# Corporate Video Ecoventi Sistemas

# About us

Global leaders in the manufacturing of:

- Macro-perforated film
- Stretch film
- Other packaging solutions

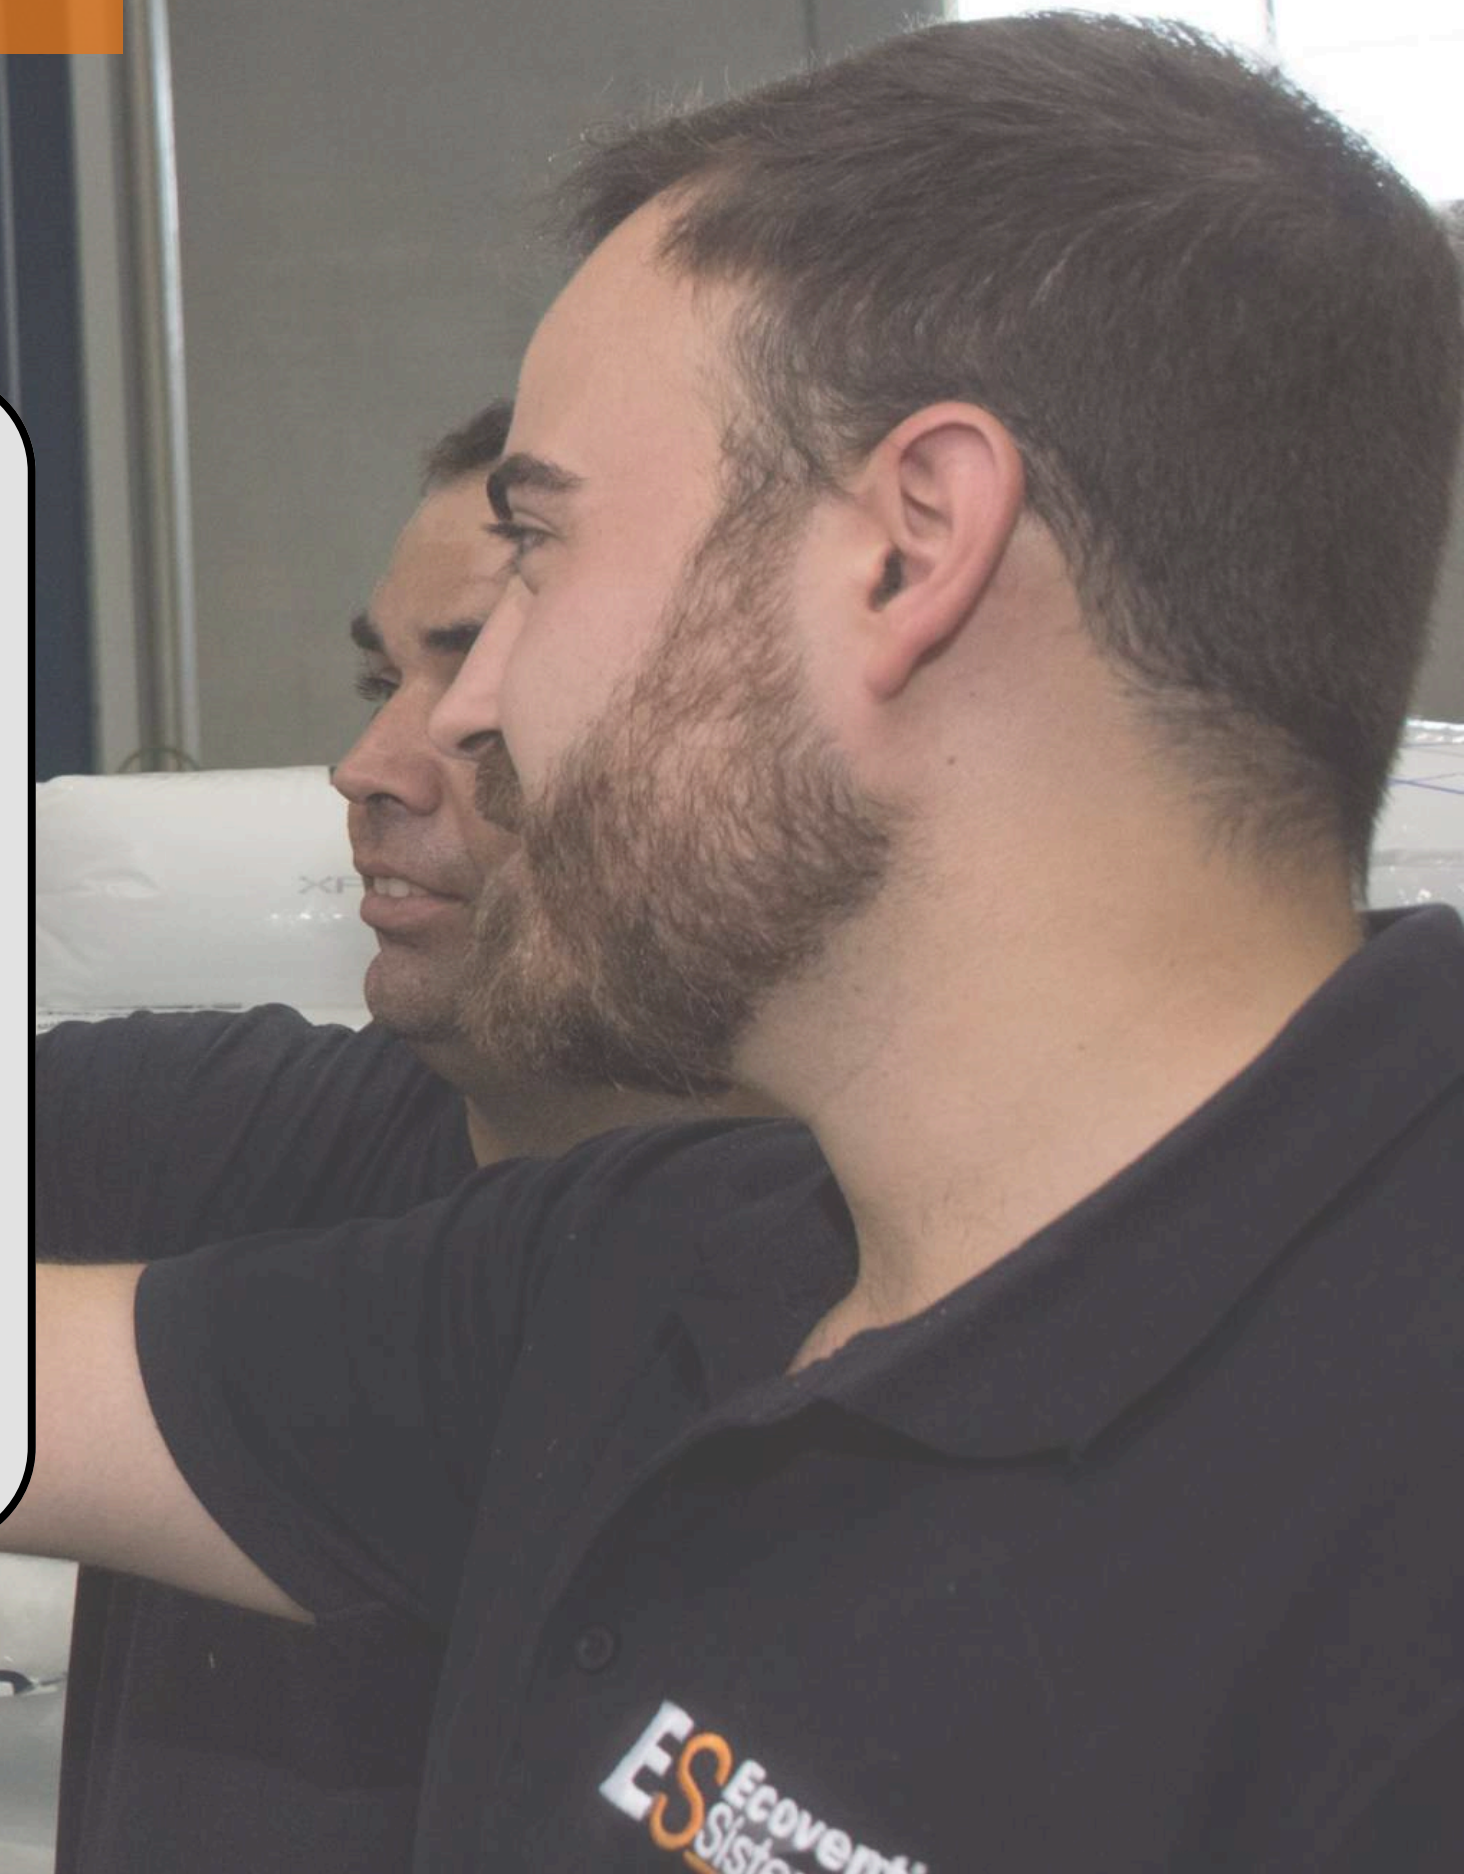

More than 18 years of experience

Possibility of adaptation and customization of our products.

Process optimization with high-performance solutions and plastic reduction in each palletizing.

Constant innovation

- **500+ collaborations.**
- We operate in **30+ countries.**
- We have achieved **savings of over €3 million** thanks to our **R&D&I.**

# What define us

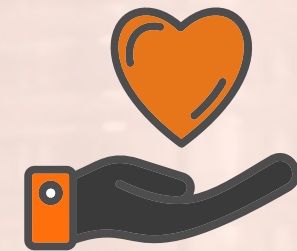

## MISSION

To revolutionize packaging with sustainable and innovative solutions, reducing plastics, optimizing processes, and promoting the circular economy.

## VISION

To be global leaders in sustainable packaging, driving efficiency, technology, and environmental commitment.

## VALUES

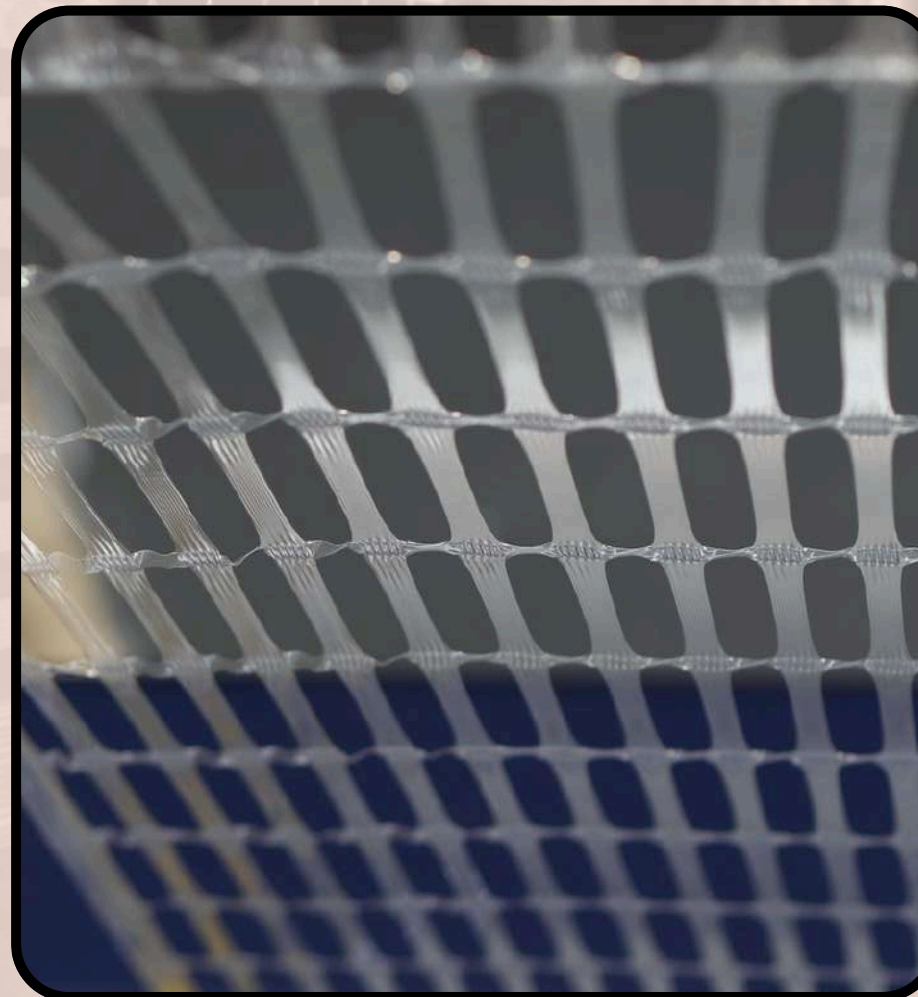

- Innovation.
- Sustainability.
- Customer focus.

# Commitment to sustainability

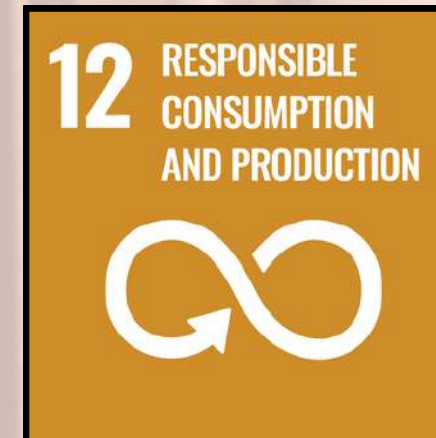

**WE WORK WITH A CIRCULAR  
ECONOMY**

**WE WORK WITH PRODUCTS WITH  
PCR CONTENT**

**COMMITTED TO THE SUSTAINABLE  
DEVELOPMENT GOALS**

- Our products contain 20% less plastic and reduce the carbon footprint by at least 50%.
- We follow a zero-waste approach in our factories, using recycled materials and generating 25% of our electricity consumption through photovoltaic solar energy.

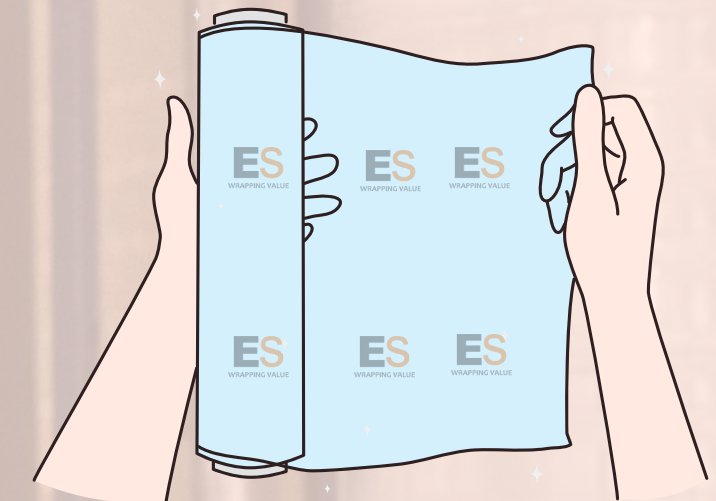

# What we offer?

**MACROPERFORATED**

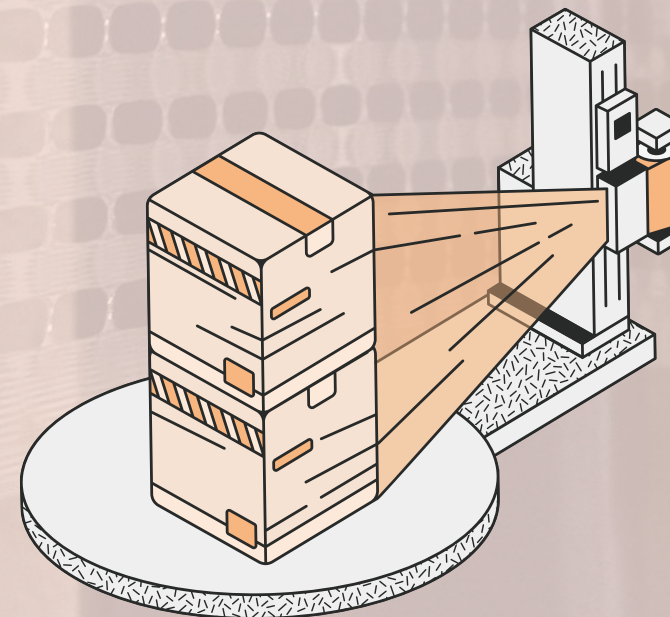

**STRETCH FILM**

**FOOD FILM**

**TREES PROTECTOR**

**MACHINERY**

**TECHNICAL STUDIES**

# Macroperforated

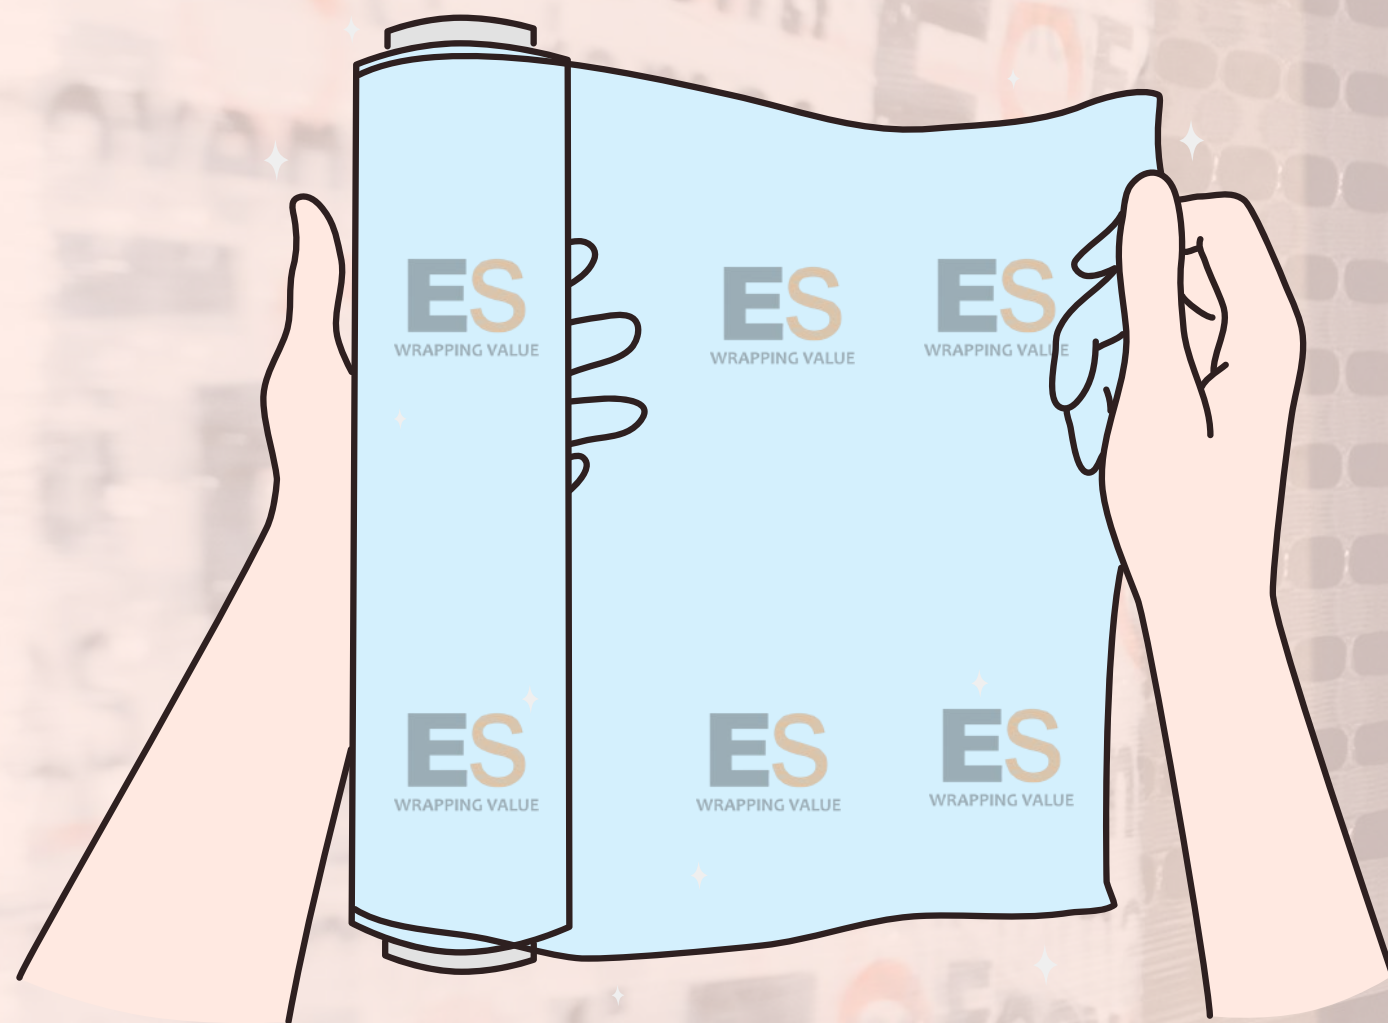

- Perforated stretch film, designed for automatic, semi-automatic, and manual palletizing of goods that require ventilation.
- It prevents condensation, moisture, and mold growth, and ensures protection and freshness during storage and transport.

# Stretch film

- Designed for automatic, semi-automatic, and manual wrapping of goods, it provides great stability to loads on the pallet.
- Its elasticity allows it to perfectly adapt to different sizes and shapes, ensuring efficient protection during transport and storage.

# Food film

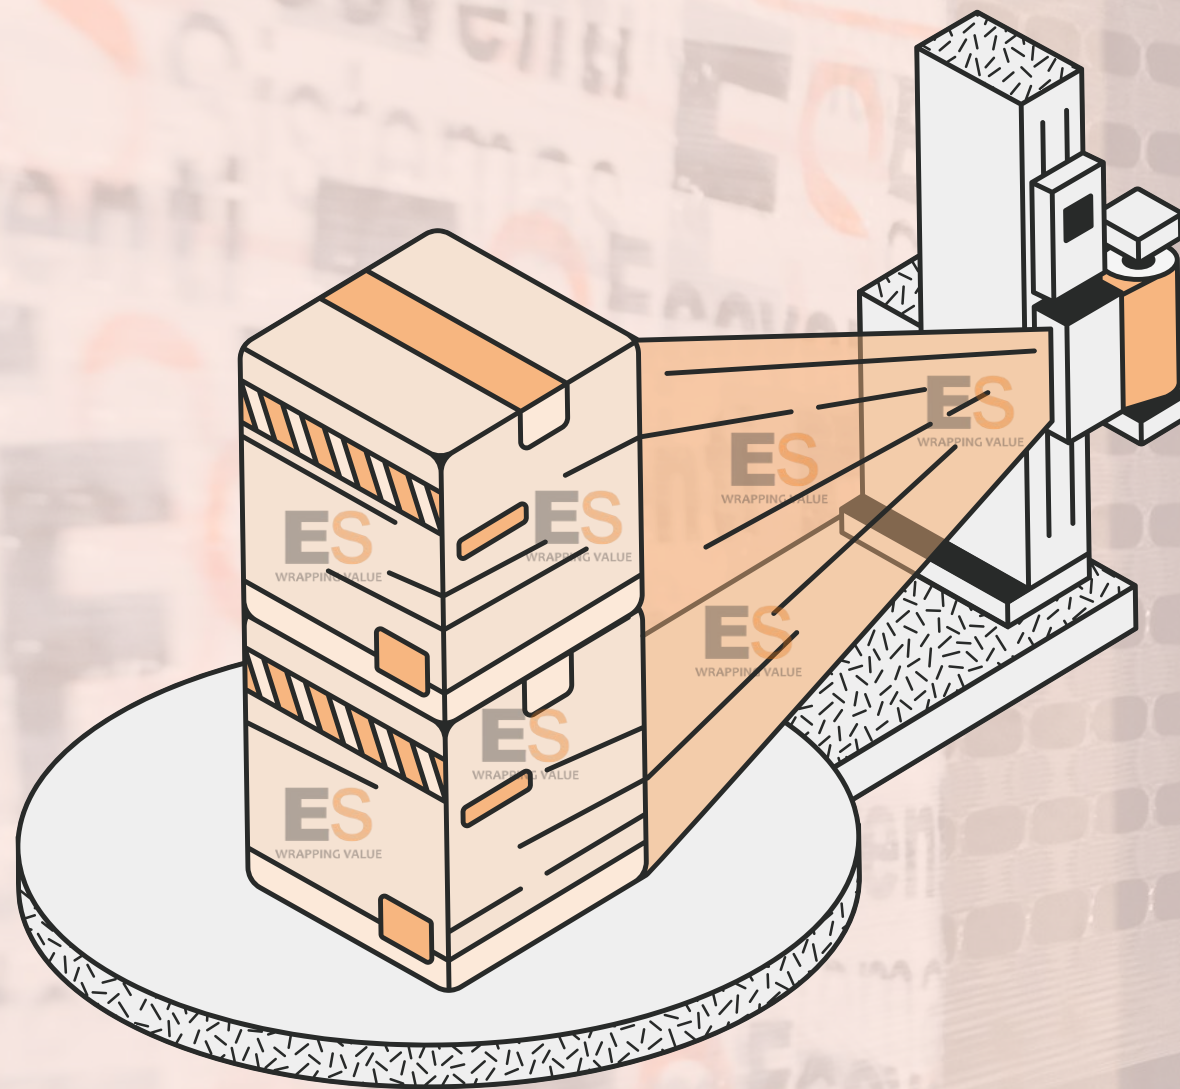

- It provides secure and flexible packaging, designed to preserve food freshness, preventing contamination and dehydration.
- Ideal for both domestic and industrial use, ensuring optimal food preservation and extending its shelf life.

# Trees protector

- A comprehensive protector that promotes healthy growth in young and medium-sized trees, protecting them from herbicides, external damage, and animals such as rabbits and hares.
- It offers optimal ventilation, is easy to install, and is essential for ensuring tree health and longevity during planting and growth projects.

# Machinery

- We offer highly efficient palletizing machines.
- Ideal for integrating with our stretch films, optimizing packaging, ensuring safety, and reducing costs in the supply chain.

# Technical studies

- Customized audits for our clients, focused on product and resource optimization in palletizing.
- We identify opportunities to improve the efficiency of material use, reduce costs, and maximize the performance of logistics processes.

# Competitive advantage

**WASTE REDUCTION THROUGH OPTIMIZED FILM  
PRODUCTION**

**USE OF RECYCLED AND RECYCLABLE MATERIALS**

**PATENTED PRODUCTS, CONTINUOUS R&D&I**

**WE WORK WITH NFC TECHNOLOGY**

**WE OFFER CERTIFIED PRODUCTS AND OUR OWN  
PRODUCTION TECHNIQUES THAT GUARANTEE QUALITY**

**FLEXIBLE ORDERING AND FAST DELIVERY**

**PERSONALIZED TECHNICAL ADVICE**

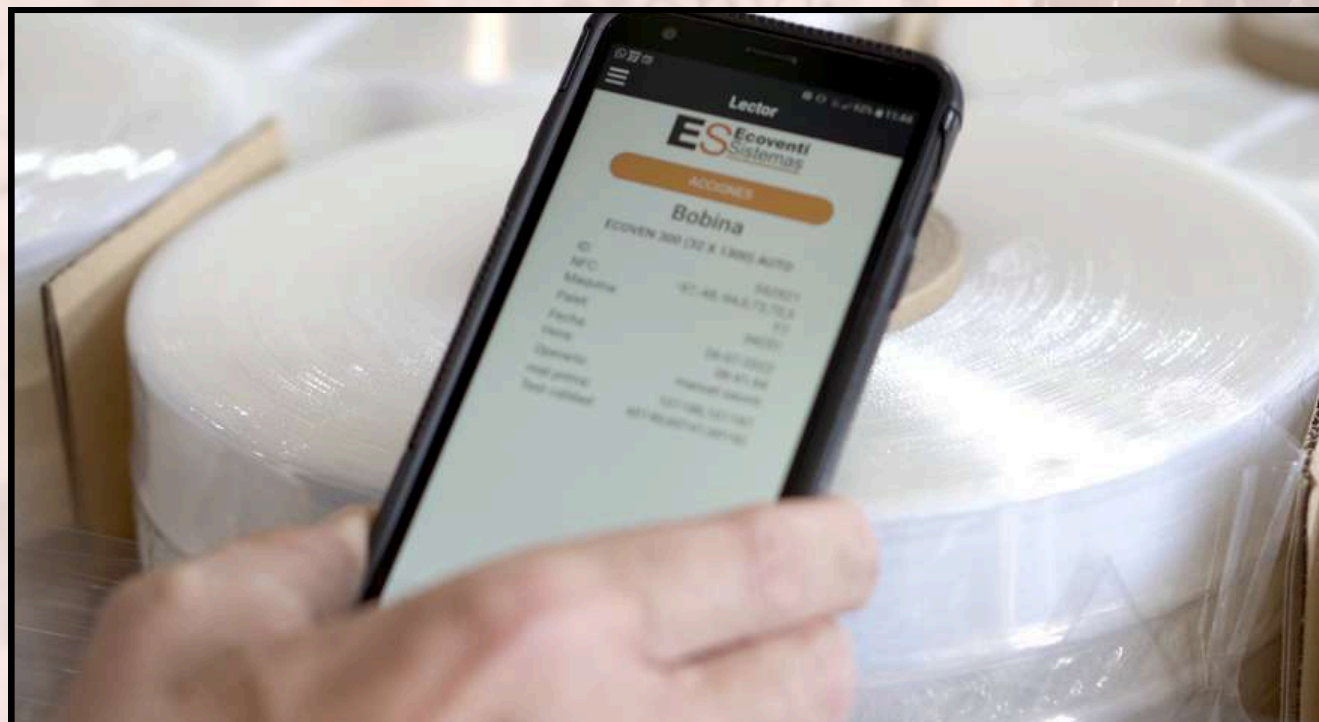

# NFC technology

We've incorporated an NFC chip that allows real-time access to each reel's history, including its specifications and data.

This optimizes traceability, stock control, and logistics management, ensuring efficiency and safety.

# Committed to quality

## Material selection

We evaluate suppliers and select only top-quality, highly efficient materials.

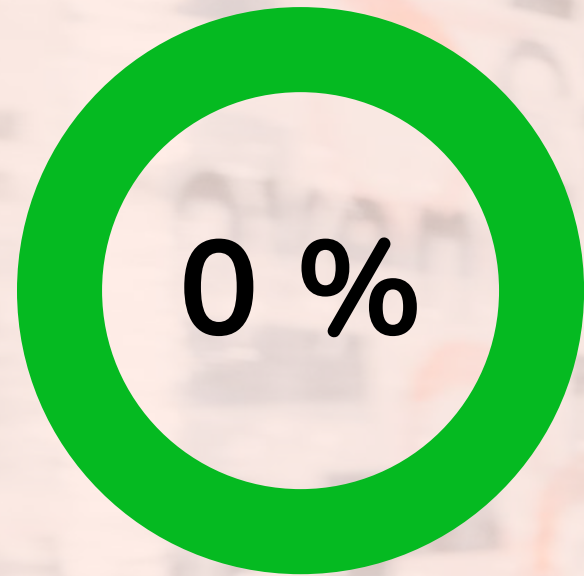

## Endurance and performance test

Testing at each stage: receiving, extrusion, drilling and final evaluation.

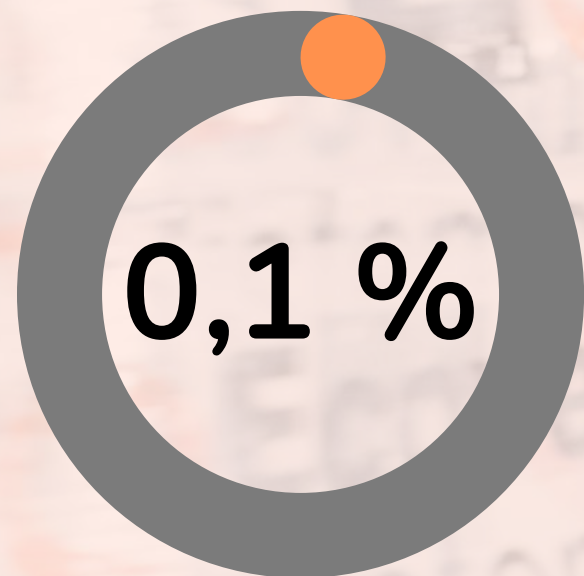

## Certifications and audits

We are audited by external companies to validate our compliance with regulations. Regulations: ISO 9001; ISO14001; UNE-EN 15343:2008 + UNE- EN 15347:2008

# Committed to quality

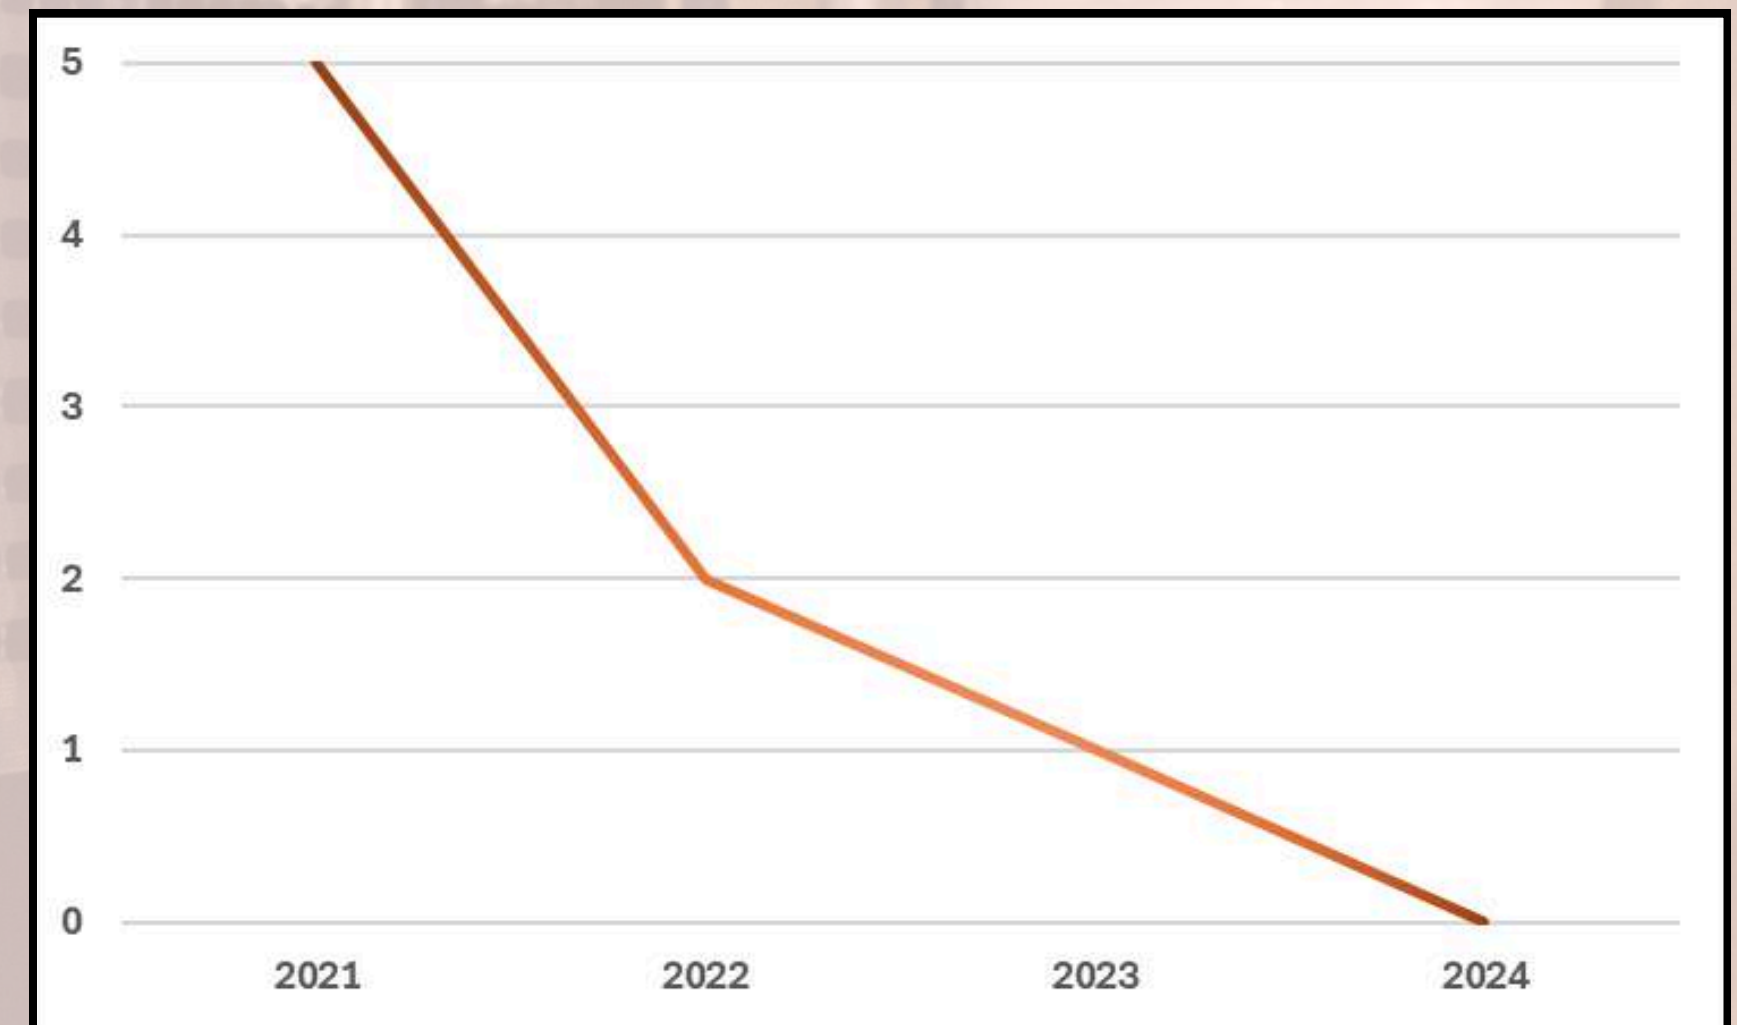

Percentage of complaints on our macro-perforated film references during 2024.

Percentage of complaints on our stretch film products during 2024.

Reclamations (2021-2024)
