

Kiona

Your all-in-one platform for connected buildings

Design, scale and tweak without limits.

Built on open technology, the Kiona platform helps you connect, visualize, and monitor data, making it easier to create smart solutions for any automation, energy efficiency, or reporting need.

Iw

IWMAC

Ready-made integration system. Operation of cooling technology and buildings.

We

Web Port

Customizable integration system. Technical operation and service.

En

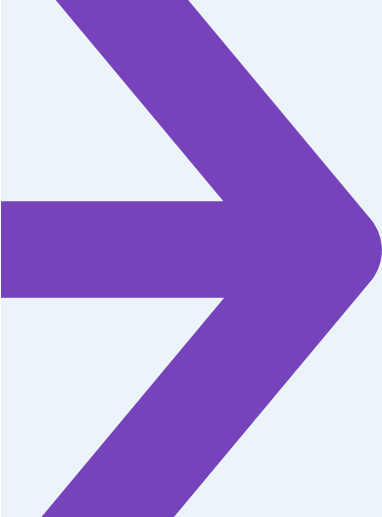

Energinet

Energy Management System. Environmental and sustainability reporting.

Ed

Edge

AI and IoT system. Insights, planning and optimization.

All the software tools needed for building integrators

Our platform is based on software that can be integrated separately or together. With faster integrations and more efficient projects, it allows you to expand your services and customer base.

What you get

SYSTEM INTEGRATIONS

Hardware agnostic

Compatible with various hardware producers on the market.

Open API

Open APIs for easy integration with other systems.

Data import/export

Data import/export of data for integration and analyzes.

OPERATIONAL EFFICIENCY

Remote access

Troubleshoot remotely and adjust multiple buildings and systems.

Alarm handling

Manage alarms, adjust settings, block alarms and see full history.

AI/energy optimization

Optimize performance using AI driven or rule-based insights.

VISUALIZATION AND ANALYTICS

Visualization and analytics

See and analyze data to make data-driven decisions.

Dashboard and reporting

Access dashboards and reports for clear, actionable insights.

Custom or ready-made software

Track trends, set performance benchmarks, and adjust strategies accordingly.

High security focus to build a safe user environment and keep protecting sensitive data (SSO, MFA, ISO 27001)

We support all major protocols and drivers

Trusted by over 450 partners across Europe
