on the industry

Make an active contribution to **CO2** reduction, e.g. through targeted reduction of empty space

COMPANY

PAXLY was founded in 2019 by Torsten Beyenbach and Thomas Auer, inspired by the realization of the potential in the large-scale purchase and sale of corrugated cardboard. Their goal was to modernize and, in particular, digitalize the existing system.

BUSINESS MODEL

PAXLY creates transparency and offers unprecedented depth in packaging data by bringing together packaging expertise and data in the PAXLY software.

End customers for packaging materials can thus digitalize the tendering process and use the PAXLY algorithm to form meaningful tendering groups and find suitable suppliers. Suppliers are spared tedious cold calling and can find suitable customers based on matches to their machinery parks.

NILS HONERLA CEO - Burda Procurement GmbH

"With the help of PAXLY, we were able to significantly reduce our own expenditure and achieve better results at the same time! This is reflected both in the quality of the products purchased and in the purchase prices and conditions."
