

## The Terrazza Weedee® PRO Kit consists of :

### 1. The Weedee® PRO machine

Power	: 4,5 kW
Motor type	: HONDA GXV Engine
Rotation speed	: +- < 200 rt/min
Weight	: 79 kg
Dimensions	: 160cm x 80cm x 73cm
Noise level dB(A)	: 88 dB(A)
Hand/arm vibration ahwd	: 5.3 m/s2
Diameter work width	: 45 cm - Weedee brush
	: 70 cm - TWT brush

### 2. Weedee® weed removal brush

Removes weeds and mosses from the surface and the joints.

### 3. Terrazza Wire TECH

Removes long and lush weeds as well as big parts of their roots from larger surface areas.

## The Terrazza Weedee® PRO: options and consumables

AXI®sweeper brush with collection box (optional)

Weedee® weed removal brush

Bundle of braided metal tufts

Bundle of synthetic tufts

Protection stop

**Terrazza MC®**  
Innovators in **green**  
**cleaning** technology

## Terrazza Weedee PRO®: in depth and efficient weed removal with the Weedee® brush and the Terrazza

With its petrol engine, the **Terrazza Weedee PRO®** is a unique weed removal machine thanks to the **reduced rotation speed** of the brushes. Its **excellent manoeuvrability** allows the Weedee PRO® to remove weed and mosses from hard surfaces without the use of chemicals, high pressure or a thermic treatment.

Depending on the type of work, different types of brushes can be mounted on the Weedee PRO® machine.

### Multifunctionality at its best!

The **Weedee® brush** removes weeds and mosses from the surface and between the joints and can be used easily and quickly for an interim treatment of the surface.

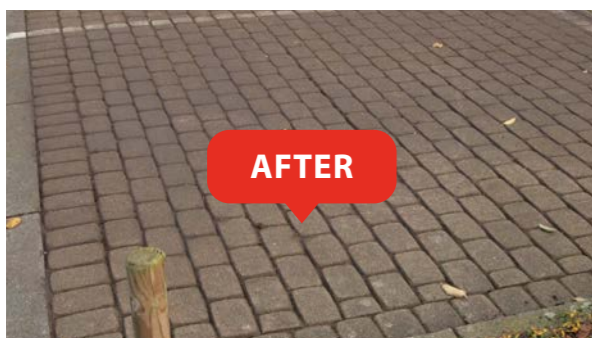

The **Terrazza Wire TECH® Brush (TWT)**, with a working width of 70 cm, is ideal for more heavily soiled areas. The synthetic bundles and the braided steel bundles remove long and lush weeds from the surface. The bundles can be replaced in case of heavy wear.

For **sweeping**, either performing a daily sweep or sweeping up the collected weeds, the **AXI® sweeper brush** can also be mounted on the Weedee PRO® machine. The AXI® brush with or without collection tray is optionally available with the Weedee PRO® kit.

The brushes are each equipped with a connector that makes changing the brushes very easy and smooth.

The Terrazza Weedee PRO® can be used on **all sorts of paved surfaces**: terraces, driveways, parking lots, sidewalks, pavements, etc., in concrete, bricks, cobblestones, clinkers, asphalt, etc. ,...

The Terrazza Weedee PRO machine is especially designed for the needs of professional cleaning companies, contractors, landscape gardeners and for local authorities.

## Durable and ecological weed removal

The new **Terrazza Wire TECH® (TWT)**, composed of bundles of Terrazza Synthetic tufts and Terrazza braided metal tufts, **removes easily long and lush weeds** from hard surfaces. Thanks to its unique shape, big parts of **the weed roots are also removed**. Weed removal with the Terrazza Wire TECH® is the ideal pre-treatment before an in depth weed removal with the Weedee® brush.

The **Weedee® brush** removes weeds and mosses from **the surface and the joints**. Thanks to the patented Terrazza technology the Weedee® brush has a very good resistance against the vertical pressure and the weight of the machine which results in **less wear of the brushes**. The tufts stay nicely upright and remove the weeds and big parts of the weed roots from the joints. The combination of perfect resistance against **vertical pressure and the reduced rotation speed of the brushes** are a **new and unique concept** developed by Terrazza MC®.

**Without the use of heat or steam or chemical agents**, the surface is weed free in no time, respectful of the environment.

**The Terrazza Weedee PRO is a unique concept, especially designed with the Terrazza technology which stands for durable and ecological weed removal.**

## Unique and superior: the Terrazza Weedee PRO®

The **correct distribution** of pressure on the brush and the **reduced rotational speed** that makes the brush run at low speed, have many **advantages**:

- **Removes weeds and big parts of the weed root**
- **No projection** of weed and mud
- **No flying -potentially dangerous- sharp objects**, such as stones, etc.,...
- **No damage** to the surface, kerbs, walls, signposts, lamp posts, etc.,...

Around the Terrazza Wire TECH® brush is a wide metal rim to protect signs, posts and walls, providing a **safety zone**.

The machine is **easy to operate and pleasant to work with** thanks to the perfectly horizontal rotation of the brush.

Due to the nice even weight distribution and the large wheels, the Weedee PRO® has **excellent manoeuvrability**.

The handle is easy to fold (without the use of tools) and the compact size makes the Weedee PRO® **easy to store or transport**.

The sturdy machine is made of **superior materials** and has a **powerful motor**.
