

ZHEJIANG HONGXI TECHNOLOGY CO.,LTD

Zhejiang Hongxi Technology Co., Ltd. (Metaways) is a high-tech enterprise specializing in the R&D, design and manufacturing of Micro OLED display devices and modules. It is located in Yiwu City, Zhejiang Province, and its products are mainly applied in the field of AR/VR products. The company has built a world-leading, Micro OLED production line using 12-inch Si substrates, and has a full range of proprietary technology from IC design to micro-display packaging, supported by an experienced management team. The technical team members have rich experience in both R&D and mass production of Micro OLED displays.

The company has recruited a first-class team of master- and doctoral-level graduates from Zhejiang University, University of Science and Technology of China, University of Electronic Science and Technology of China, Nanjing University, etc., and has established partnerships with leading domestic universities committed to joint innovation in the research, technology transfer, and scalable manufacturing of high quality Micro OLED products.
