Together it's easier.

Solar energy

Environmentally friendly for our future

Our solutions that can be used independent of mains power do not stop at roller shutters and sun protection applications. Thanks to the new solar kit from Becker, roller shutters and screen applications can now also be supplied with power by solar panels.

The solar kit is a step towards a future of resource conservation in the area of home automation. With the possibility of solar operation, it's the perfect combination of sustainability and modernity.

Compact installation

The solar kit can be installed compactly due to the direct installation in the application element. The drive and battery are located inside the box, the solar panel can be attached to the outside of the element using rivets.

The drive included in the package has an integrated radio receiver. This makes attaching it to a control element in the living room using cabling a thing of the past. The drive can be adjusted and controlled by radio using a Becker Centronic hand-held or wall transmitter.

Highlights of the solar kit SK460

- Suitable for roller shutter and screen applications
- Support of sensor systems both in roller shutter and screen mode
- Compatible with the Centronic radio control program
- More than 100 operating cycles can be achieved from one battery charge
- Control and charging electronics installed in the drive
- Two freely selectable intermediate positions can be programmed
- Blockage detection
- Stop and point limit positions adjustable
- Burglary resistance through the use of rigid shaft connectors
- Reduced noise due to gentle start-up and stop

Contents of the solar kit

- DC drive, optionally with 6 Nm or 10 Nm
 - Solar panel
 - Battery including installation set
 - Wall bracket with catch
 - Driver / Ring S40
- All Centronic hand-held and wall transmitters are compatible with this set.
Order these extras now!

Optional accessories

- Y-plug for external charging
- Extension cable for the solar panel
- Plug-in power supply
