

d.stream
engineering

Your Technology Partner accelerating your project

Secure and efficient path to the embedded product

Digital Signal Processing
& Embedded Systems

Selected
Industry
Partners

We bring your product to life
with high-performance real-time software
and efficient hardware design

Expertise and engineering power for
demanding projects

More on the back

Secure. Efficient. Reliable.

25+ Years
of Turning
Technology
into Products

Automotive

Camera Mirror Systems, ADAS

Rail & IoT

Predictive Maintenance

Robotics

Robot Arm, ROS2, Vision AI

Embedded AI / Vision AI

Autonomous Driving, Object Detection

Industrial Cameras

Smart Camera, Vision-AI

Traffic Monitoring

Radar Speed Measurement

Audio Technology

Multi-Room-Audio, ANC, High-End

Smart Farming

HDR Smart Camera

d.stream engineering develops optimized embedded software for demanding systems based on DSP, Vision AI and complex SoCs.

From **concept to production**, we help teams solve performance and real-time challenges while keeping projects on track.

Let's talk about your Embedded Projects
