produced since 2019

4000 AR15s delivered to military  
customers in 2023 and 2024

Selling to 4 different continents

# History

What started as a weapon accessories business turned, in couple of years, into place where every customer can get it's rifle tailored to his needs. But before this, we have mastered our own in-house development. Thanks to that we are able to provide our customers not only with guns, but also with special parts production according to their needs, be it machined or 3D printed metal.

# Civilian rifles

Perun 15 rifle is, in its basic configuration, ready to be used out-of-the-box. Just add your favourite sights and you can score on your competition. Or, if you are prepper, you can add silencer, LPVO and be ready for leaving to woods. These rifles won't let you down in any application you choose them for.

Our barrels are treated with ARCOR technology to improve their lifetime as well as to protect them from rusting. With proper ammunition you can easily reach over 20 000 rounds of lifetime\*. 1:9 twist makes our barrels universal for most popular bullets available.

*\*Perun Arms does not recommend use of rounds with bimetal bullets. To reach stated minimal lifetime of your barrel (10 000 rounds) use only such bullets which does not contain steel in their jacket.*

# Military production

Perun 15 A rifles are our answer to your need for affordable, general purpose rifle in NATO caliber. Chambered in 5,56 NATO these rifles come in most popular barrel lengths, but can be tailored upon customer's demand. We are happy to provide our customers with twist both 1:7 and 1:9.

With capacity of production of 8000 rifles per year we are able to satisfy needs of our customers within shortest time possible, usually within 3 months of contract signature and downpayment. Our team knows AR15 platform inside-out and therefore we can provide armourer course upon request – both in Czech Republic or in country of customer.

Due to our knowledge of both domestic and international markets we are ready to prepare complete set of equipment – everything from sling to advanced optical sights.

# Datasheets
