FILM OR CASE PACKAGING?

TECHNICAL DATA:

The modern, ergonomic, and economical FW stretch film wrapper for your secondary packaging features an exceptionally compact design.

If required, the stretch film wrapper can be combined with a module to pack in wrap around cases.

The blanks are fed in via the ergonomic loading station.

The magazine capacity is modular and individually expandable.

CONSUMPTION DATA:

- Connected load: from 16KW*
 - Compressed air: none
 - Film consumption per pack 2.5 - 5 grams
 - Film thickness: from 12 μ + pre-stretching at 250%
- *depending on the drive system
