

EASTAR

TOUCH IT FUTURE

[Eastar GmbH, Gerkerath 171, 41179 M'gladbach, Germany](#)

Introduction: Eastar GmbH

Founded in 1999, Eastar GmbH has established itself as a reliable partner and innovator in the field of industrial computing. With over two decades of experience, the company stands for quality, reliability, and technological excellence. Eastar offers tailored solutions that meet the demanding requirements of various industries.

The product portfolio includes a wide range of state-of-the-art industrial computers. These include rugged tablets specifically designed for use in challenging environments, panel PCs for efficient operation and control in industrial applications, box PCs with high computing power and compact designs, and rackmount computers that excel in server environments due to their robustness and scalability. Additionally, Eastar is increasingly investing in innovative liquid cooling technologies, which deliver peak performance with optimal energy efficiency.

Eastar GmbH's success is built on its ability to combine technical excellence with a deep understanding of its customers' needs. The products are utilized in industries such as manufacturing, logistics, healthcare, defense, and energy. With a focus on durability and sustainability, the company delivers solutions that remain competitive well into the future.

Eastar GmbH looks confidently toward the future. Through continuous investments in research and development, a dedicated team, and a clear vision for technological innovation, the company will continue contributing to the advancement of digital transformation in industry. Eastar stands for reliability and innovation – yesterday, today, and tomorrow.
