

Viscous or watery, much or little:

# Optimal filling and capping.

simple or complex,  
semi automatic or fully automatic,  
standalone machines and  
complete systems

[www.alwid.de](http://www.alwid.de)

### **Filling machines**

semi automatic and fully automatic systems for level filling, volume filling or weight-accurate filling

### **Capping machines**

semi automatic and fully automatic cappers for almost all cap types

### **Complete systems**

block designs and complete packaging systems from depalletizer to final packaging

### **Special machines**

special machines and special components related to the packaging process and more

# Individually designed.

You have the product. And we have the optimal solution for it. When it comes to reliable filling of different non-carbonated fluids of high and low viscosity and the subsequent capping, we are true experts. Customers all over the world trust in our long-standing experience and count on our know-how in the design of new systems.

Regardless of whether you need a cost-effective semi-automatic machine or a complete system with all accessories: According to your specifications, we design, manufacture and assemble line systems and rotary systems, which are suitable for small, medium and large performance ranges. Due to the modular design, different containers and fluids can be processed without complex modifications.

Does that sound good? Then talk to us about your wishes!

consulting, development,  
manufacturing, assembly,  
commissioning and service

# Applications for different industries.

## Food industry

- dressings
- honey
- jams
- sauces
- spices
- oils and fats
- dairy products
- pastes

## Beverage industry

- juices
- milk
- spirits
- liqueurs
- wines

## Chemical industry

- detergents
- frost protection
- brake fluids
- acids
- lyes
- engine oils
- lubricants
- paints

## Cosmetics industry

- cremes
- lotions
- shampoos
- pastes
- gel products
- perfumes

## Pharmaceutical industry

- disinfectants
- dialysis fluids
- veterinary medicine
- essential oils

## Variable caps

- screw caps
- push caps
- T-corks / glass-corks
- corks
- spice mills
- crown corks
- twist-off caps
- PP caps
- trigger caps
- dosing caps
- safety caps
- special caps
- lids

# Productive and reliable.

**Seamless service** | Of course, we support you with your system: We offer you an extensive service package and as an ISO-9001 certified company, we guarantee a high-quality standard in all areas.

- consulting and layout design
- planning and development of systems
- manufacturing and assembly
- commissioning, instruction and production monitoring
- repair and maintenance
- overhauling of old systems
- compiling of technical documentation
- telephone support

**Sophisticated special machines since 1964 |** More than 50 years ago, Alwin Wieferig decided to do the job properly. Instead of further on selling machines that only insufficiently met the requirements of the customers, he founded his own company for special machines. From then on, he developed and manufactured his own filling and capping machines under the name ALWID – and his customers were impressed.

The quality and efficiency of his systems quickly became popular. In this way his one-man company evolved into a middle-sized family business. Our team of specialists has gained an excellent reputation as problem solvers. Our satisfied customers in 60 countries in the whole world will gladly confirm this.
