

BÜNGENER® MEATONLY TETRA RECARTE® WET FOOD SERIES

- At Büngener Pet Health we care about the health of our pets and also try to do what is best for our planet.
- By using the exclusive cardboard-based Tetra Recart® packaging we obtain the following benefits for the environment:

- * **Reduced carbon footprint:** Up to 80% smaller carbon footprint than a glass jar or tin can
- * **Recyclable packaging:** Tetra Recart® cardboard packaging can be recycled into something new.
- * **FSC guaranteed:** All cardboard in the Tetra Recart® comes from FSC®-certified forests and other regulated sources (Forest Stewardship Council®)
- * **Sustainability:** At least 71 % of the material in our Tetra Recart® packaging is made from renewable sources.

And, what's inside ?

- Only the best for our pets, as usual. Our **MeatOnly** recipes offer complete nutrition, with an outstanding palatability because we use meat or fish as the only one ingredient.
- Our **"MeatOnly"** recipes have an outstanding palatability and remarkably high real meat or fish content, which means ONLY MEAT. We do not use carbohydrates, grains, or fillers. Your furry friends will crave them.

Cat Range:

When it comes to eating meat or fish, your cat is a natural. Cats are obligate our true carnivores, meaning they require **meat in their diet and need little carbohydrates**. In the wild, cats usually prey on small animals, such as mice and birds. But as a pet, a cat might only be preying on a can of cat food so, they rely on their owners to be nourished with a diet as biologically appropriate as possible.

Dog Range:

Wet food is an excellent choice for dogs. It has a higher moisture content than dry food. Increasing your dog's water intake helps put less strain on major organs, such as the kidneys, as well as on the urinary tract. Additionally, wet food is typically much more appetizing than kibble to many dogs. It more closely resembles the fresh meat that dogs crave. It is especially good for picky eaters as an alternative or addition to dry food.
