

Company profile

May 2025

MTH is a global leader in industrial and commercial refrigeration

Since 1942, MTH is a global leader in industrial and commercial refrigeration, with a complete range that includes cold-storage doors and related components, refrigerating systems and mini cold rooms. Together with Foris Index, the Group operates with 4 production plants in Italy and over 170 employees, exporting its products to more than 70 countries worldwide.

MTH's priority is to provide its clients with the **highest quality products, tailored solutions and excellent customer support** in every phase of the collaboration, from design to installation.

Thanks to its specialized teams, MTH is able to guarantee **certified quality across the full value chain**, from design and manufacture of individual components to the finished product.

Choosing MTH means choosing a reliable partner able to offer tailor-made solutions and the quality of Made in Italy.

01

Company overview

An 80-year history with accelerated development in last 20 years

1942-1969

**Falegnameria
Guerrini and
Tecnolegno Sas**

Wooden door and
window production

1969-2004

MTH

The development of
insulating doors and
components

2004-Today

**Broadening of product range: acquisitions and new
business building**

Refrigerating systems and components (Frigor Afen), industrial
insulating doors (Foris Index), mini cold rooms (internal development)

International expansion: creation of sister companies

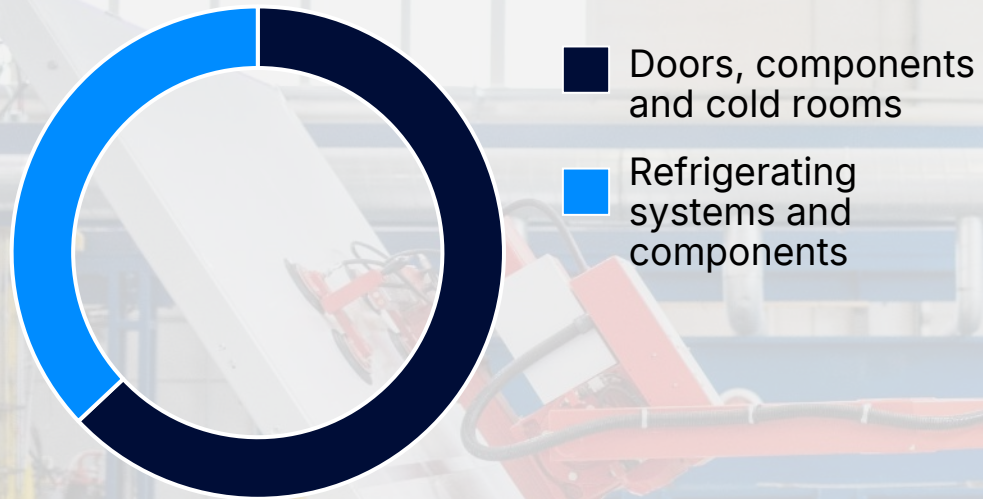

France, Nederland, India, China, Singapore, Malaysia, Colombia

Operational advancements: vertical integration

Moulding of plastic components, extrusion of PVC profiles, working
of metal sheet

Key figures – MTH and Foris Index

Product mix

Geography mix

4 Production plants in Italy

170+ Employees in Italy

1,000+ Customers worldwide

Our value proposition

Global presence

We are able to reach our clients worldwide, thanks to our sister companies and a wide network of partners and dealers

Made in Italy quality

We guarantee recognized quality of products and services, thanks to the severe control processes and attention to details. All made in Italy.

Wide product range

We provide a deep product range offer of refrigerating doors, refrigerating systems, components and mini cold rooms

Continuous focus on innovation

We run continuous research & innovation to guarantee the best solutions to our clients in respect of the environment and our community

Product customization

We design and manufacture custom products based on our clients' needs, developing the best solution together

Value chain integration

Thanks to vertical and horizontal integration, we offer a complete range of products and services in a *one-stop-shop* solution, guaranteeing the quality throughout the value chain

Training and support to ensure quality

We provide support to our customers and dealers, with internal and on-site training and after-sales support services

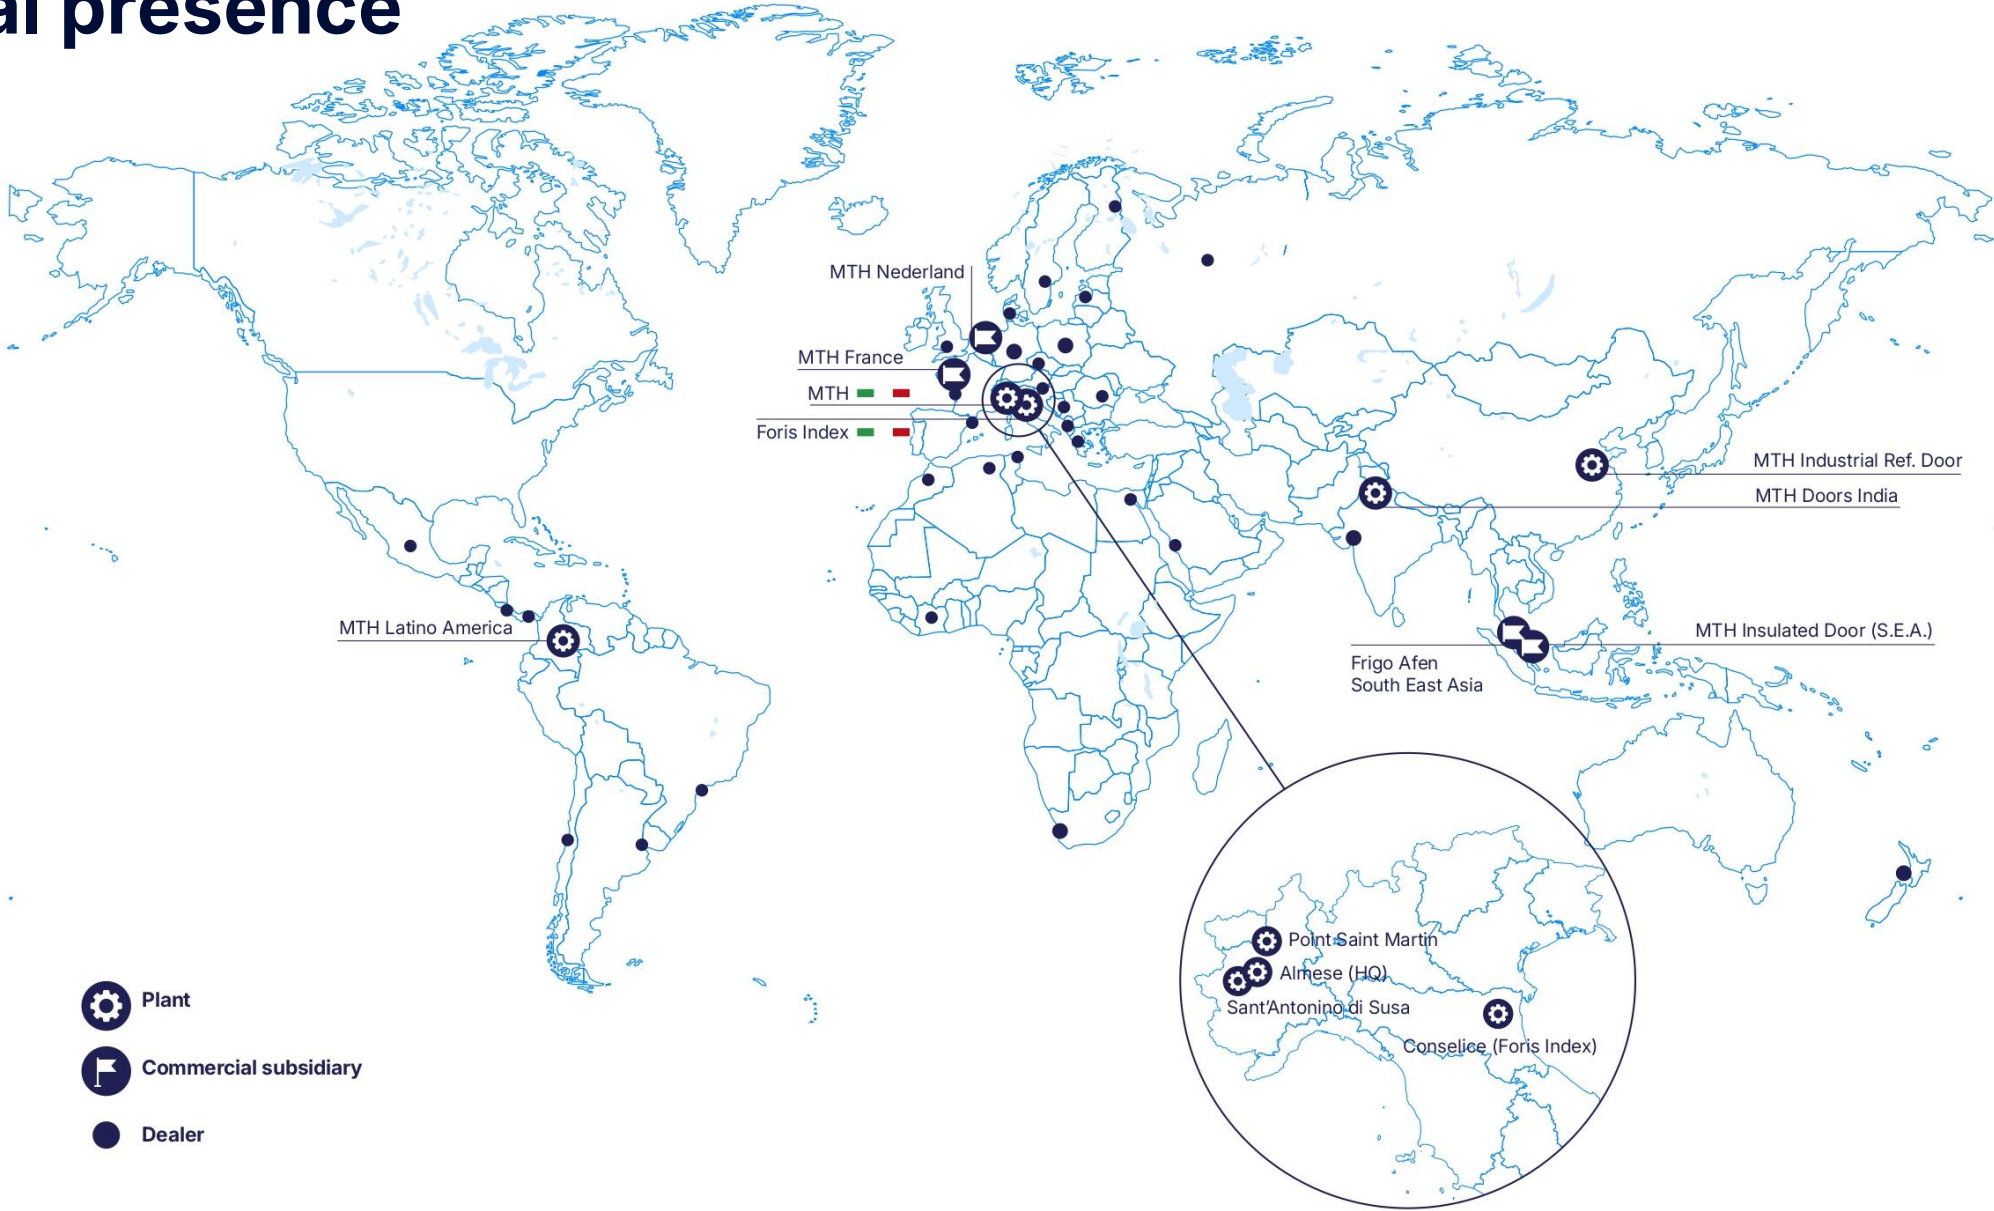

Tangible efforts on sustainability

We pursue our sustainability goals with concrete actions to get real impact – from clean energy production to recycled materials, from refrigerant gases with low environmental impact to the development of solutions with the lowest energy consumption.

A truly global presence

MTH's leadership is based on a network of manufacturing plants, subsidiaries, distributors and strategic partners with a worldwide presence, from Iceland to Antarctica, from South America to China.

The expansion on the international markets, where MTH exports over 70% of its production, continues thanks to its consolidated expertise and wide product range that allow to meet customers' needs in every market.

Made in Italy: four production plants

Almese

MTH HQ

9,000 sqm

MTH's main manufacturing facility dedicated to **cold-storage doors and refrigerating systems**

Pont Saint Martin

2,500 sqm

Pole of excellence for the production of door components: extrusion of PVC profiles, molding of plastic components

Sant'Antonino di Susa

3,500 sqm

Most recent facility fully dedicated to the production of **new range of mini cold rooms**, with state-of-the-art equipment

Conselice

Foris Index HQ

7,000 sqm

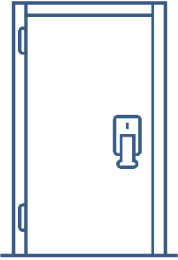

Foris Index's production facility dedicated to **cold-storage doors for industrial and CA applications**

02

Product overview

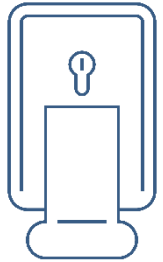

Wide product range: six categories in insulation and refrigeration

Cold storage doors

13,000+ industrial and commercial doors produced every year by MTH and Foris Index, from **40+ models**

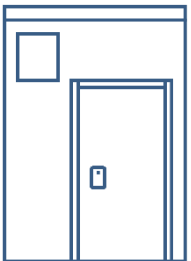

Range includes hinged, sliding, service and "to&fro" doors, special purpose doors (controlled atmosphere, wallet, vertical sliding doors)

Door and cold room components

700+ different door components in catalogue

Range includes aluminum and PVC profiles, hinges, handles, sliding systems, gaskets, automation systems – mostly **produced in-house** by MTH

Algor mini cold rooms

Composed of modular panels available in different thicknesses for both positive and negative T, absence of plastic profiles and corners

Modularity of 200 mm pitch up to 6,000 x 3,500 mm

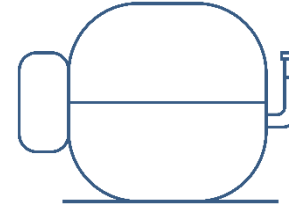

Wide range of accessories available

Refrigerating systems

36,000+ refrigerating systems produced each year

Range includes condensing units, monoblocs for counters, cabinets and cold rooms, silenced condensing units, complete systems – both **standard and customized**

Refrigeration components

Range includes **compressors, evaporators, condensers, fan motors**, valves, filters and humidity indicators

Solutions for logistic centers

Solutions for **loading/unloading goods** (e.g., loading bays and isothermal portals with high insulating power) and **industrial vertical sliding doors with flexible leaf** (e.g., rapid pack / rapid roll and sectional doors)

Cold storage doors

Insulated doors for industrial, commercial and controlled atmosphere applications

(sliding, hinged, vertical, railway passage)

Semi-insulated doors for technical areas, offices, laboratories and pharmaceutical applications

(Service doors, To & Fro doors)

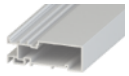

Solutions for logistic centres

(rapid roll & rapid pack doors, sectional doors, loading ramps, dock shelters)

Door and cold room components

In-house production

PVC profiles for door frames and cold rooms

Components for sliding systems

Hinges

Reinforcements and fixing elements

Handles and locks for hinged and sliding doors

Components for automation systems

Third-party production

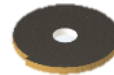

Aluminum profiles for door blade and frame

Gaskets

Heating cables

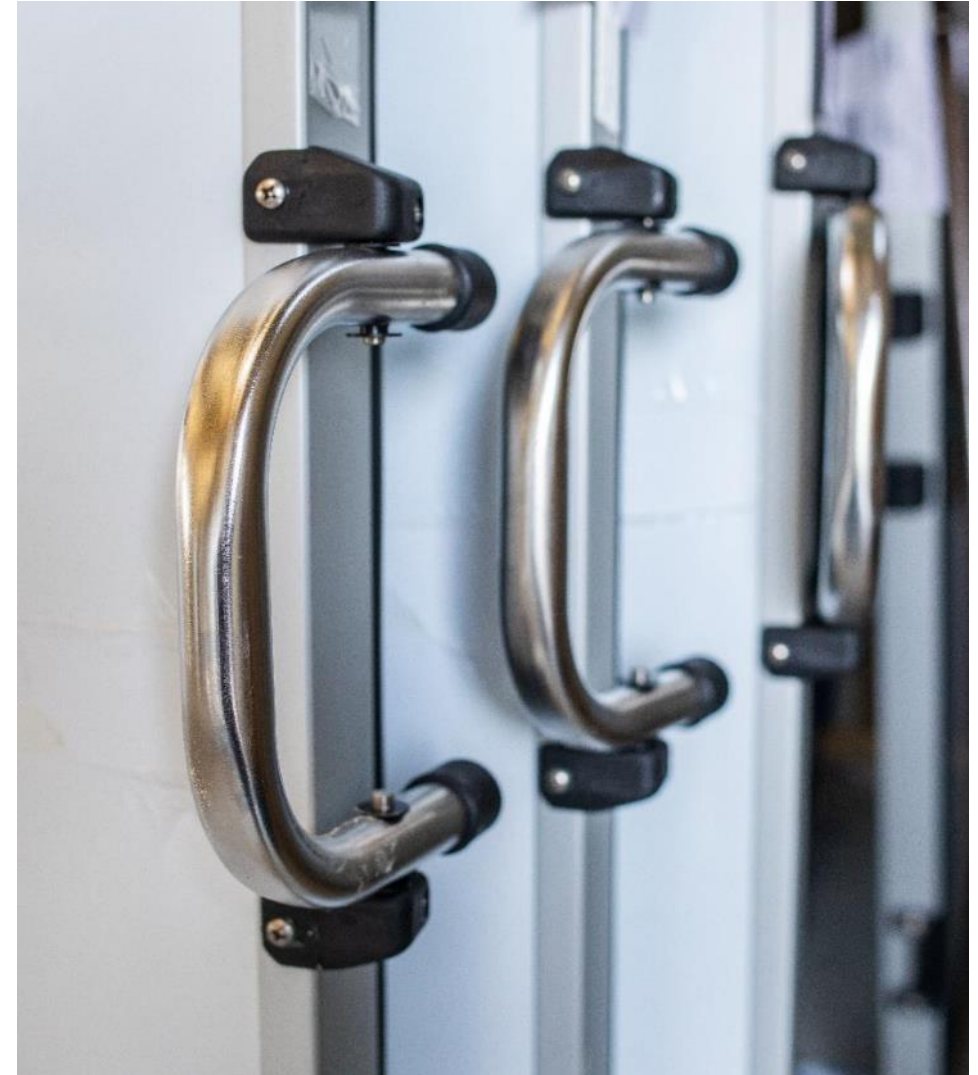

Air foaming gaskets

Portholes and insulated glazing

Pressure compensation valves

Algor mini cold rooms

Maximum product quality

In-house design and production of all the elements of the cold room.

Ease and speed of installation

Male-female panels with eccentric clamping hooks, no plastic profiles.

Optimal space management and versatility

Modularity of panels with 200 mm pitch.

High level of hygiene and ease of cleaning

Possibility to install hygienic profiles on internal corners.

High energy efficiency and reduced environmental impact

Insulating panels up to 150 mm thick and plug-in monoblocs operating with R290 natural refrigerant gas.

Refrigerating systems

Condensing units & systems

Standard range and customized solutions for OEMs

Employed in vending machines, blast chillers, refrigerated counters, wine cellars, medical applications

Monoblocs

Plug-in monoblocs for counters, cabinets and tables, standard (700 and 1.400 L) and compact (400-600 L), with R290 gas

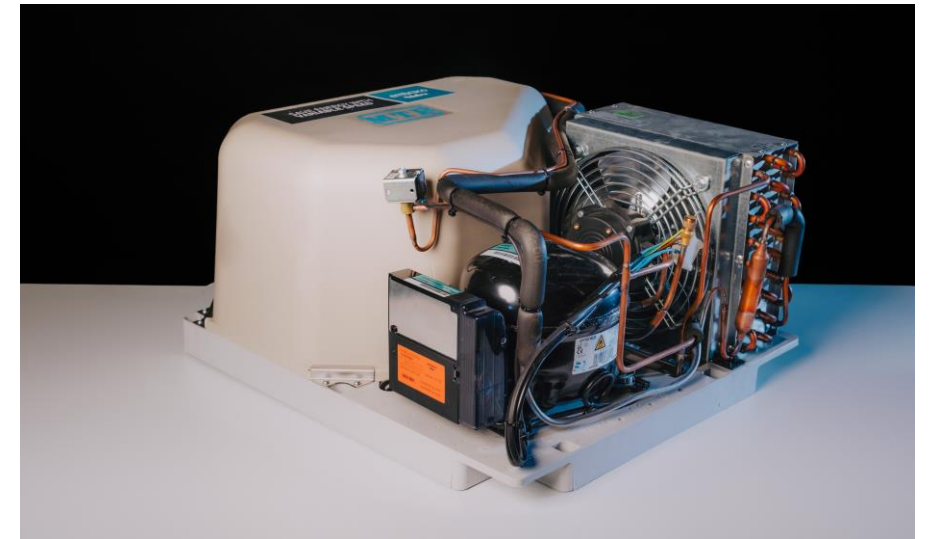

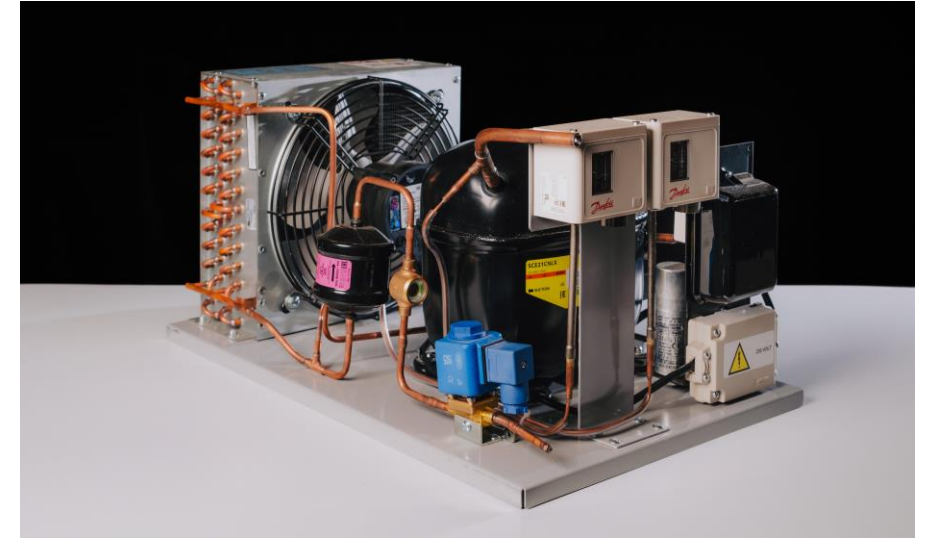

Wall-mounted and ceiling plug-in monoblocs for cold rooms

Standard range and customized solutions for OEMs

Silenced condensing units

Condensing units with hermetic compressor equipped with a soundproof structure

Possibility of installing the unit outside

03

Support service overview

End-to-end support services, from design to installation

Joint design and customization

We work together with our customers to get deep understanding of their needs and **co-design the best technical solutions**, offering a wide range of products with a high degree of customization

Maintenance and technical assistance

We are ready to assist our customers during testing and on-site installation and intervene for any maintenance work on doors: Foris Index's specialised technicians offer assistance with speed and competence

Capability building

We organize dedicated technical and commercial training sessions for our customers and partners, both in-company and on-site, leveraging our 80-year-long expertise and know-how

Original spare parts

We provide a fast and efficient spare parts service with a stock of original components available for national and international delivery within a few days

Thank you
