TOW-BEHIND TWIN LEAF VACUUM

Patent Pending

- This leaf vacuum is equipped with a strong 15HP engine, providing powerful suction and the ability to efficiently collect leaves and debris.
- The vacuum features two vacuum snouts, allowing for simultaneous collection from both sides. This saves time and effort, making the leaf collection process more efficient.
- The leaf vacuum has a steep dump angle, ensuring that the load empties completely. This prevents any remaining leaves or debris from getting stuck or left behind.
- This vacuum can collect a large amount of leaves and debris, which reduces the frequency of emptying and makes the leaf collection process more convenient.
- Made with high-quality materials, this leaf vacuum is built to withstand prolonged use and harsh working conditions. It is designed for durability and longevity, ensuring reliable performance season after season.

Easy rolling wheels pneumatic tires (330mm) can create a smoother roll

Dump lever just unbuckle from the back, release the lever and lift

Unloads in seconds

All steel impeller reduces the volume of leaves to a fraction of their original bulk

Safety device for emergency situation

Foldable trailer jack can adjusting the height of the leaf vacuum snouts

Vacuum hose allows to a collect all the debris
