

POLYLAYERTECH

Plastic Sealing Process

The Italian company **PolylayerTech** was founded after many years working in the extrusion of Polypropylene of all kinds of profiles. This enable PolylayerTech to be one step ahead in sealing and converting market of Polypropylene extrusion grade. **PolylayerTech** is located in the North East of Italy. Our mission is to solve the welding and converting problem with specific and special customize lines, i.e. edge sealing line for layer pad either on line sealing, sleeves, boxes, thick and light material, medical boxes and all other requirements for our customers. We continuously keep interaction with our partners in order to improve the technology, the productivity and to simplify the user-interface of our machines. In this context, **PolylayerTech** particularly puts emphasis on the importance to advance the skill of automation. This enables our partners to benefit from our high competitive lines in terms of the quality of the products offered to them as well as the productivity of their company. We offer solutions on any design, sealing and converting issue. We customize lines and your line will be the only line of its kind, it is yours. There will be no other copies around the world. **PolylayerTech SRLS**, its dynamicity and flexibility are the special characteristics that the company has managed to blend with an efficient, constantly developing new post extrusion sealing manufacturing technology and process. Today we are the reference point for the sealing of polypropylene sheets. We are the reference in the market for our ability to solve Customers sealing and converting problems, through solutions economically and environmentally oriented.

We are working as a worldwide consulting company in extrusion, welding converting PP sheets, business plan, temporary management, Project Leader and new products, bringing to the market innovative, value added, and consumer green packaging solutions. Our team enables us to provide personalized consulting services, extrusion spare parts etc. The combination of our unique specialized skill sets in plastic extrusion, converting, packaging, process machinery put us in the lead position, worldwide. Our passion is to innovate and develop turn-key custom effective solutions for plastics packaging and visual markets.

Company Strategy

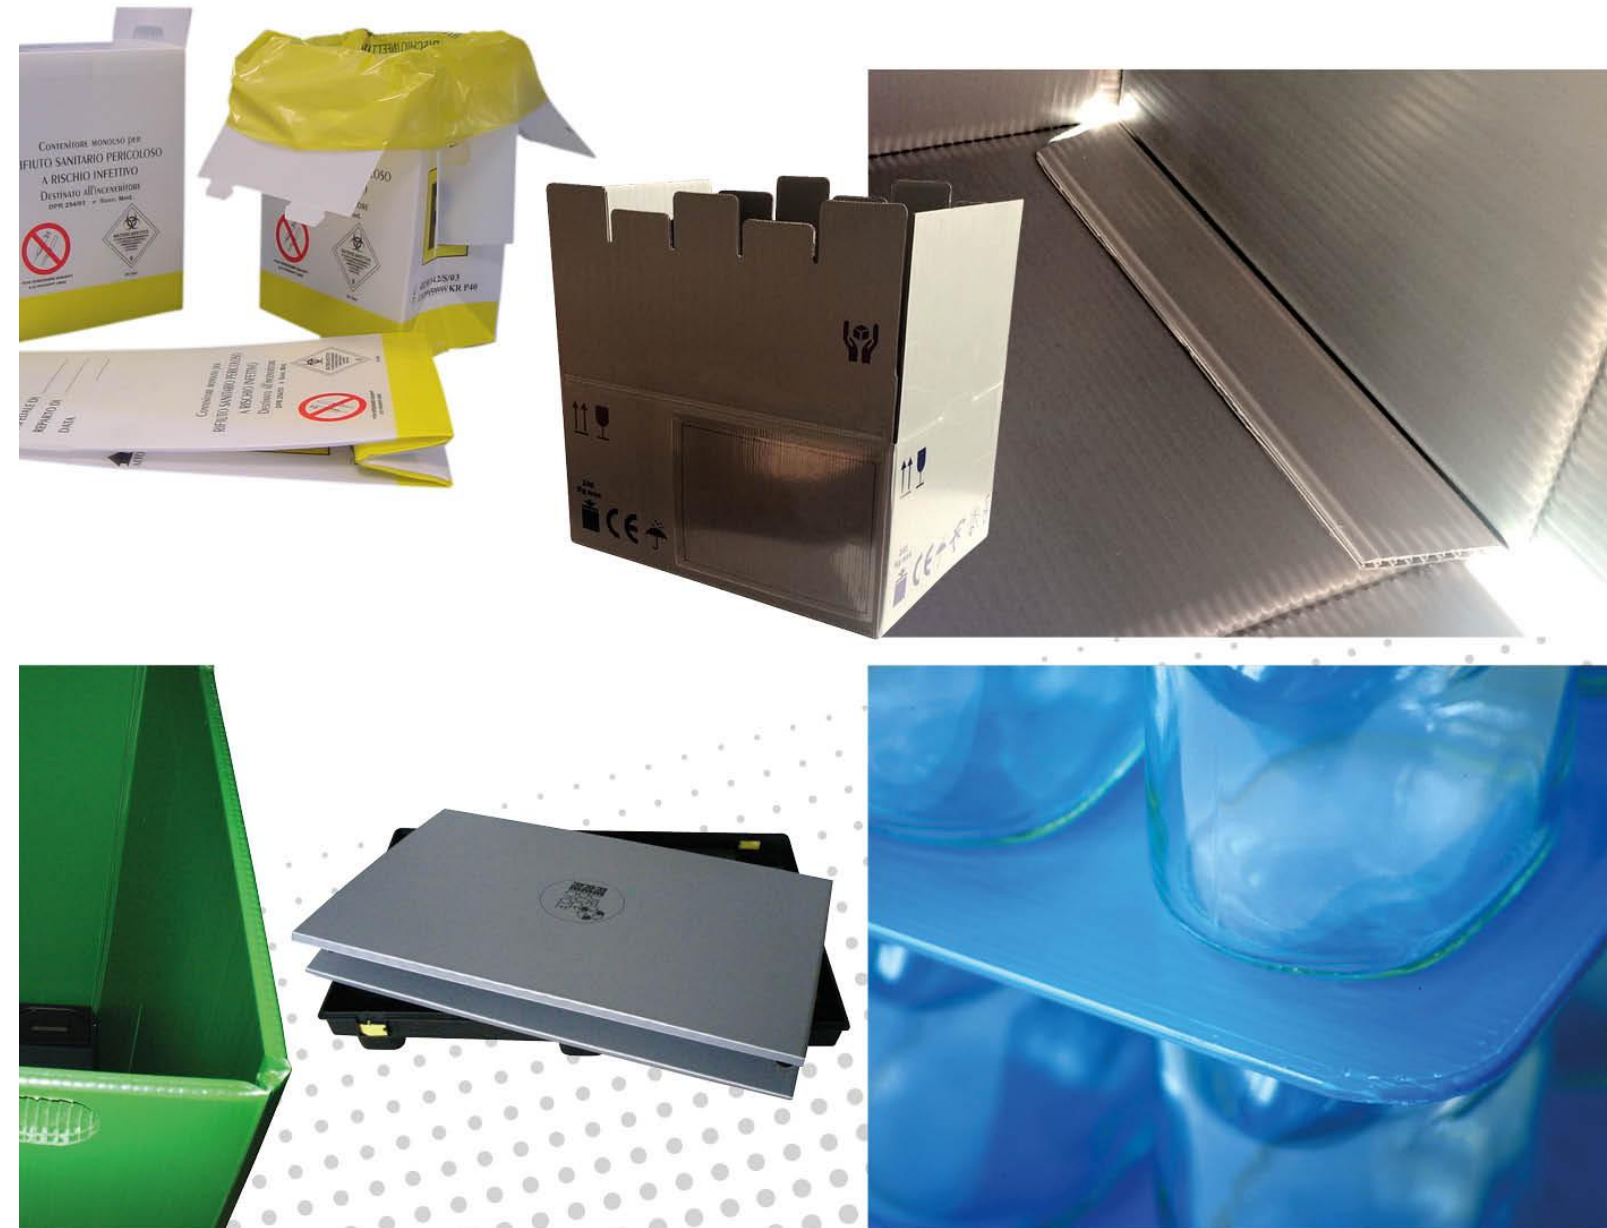

- Vision:** To provide quality services that exceeds the expectations of our esteemed customers.
- Mission statement:** To build long term relationships with our (Partners) customers and clients and provide exceptional customer services by pursuing business through innovation and advanced technology.
- Goals**• Worldwide expansion in the field post extrusion sealing and converting Polypropylene and develop a strong base of key customers. • Increase the investments of the company to support the development of technology. • To build the best reputation in the field of sealing, converting and customized and become a key player in the industry.

Your Problem = Our Challenge
