

One system.
All options.
geoCapture

Web and App.
One system. All options.

This is geoCapture

One system, all options

With geoCapture you have all functions in one system. The portal can be tailored exactly to your requirements. So you can see all your data at a glance.

100% Cloud

To use geoCapture, all you need is a web browser and an internet connection. Internet connection. You do not need to install any software. Your data is stored within geoCapture's cloud.

User training

In a user training specially designed for you, we will show you the possibilities of the system. This enables you to use the system optimally for your company.

Open interfaces

Our system offers you numerous interfaces to other software providers, so that you can seamlessly integrate the data from your existing IT landscape within geoCapture.

Fast support

Professional support is our top priority. You can reach our support team directly and without being put on hold.

Personal consulting

Would you like to get to know the functions of geoCapture better? Feel free to contact us personally. We look forward to hearing from you.

The multitool for mobile forces

We are experts for mobile work

1

Operational planning

With geoCapture's operational planning you optimize the utilization of man and machine. Well-founded planning creates a smooth workflow. Thanks to improved deployment times, you minimize your costs. Keep your projects and construction sites running.

2

Tour planning

The geoCapture tour planning facilitates the disposition and utilization of your operational fleet. Thanks to ideal tours, you save unnecessary empty and double trips. Convenient route planning ensures smooth operations - day after day.

3

Time recording

With mobile time recording, recording working times becomes a matter of course. You receive working times for your construction sites and projects that are accurate to the minute. Depending on the requirement, the employee can clock in in the vehicle, via smartphone or in the office.

4

Vehicle tracking

Tracking can do much more than you think: In addition to the current location, geoCapture provides you with working times, driving distances or operating hours for construction sites and projects.

5

Tool tracking

Where is the tool? Who is on the road with the trailer? With geoCapture, you always have an overview of your equipment. So nothing gets lost anymore.

6

Digital forms

Construction diaries, operation reports and delivery bills are now digitally captured! Fill out your forms conveniently via App. In the process, much of the data is completed automatically. It couldn't be easier and more flexible!
