

Hello, may we introduce ourselves?

We are a diverse team of animal lovers in the heart of Saxony. Our pet food manufactory, Tiernahrung Seerhausen GmbH, is located halfway between Leipzig and Dresden.

The well-being of the animals is our top priority - that's why we process selected, natural ingredients mainly by hand into species-appropriate feed...

Following nature's example, we create exceptional snacks and dry food.

In our responsibility towards nature, we do not use elaborate packaging and excessive marketing. This is also reflected in our prices: good food does not have to be expensive, but a clear conscience is priceless. Whether dog breeder or hamster mom, rabbit friend or cat buddy, they all have one thing in common:

They appreciate our products and have been loyal to us for a long time. We are proud of that.

We are always open to new collaborations. Thanks to our experience, innovative strength and flexibility, we are always able to establish mutually beneficial partnerships on both a large and small scale.

Under the manufacturer number DE SN 200006, we have been producing many different articles for well-known retail chains in Germany and for the entire European market under private label and also under our own brand for over 10 years as Tiernahrung Seerhausen GmbH. Our rodent snacks are even in demand in Australia, where we deliver by sea. Our online business with the "Mr. Crumble" brand, including our own webshop, is also growing steadily in terms of range and customer base. Whether online or offline - you can rely on our expertise.

Our factory building in Seerhausen covers an area of approx. 3000 m². In our mixing plant area, we can store loose raw materials with a weight of 300 tons. In addition, we can feed 10 individual components to the two horizontal mixers via our BigBag stations with the help of the computer-controlled system. In the packaging department, two machines are available for packing bags from 0.1 kg to 5 kg. A bagging machine from 5 kg to 30 kg and a drying machine for our finished products are also located here.

RODENT FOOD AND TREATS - NATURALLY HANDMADE

Small animals are becoming increasingly popular because they require relatively little space and time. Nevertheless, rabbits and hamsters deserve the same care as other pets. In addition to keeping them occupied, this also includes the right food and, above all, the right treats. Unfortunately, the supply of healthy and species-appropriate small animal food has only improved in recent years. We would like to play our part in further improving it.

Our steadily growing customer base is enthusiastic about the quality standards and creativity that go into our products. "Naturally handmade" - our credo already reveals the standards we feel committed to:

- 1. we only use natural and near-natural (i.e. species-appropriate) ingredients.
- 2. we therefore do not use artificial additives.
- 3. each item is unique and is subject to constant quality control
- 4. we handle our raw materials and products with care.

The catalog is divided into structured feed for leaf eaters (herbivores), including main feed and supplementary feed. This is followed by the main food grain mixtures for all granivores, followed by the monothematic special mixtures. This is followed by a wide selection of snacks for all rodents. For all products, the assigned small animals are recommendations, except for those with animal proteins. Our main foods are tailored to the specific needs of the animals, but are also partly interchangeable and replaceable because, for example, rabbits and guinea pigs need similar food. As always, a one-sided diet is always unfavorable and treats are intended for special occasions and not as a substitute for fresh and staple food.

Hoppel-Mix Grain-free complete feed for rabbits and others

MCN019 - Ingredients: organic meadow hay, parsley stalks, alfalfa stalks, carob, linseed flakes, pea flakes, lupinflakes, green oats, beanflakes, dill, carrot slices, parsnip, beet, nettle, dandelion leaves, birch leaves, dandelion root, marigold blossoms with calyx, rose blossoms, red clover blossoms. Analytical constituents: Crude protein 11.8 % Crude fat 2.2 % Crude fiber 18.4 % Crude ash 6.8 %

FOOD FOR WILD AND PET BIRDS

Pet birds such as budgies, canaries, parrots and many other species have long held a firm place in the hearts of bird lovers. Understandably so, as these lively contemporaries are not only beautiful to look at, but also surprisingly communicative and intelligent. We also want to play our part in providing high-quality, species-appropriate food for the animals.

Every bird lover approaches the subject of feeding differently, some mix their own food, feed too much or want the most varied food possible. That's why we offer three different varieties:

- 1. the "basic" mixes contain the most important ingredients and are primarily intended for mixers and price-conscious customers.
- 2. the "fit" variants contain everything that belongs in a healthy grain feed for the respective bird species. the respective bird species. Our focus is on healthy ingredients and high quality.
- 3. the "topfit" line impresses with the greatest possible variety and quality. In addition to the variety of grains, flowers, herbs and vegetables are also added in order to offer the to offer the animals a whole range of health-supporting ingredients.

The year-round feeding of wild birds has long been established as a necessity and in recent years the selection of products for feathered garden guests has grown enormously. In addition to the classic year-round feeds for every budget, our range also includes special mixtures with special ingredients such as various insects or mussel meal. We also produce special supplementary feed such as the "Beeren-Beutel" and are constantly expanding our portfolio.

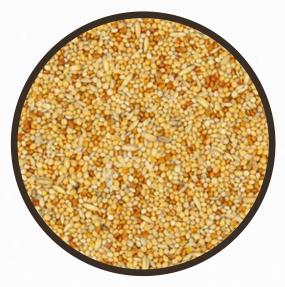

Our classic packaging sizes are 2.5 kg in tubular bags and 10 kg and 25 kg in paper bags. However, we can also easily fill smaller quantities in stand-up pouches or tubular bags and adjust the weights to your requirements.

We can also produce snacks for birds from any mixture and any shape. The catalog only shows a small selection of the products we have produced so far. Simply contact us with your ideas.
