

ROBATECH PRESENTS ALPHA AT FACHPACK 2025

From September 23 to 25, 2025, Robatech will be presenting Alpha at FACHPACK in Nuremberg – a new melter that expands the company's latest generation of adhesive melters. In Hall 2, Booth 407, the Swiss company will demonstrate how adhesive application in the packaging industry can be made efficient, reliable, and sustainable. In line with its 50th anniversary, Robatech will present itself as a modern and future-oriented company.

Reliable gluing with peace of mind

The new Alpha melter processes up to 12.5 kg/h of thermoplastic adhesives, depending on the tank size. Its high system availability and energy efficiency ensure sustainable operation and low operating costs – both key factors for maintaining competitiveness. Alpha is equipped with the Robatech Control System (RCS), offering smart operation and numerous interfaces that simplify system integration, control, and monitoring of adhesive application. This makes it easy for existing customers to upgrade from earlier systems – and just as easy for new users to get started with the latest generation. In addition, Robatech's heated hoses and application heads from the year 2000 onward are compatible with Alpha.

50 years of Robatech: Connecting the future

Looking back, it is clear that pioneering technology is one of the reasons why many of Robatech's customer relationships have lasted for decades. "Long-standing relationships are the foundation of our success," says CEO Yves Ottiger. And company owner Marcel Meyer adds: "We don't shape the future alone, but side by side with our customers. Together, we develop solutions that make everyday production easier, safer, and more efficient." Robatech's commitment to personal support, local proximity, and fast service is reflected in the company's global presence. The story that began in Muri, Switzerland, in 1975, will continue at FACHPACK 2025 together with customers and partners.

ROBATECH

Robatech optimizes the industrial hot melt and cold glue application with sustainable and innovative adhesive application systems. Since 1975, Robatech has been developing and producing high-quality control systems, application heads, melters, and dosing systems that make gluing processes more environmentally friendly, safe, and straightforward. The Robatech Group, headquartered in Muri/AG, Switzerland, is represented in more than 80 countries. More than 670 employees worldwide provide personal and fast customer support in a wide range of industries.
