

Hartner Aggregate und Industrietechnik GmbH

- **Headquarter:** Pettenbach, Upper Austria
- **Founded:** 1988 by Erich Hartner
- **Branc:** Denkendorf near Stuttgart/Germany since 2021
- **Core Competencies:** Power Generators, emergency power untis, battery storage systems, material handling equipment, forklifts
- **Partner:** CGM, PRAMAC, Honda, Hangcha
- **Philosophy:** Reliability, customer proximity, technical competence

Power Generators – our Main Business

- **Diesel Generators:** Power range from 2 – 3000 kVA
- **Gasoline Generators:** portable and stationary
- **Inverter Generators:** ideal for sensitive electronics and quiet operation
- **PTO Generators:** perfect for agricultural applications
- **Emergency Power Units:** rapid switching in the event of power outages

Our Generators are tailored specifically to the needs of professional users, whether on construction sites, industrial areas or private settings!

750 kVA Generator for PORR construction site in Bulgaria:
Automatic transfer pump for external refueling, including load test.

Project date: 2024

2 units 750 kVA Generators for Pumped Storage Power Plant Forbach/Germany:
Automatic transfer pump for external refueling, including load test.

Project date: 2025

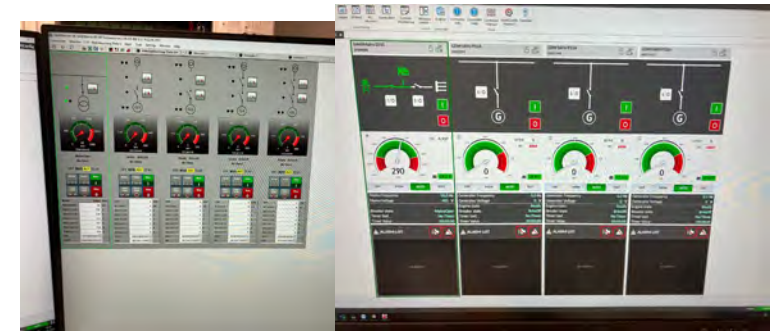

**Generator Mod. GSW 705 ARGE
KER450 Switzerland:**
Parallel operation integrated into
transformer control.
Project date: 2020

**2 units GSW 360 for Pumped
Storage Power Plant
Kühltal/Austria**
Project date: 2021

7 units 500 kVA Generators for Marienhof/Munich/Germany suburban railway line:
Parallel operation integrated into transformer control and visualization, including service and emergency support
Project date: since 2019

4 units 500 kVA Generators for Semmering Basistunnel SBT1.1
Parallel operation integrated into transformer control and visualization, including service and emergency support
Project date: since 2019

6 units 400 Generators for German Army/Munster:
Equipped with a 600-liter fuel tank, digital control and sockets.

Project date: 2024/2025

2 units 400 kVA Generators for company Hargassner:
Parallel control and integration into energy center.

Project date: 2024/2025

300 Generators for a sawmill:

600 liter fuel tank, digital control, runtime aprox. 11 hours

Project date: 2025

200 kVA Generator for district heating:

950 liter fuel tank, digital control, active voltage and frequency monitoring, motorized emergency switch-over unit.

Project date: 2025

300 kVA Generator for construction site operations in Switzerland:

- FI sockets
- 400 liter fuel tank
- 3-way valve for external refueling
- Dummyload

Project date: 2025

200 kVA safety Generator for a tunnel boring machine in Vienna:

- 250 liter fuel tank
- Roller doors due to space constraints
- Control panel on the front side
- Externally controlled isolating switches
- Explosion-proof battery

Project date: 2023/2024

100 kVA Stage V Generator for municipal utilities:

125 A feed socket

Various FI sockets

400 liter fuel tank

3-way valve for external refueling

Dummyload

Powerlock

Project date: 2024

Stationary 100 kVA emergency generator for a construction company:

Perkins motor, digital control, 200 liter fuel tank

Project date: 2024

100 kVA Stage V Generator for PORR

FI Sockets

400 liter fuel tank

3-way valve for external refueling

telematics cable

Project date: 2024

100 kVA Generator for a wastewater treatment plant:

400 liter fuel tank

FI sockets

Project date: 2024

80 kVA mobile emergency generator with LED ambient and interior lightning for Telfs municipality /Austria

400 liter fuel tank

Digital control

Monted on a tandem trailer, practical aluminium toolbox

Project date: 2025

60 kVA Stage V emergency generator for BeMo:

Digital control, galvanized base frame, 209 liter fuel tank, FI sockets Typ B

Projektdatum: 2025

60 kVA Stage V emergency generator for the German Army:

120A emergency feed socket

FI-sockets

200 liter fuel tank

Project date: 2024

75 units emergency generators for Red Cross locations in Styria/Austria:

Mobile or stationary units delivered with a minimum runtime of 72 hours, tailored to location requirements

Project date: 2024/2025

**80 kVA emergency generator for the
Austrian Armed Forces**

for stationary operation with a 900-liter
tank and IG200 grid-parallel operation

Project date: 2024

**20 kVA Stage V generator for the federal
ministry of the Interior**

Mounted on a trailer with a 120-liter-tank
and a three-way valve for external
refueling

Project date: 2025

**20 kVA emergency generator for
Malteser Hospital Service Graz**

350 L tank for 72 hours of operation, 32 A socket for emergency power supply input, and various sockets with insulation monitoring. Mounted on a single-axle passenger car trailer with storage boxes.

Project date: 2024/2025

**60 kVA emergency generator for
Malteser Hospital Service Vienna**

60 kVA generator for domestic and field operation (switchable), with a 999-liter large tank. Mounted on a tandem trailer with storage boxes.

Project date: 2024/2025

**60 kVA Stage V emergency generator for
the German Army:**

120A emergency feed socket

FI-sockets

200 liter fuel tank

Project date: 2024

5 units 20 kVA generators for Caritas:

FI-sockets

51 liter fuel tank

Project date: 2024

**42 units of 9 kVA diesel generators for
Caritas**
Delivery for Ukraine
Project date: 2022

35 units of 2 kVA gasoline generators:
For the Association „Verein Freiheit
Demokratie“
Project date: 2026

Other Product Areas

- **Battery storage:** Stationary and mobile, for construction, trade and industry
- **Water pumps:** for freshwater, sludge, wastewater and dirty water
- **Material handling:** electric forklifts, pallet stackers, pallet trucks, electric pallet trucks,
- **Cleaning Technology:** floor cleaning machines, pressure washers, weed control

With over 35 years of experience, we offer customized solutions for various industries!

Products and Appplication Areas:

- **Construction:** Reliable power supply on construction sites
- **Industrie & Trade:** Ensuring operational continuity for production warehouse and sever rooms
- **Agriculture:** Operation of milking robots, ventilation systems and feeding automation
- **Emergency Services:** Power supply for disaster relief operations and events

Our solutions are individually tailored to meet the specific requirements of various industries!

Our Service:

High spare parts availability through a comprehensive and well-organized inventory

Short lead times due to high stock availability

Professional service and maintenance provided by our service technicians
