

**Item number:** 7008euBE

**Item name:** TSP Recycled Cat Litter Box Liners 'L' (50 x 38 cm, 8 bags/roll)

Cleaning the cat litter tray isn't exactly the most pleasant of daily chores. Our recycled cat litter box liners make it much easier - less mess, less effort, more cleanliness.

## The 5 top facts

- **Hygiene, protection & comfort:** prevents urine build-up and reduces cleaning effort
- **Made in the EU**
- Certified with the **Blue Angel**
- Made from **at least 80% post-consumer recycled plastic waste (PE)**
- **Easy to use:** excellent tear-off perforation, pleasant feel and easy-to-open bags, with a sturdy drawstring

## Made in the EU

Our recycled cat litter box liners are produced in the European Union. This means transport distances are short. This not only reduces CO<sub>2</sub> emissions but also enables transparent and controlled production in accordance with European environmental and quality standards.

## Certification – Blue Angel

TSP Recycled cat litter box liners are certified with the Blue Angel and meet the strict requirements of the 'DE-UZ 30a' award criteria. For over 45 years, the Blue Angel has stood for particularly environmentally friendly products and provides reliable guidance when shopping.

## At least 80% post-consumer recycled material (PE)

Our recycled cat litter bags are made from at least 80% post-consumer recycled material (PE), i.e. plastic that has already been used, including plastic packaging from household recycling collections. This conserves resources, as no new crude oil needs to be extracted for the raw material and because recycling PE generates significantly less CO<sub>2</sub> than the production of virgin granulate.

Once disposed of in general waste, the high heating value of the material used (PE) comes into play during waste incineration: this allows a significant amount of energy to be recovered. From an environmental perspective, this is particularly beneficial as long as fossil fuels (e.g. crude oil) are used for energy generation. Furthermore, PE films burn without leaving any residue, breaking down into carbon dioxide and water.

## Quality and Handling

Our recycled cat litter box liners impress not only with their eco-conscious design, but also with their outstanding quality:

- **Easy to use:** Thanks to the integrated tear strip, the banderole can be effortlessly removed from the roll. The bags' excellent tear-off perforation makes them easy to separate from the roll. The film has a pleasant feel. Easy to seal and comfortable to carry thanks to a sturdy drawstring.
- **Hygiene, protection & comfort:** Prevents urine build-up and protects the litter tray. This reduces the cleaning effort and ensures lasting cleanliness.
- **Fit:** Ideal for standard litter trays up to approx. 50 x 38 cm.

## Packaging from sustainable forestry

The packaging (banderole) used for our recycled litter box liners is made from FSC-certified kraft paper and is fully recyclable.

## Key points describing the product and its USP

- Hygiene, protection & comfort: prevents urine build-up, protects the litter tray, less cleaning required, more cleanliness
- Made in the EU
- Certified with the Blue Angel
- Made from at least 80% post-consumer waste (PE)
- Significantly lower CO<sub>2</sub> emissions during production than with virgin PE made from new granulate
- Conserves resources, as no new crude oil needs to be extracted for the recycled material
- High heating value and clean combustion of PE in waste-to-energy plants
- Easy to use: excellent tear-off perforation, pleasant feel and easy-to-open bags, with a sturdy drawstring
- Ideal for standard cat litter trays (50 x 38 cm)
- Packaging (banderole) made from FSC-certified material
