# OUR PRODUCTS

**02**

The page features two large, light gray, curved decorative elements. One is a wide, shallow arc at the top, and the other is a similar arc at the bottom, both curving towards the center. The text is centered between these two arcs.

Soft close is designed for various sliding doors to make opening and closing smoother, quieter, and safer. Once installed, doors close gently—preventing impact, reducing noise, and protecting both the door and surrounding fixtures. Watch the installation comparison video below to experience a calm, controlled close.
