products division

BLOWING AGENT

# BLOWING AGENT

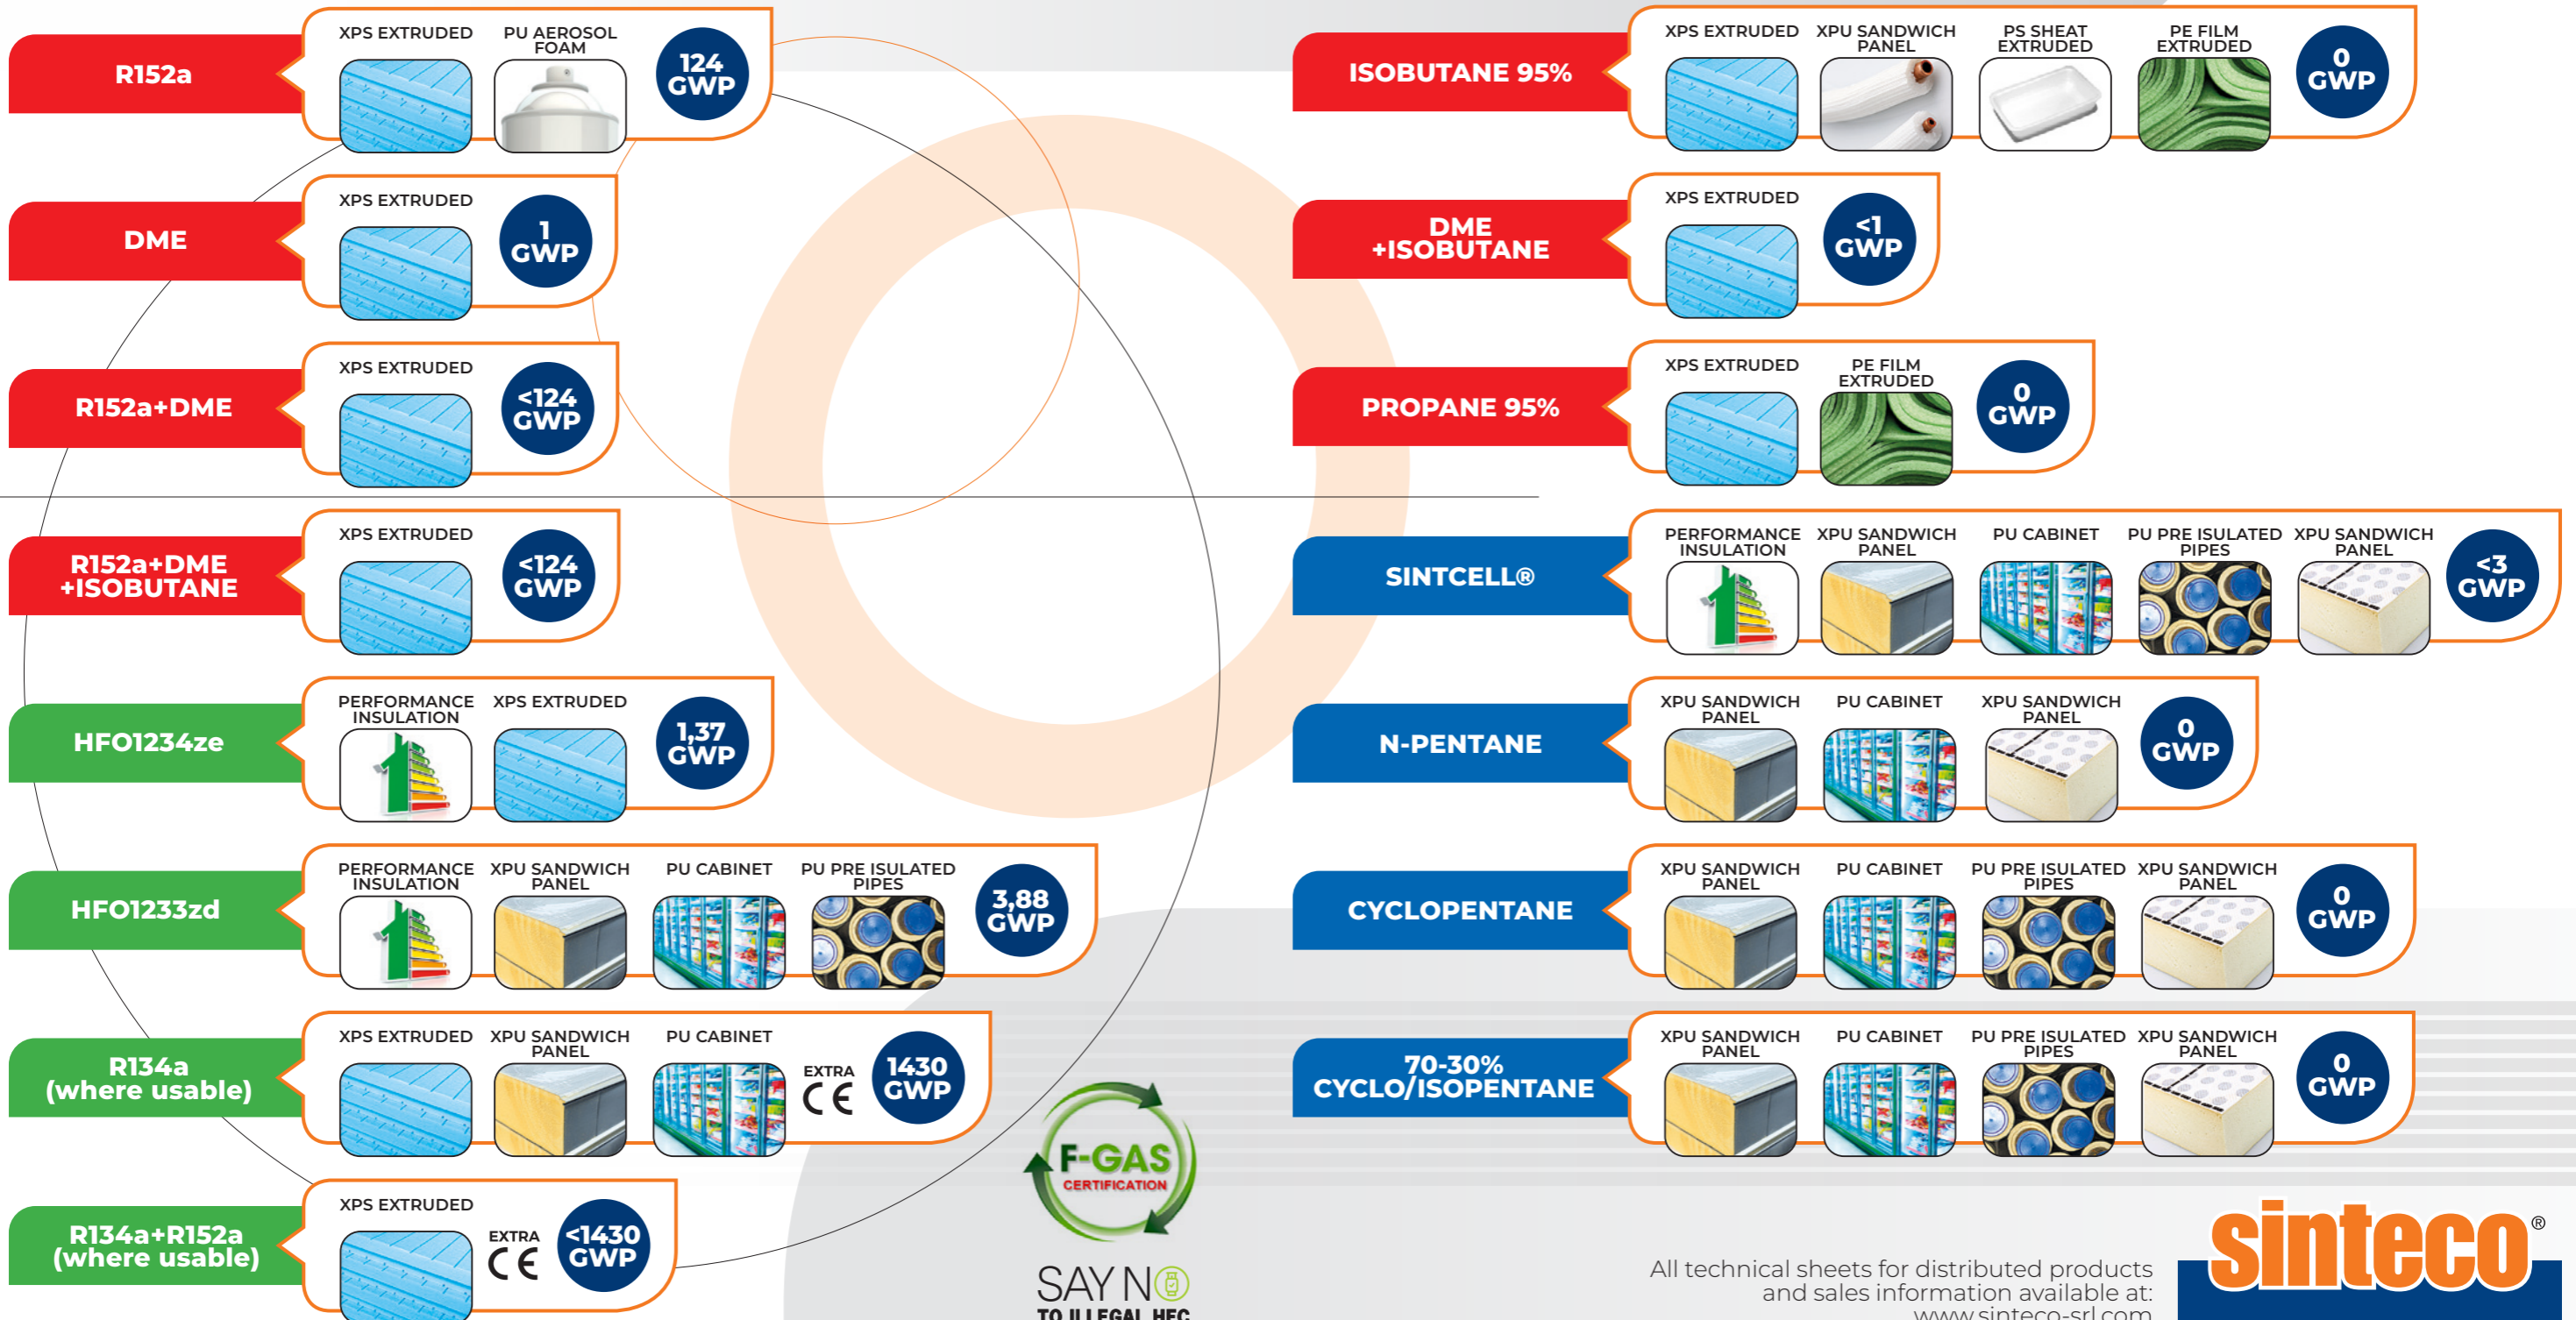

Since 2005 Sinteco has been distributing blowing gases for plastic materials, especially in the insulation sector and where top quality performances are required in Polyurethane foams (XPU-PU) and extruded plastics and foam (XPS, XPET, XPE, PE, PP).

Our laboratory guarantees the highest quality of our products in compliance with international quality specifications.

Furthermore we are able to create special mixtures with multiple components based on the customer's specifications and the insulation performance required by the market.

Sinteco is one of the European companies to have an Fgas quota in accordance with EC Regulation 573/2024, for the distribution of HFC in the European market.

61-litre cylinders  
40-litre cylinders  
930-litre drum  
200-litre liquid drum
